### Sign-off Sheet and Signatures of Environmental Professionals

This document entitled Phase I Environmental Site Assessment, 46 Canal Street, Lyons, New York, was prepared by Stantec Consulting Services Inc. (Stantec) for Wayne County and the Wayne County Land Bank (WCLB). Any reliance on this document by any third party is strictly prohibited. Any use which a third party makes of this document is the responsibility of such third party. Such third party agrees that Stantec shall not be responsible for costs or damages of any kind, if any, suffered by it or any other third party as a result of decisions made or actions taken based on this document.

All information, conclusions, and recommendations provided by Stantec in this document regarding the Phase I ESA have been prepared under the supervision of and reviewed by the professionals whose signatures appear below.

**Environmental Scientist** 

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Summary June 4, 2021

#### 1.0 SUMMARY

Stantec Consulting Services Inc. (Stantec) has completed a Phase I Environmental Site Assessment (ESA) for 46 Canal Street Lyons, New York (the "Property") on behalf of Wayne County and the Wayne County Land Bank (WCLB). The location of the Property is shown on **Figure 1**. The work was funded through a United States Environmental Protection Agency (EPA) Brownfields Assessment Coalition Grant awarded to Wayne County in 2020 (Cooperative Agreement No. BF- BF-96240019-0). Eligibility of the Property for use of grant funds was approved by the EPA on March 2, 2020. Wayne County and the WCLB are designated as the Users of this report.

The Property consists of approximately 0.04 acres of land identified by the Tax ID 71111-09-138667, which is developed with a 4,473 square-foot 3-story building constructed in 1880. The building is a three-story brick structure and is described in tax records as a downtown row type (with a common wall) design. Historically there were adjoining buildings on both sides of the parcel until 50 Canal Street was demolished due to structural concerns in early 2021. The building occupies the entire parcel footprint and as such there are no outdoor areas such as grass or asphalt or concrete paved parking lot. During the visit the property was unoccupied.

The Property is bounded to the north by Canal Street. followed by commercial storefronts; to the east by a vacant lot that formerly housed an adjoining commercial/residential building; to the south by an unnamed road followed by a vacant commercial building with a sign for Kwik Fill and Red Apple; and to the west by a vacant three-story commercial building with signs for laundry operations on the windows. The land use code for the Property is 481 (commercial).

Based on the available permit records and historical information sources, the Property has been developed with the current structure since 1880 and the documented first use of the Property was commercial specifically as a Dry Goods store in 1884. The historical and environmental records further indicate that the Property was used for commercial ventures (labeled as a store) until at least 1949 and that the Property was a Dry Cleaners from 1969 to 2008.

The following business environmental risks (BERs) relevant to redevelopment or reuse of the Property were identified during the Phase I ESA:

 Based on the age of the Property's building (circa 1880), lead-based paint and asbestos-containing material (ACM) may be present in the building. A formal hazardous materials survey was not completed as part of the Phase I ESA scope of work.

We have performed this Phase I ESA of the Property in conformance with the scope and limitations of ASTM International (ASTM) Practice E1527-13. Any exceptions to, or deletions from, this practice are described in the Data Gaps section of this report. This assessment has revealed the following evidence of recognized environmental conditions (RECs) in connection with the Property:

Summary June 4, 2021

- **REC #1:** A former dry cleaner was listed at the Property from at least 1969 to 2008. Dry-cleaning operations of this vintage typically used chlorinated solvents and it is unknown how the chemicals may have been handled and disposed. The long-term use of the Property for dry cleaning is a REC.
- **REC #2:** A gasoline fueling station has been located south at 30 Geneva Street, adjacent to the Property, since at least 1949. This property no longer appears to be in operation. Five spills were reported between 1998 and 2016. This adjacent gasoline fueling station is a REC for the Property.

Based on the identified RECs and the potential demolition of the building it is recommended that an interior review for potential RECs (post possession) and a regulated building materials survey, pursuant to applicable regulations and professional guidelines, should be conducted. It is also recommended that a Phase II ESA be conducted prior to redevelopment to further evaluate the presence/absence and magnitude of potential impacts including soil vapor intrusion at the Property.

Introduction June 4, 2021

#### 2.0 INTRODUCTION

The objective of this Phase I ESA was to perform an All Appropriate Inquiry (AAI) into the past ownership and uses of the Property as stipulated by the EPA in 40 Code of Federal Regulations (CFR) Part 312 and consistent with good commercial or customary practices specified by the ASTM in "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," Designation E1527-13. AAI is the process for evaluating a property's environmental conditions for the purpose of qualifying for landowner liability protections under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) following final rule of 40 CFR Part 312. The purpose of this Phase I ESA was to identify, to the extent feasible, adverse environmental conditions including RECs of the Property.

The ASTM E1527-13 standard indicates that the purpose of the Phase I ESA is to identify RECs, including historical recognized environmental conditions (HRECs), and controlled recognized environmental conditions (CRECs), that may exist at a property. The term "recognized environmental conditions" means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property:

- 1. due to any release to the environment;
- 2. under conditions indicative of a release to the environment; or
- 3. under conditions that pose a material threat of a future release to the environment.

ASTM E1527-13 defines a "HREC" as a REC that has occurred in connection with a property, but has been addressed to the satisfaction of the applicable regulatory authority and meets current unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a HREC, the environmental professional (EP) must determine whether the past release is a REC when the current Phase I ESA is conducted (e.g., if there has been a change in the regulations). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC.

ASTM E1527-13 defines a "CREC" as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), but with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls).

As defined by ASTM E1527-13, RECs can include hazardous substances or petroleum products present under conditions in compliance with laws if that presence represents a material threat of future release. The presence of hazardous substances or petroleum products is, however, not a REC if that presence is a *de minimis* condition. A "*de minimis* condition" is a condition that generally does not present a material threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

**(** 

Introduction June 4, 2021

ASTM E1527-13 also considers the potential for a business environmental risk (BER), defined as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the property, not necessarily limited to those environmental issues required to be investigated by the ASTM standard. Consideration of BERs may involve addressing one or more ASTM non-scope considerations.

This Phase I ESA report was prepared by Stantec under contract with Wayne County and the WCLB and is being performed on behalf of the Wayne County and the WCLB, each designated as the User of this report. The work was funded through a United States Environmental Protection Agency (EPA) Brownfields Assessment Coalition Grant awarded to Wayne County in 2020 (Cooperative Agreement No. BF- BF-96240019-0). Eligibility of the Property for use of grant funds was approved by the EPA on March 12, 2020.

The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did <u>not</u> include an assessment for environmental regulatory compliance of any facility ever operated at the Property (past or present), or sampling and analyzing of environmental media. Stantec was not contracted to perform an independent evaluation of the purchase or lease price of the Property and its relationship to current fair market value. The conclusions presented in this Phase I ESA report are professional opinions based on data described herein. The opinions are subject to the limitations described in Section 2.3.

ASTM E1527-13 notes that the availability of record information varies from source to source. The User or EP is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. "Reasonably ascertainable" means:

- 1. information that is publicly available;
- 2. information that is obtainable from its source within reasonable time and cost constraints; and,
- 3. information that is practicably reviewable.

#### 2.1 PROPERTY DESCRIPTION

The Property consists of approximately 0.04 acres of land identified by the Tax ID 71111-09-138667, which is developed with a 4,473 square-foot 3-story building constructed in 1880. The building is a three-story brick structure and is described in tax records as a downtown row type (with a common wall) design. Historically there were adjoining buildings on both sides of the parcel until 50 Canal Street was demolished due to structural concerns in early 2021. The building occupies the entire parcel footprint and as such there are no outdoor areas such as grass or asphalt or concrete paved parking lot. During the visit the property was unoccupied. The location of the Property is shown on **Figure 1** and surrounding properties and the Property's layout are shown on **Figure 2**. Photographs taken during the site visit are provided in **Appendix A**.

Introduction June 4, 2021

# 2.2 SPECIAL TERMS, CONDITIONS, AND ADDITIONAL ASSUMPTIONS

There were no special terms, conditions, or additional assumptions associated with this Phase I ESA.

#### 2.3 EXCEPTIONS AND LIMITING CONDITIONS

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided and given the schedule and budget constraints established by the County. No other representations, warranties, or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has uncovered all potential and actual liabilities and conditions associated with the Property.

This report provides an evaluation of selected environmental conditions associated with the Property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. There are no assurances regarding the accuracy and completeness of this information received from others.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report and are based solely on the scope of work described in the report, the limited data available, and the results of the work. They are not a certification of the Property's environmental condition.

Stantec did not obtain historical records that document the property history in 5-year intervals, and this resulted in data gaps. Additionally, Stantec could not determine the first developed use of the Property (pre-1884). Although this represents data gaps, these data gaps are not considered to impact the EPs ability to identify RECs unless stated as such. Based on the information obtained during the course of this ESA and general knowledge of development at and near the Property, the absence of this information did not affect the ability of the EP to identify RECs, HRECs, CRECs, or *de minimis* conditions.

This report has been prepared for the exclusive use Wayne County and the WCLB and any use of or reliance on this report by any third party is prohibited, except as may be consented to in writing by Stantec or as required by law. The provision of any such consent is at Stantec's sole and unfettered discretion and will only be authorized pursuant to the conditions of Stantec's standard form reliance letter. Stantec assumes no responsibility for losses, damages, liabilities, or claims, howsoever arising, from third party use of this report.

The conclusions are based on the conditions encountered at the Property by Stantec at the time the work was conducted.

As the purpose of this report is to identify conditions which may pose an environmental risk; the identification of non-environmental risks to structures or people on the Property is beyond the scope of this assessment.

**(2)** 

Introduction June 4, 2021

The findings, observations, and conclusions expressed by Stantec in this report are not an opinion concerning the compliance of any past or present owner or operator of the Property which is the subject of this report with any Federal, state, provincial or local law or regulation.

This report presents professional opinions and findings of a scientific and technical nature. It does not and shall not be construed to offer a legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, regulations or policies of Federal, state, provincial or local governmental agencies. It is recommended that issues raised by the report should be reviewed for Wayne County and the Wayne County Land Bank by its legal counsel.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the Property subsequently change.

#### 2.4 PERSONNEL QUALIFICATIONS

This Phase I ESA was conducted by, or under the supervision of, an individual that meets the ASTM definition of an EP. The credentials of the EP and other key Stantec personnel involved in conducting this Phase I ESA are provided in **Appendix B**.

User-Provided Information June 4, 2021

#### 3.0 USER-PROVIDED INFORMATION

ASTM E1527-13 describes responsibilities of the User to complete certain tasks in connection with the performance of "All Appropriate Inquiries" into the Property. The ASTM standard requires that the EP request information from the User on the results of those tasks because that information can assist in the identification of RECs, CRECs, HRECs, or *de minimis* conditions in connection with the Property. Towards that end, Stantec requested that the User provide the following documents and information:

Description of Information	Provided (Yes / No)	Description and/or Key Findings
User Questionnaire and/or Interview	Yes	The User indicated no knowledge of environmental cleanup liens, activity or land use limitations, past use of chemicals, hazardous substances, or petroleum products on-site, spills, environmental cleanups, or other specialized knowledge or experience.
Environmental Liens or Activity Use Limitations (AULs)	No	See Section 4.4.1.
Previous Environmental Permits or Reports Provided by User	No	The User reportedly does not possess any of these documents.
Purpose of the Phase I ESA	Yes	The purpose of this report is to facilitate tax foreclosure of the Property and assist with Wayne County's Brownfield Evaluation Process.

Stantec forwarded the ASTM recommended User Questionnaire to Ora Rothfuss, a Planner at the Wayne County Planning Department. The completed User Questionnaire returned to us by Mr. Rothfuss is included in **Appendix C**.

Records Review June 4, 2021

#### 4.0 RECORDS REVIEW

The objective of consulting historical sources of information is to develop the history of the Property and surrounding area and evaluate if past uses may have resulted in RECs. Physical setting records are evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from the present back to the first developed use of the Property. Stantec's research included the reasonably ascertainable and useful records described in this section.

#### 4.1 PHYSICAL SETTING

A summary of the physical setting of the Property in the following subsections is based in part on a Physical Setting Report obtained from Environmental Data Resources (EDR) and included in **Appendix D**.

#### 4.1.1 Property Topography and Surface Water Flow

The topography of the Property is generally flat. Review of the United States Geological Survey (USGS) topographic 7.5-minute topographic map, Lyons, New York Quadrangle included in the EDR Report shows that the elevation of the Property is approximately 410 feet above mean sea level and the topography in the vicinity of the Property slopes downward to the southeast towards the Erie Canal, approximately 0.19 miles from the Property. Based on the topography surface water in the area of the Property likely flows overland into adjacent or nearby storm drains.

#### 4.1.2 Regional and Property Geology

According to the U.S. Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Web Soil Survey (WSS), soils on the Property consist of "Cut and fill land" and Palmyra gravelly loam. The Surficial Geologic Map of New York (Cadwell and Muller, 1985) indicates that the Property contains lacustrine silt and clay up to 50 meters thick. The underlying bedrock of the Property and site vicinity is mapped as the Camilus and Syracuse Formations, part of the Akron Dolostone, Cobleskill Limestone, and Saline group, which is characterized by shale with dolostone, gypsum and salt of thickness varying between 700-1,000 ft (Fisher, Isachsen, and Rickard, 1970).

#### 4.1.3 Regional and Property Hydrogeology

The shallow water table is often a subdued expression of surface topography. Shallow groundwater generally flows from areas of groundwater recharge, such as hills and broad uplands, to areas of groundwater discharge, such as wetlands, rivers, and lakes. Based on the local surface topography, local shallow groundwater is expected to flow to the southeast towards the Erie Canal. Based on regional ground surface topography, regional groundwater is expected to flow southeast towards the Erie Canal; however, given the Property's urban setting, it is likely that other man-made features such as wells,

Records Review June 4, 2021

roads, filled areas, buried utility lines and sewers, and drainage ditches may alter the natural shallow groundwater flow direction.

#### 4.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

Stantec obtained an environmental database report from EDR, a third-party environmental database search firm. As there are several properties undergoing Phase I Environmental Site Assessments on Canal Street that are within close proximity one EDR Report (for 42 Canal Street) was obtained to evaluate these sites. The 42 Canal Street site is located west adjacent to the Property. A complete copy of the environmental database report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in **Appendix D**.

Stantec evaluated the information listed within the environmental database report relative to potential impact to the Property, assessing the potential for impacts based in part on the physical setting. As part of this process, inferences have been made regarding the likely groundwater flow direction at or near the Property. As described in Section 4.1.3, the inferred shallow groundwater flow direction is likely to be in the south-southeast. Observations about the Property and surrounding sites made during the Property reconnaissance are provided in more detail in Section 5.

#### 4.2.1 Listings for Property

The Property was identified in the environmental database report for the following:

• EDR Historical Cleaner (EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers.)

According to the EDR report the Property contained a dry cleaner from 1969 to 2008. Dry-cleaning operations of this vintage typically used chlorinated solvents and it is unknown how the chemicals may have been handled and disposed. The presence of a dry cleaner on the Property is a REC for the Property.

#### 4.2.2 Listings for Nearby Sites with Potential to Impact Property

Stantec assessed data presented in the environmental database report to evaluate the potential for conditions on adjacent and nearby sites to pose a REC, CREC, or HREC for the Property. The evaluation included an opinion of the potential for contamination by hazardous substances or petroleum products to migrate to the Property from a nearby site, including by vapor migration or encroachment (i.e., potential for a vapor encroachment condition [VEC]).

Based on this evaluation, the following facilities were identified as the most likely potential sources of impact to the Property. The basis for determining whether each of the following database listings creates a REC for the property is also provided.

Records Review June 4, 2021

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
Kwik Fill Mo345-345 30 Geneva Street	UST / LTANKS / RCRA NONGEN/NLR / FINDS / ECHO / NY Manifest	Adjacent south	YES

The listings for this property are related to the historical use and storage of petroleum/hazardous products by Kwik Fill Mo345-345, a Gasoline Service Station, who reported as a small quantity generator (SQG) in 1991 and as a conditionally exempt small quantity generator in 2003 under the handler ID NYD986955227. The property is also reported as a RCRA Non-Gen (Resource Conservation and Recovery Act Non-Generator, a federal list of facilities that presently do not generate hazardous waste) in at least the years 1999, 2006, and 2007. The waste codes, D001 and D018, indicate that ignitable wastes and benzene were generated at the property.

Three USTs are listed for this site as "pending closed – removed" in 2017.

Spill number 0212797 occurred on 8/27/2003 when soil contaminated with kerosene was discovered as a result of a tank test failure. According to the spill report four drums of contaminated soil was sent off site for disposal and it was noted that no further action was needed. No further information was provided, and the spill was closed.

Spill number 0402579 occurred on 6/9/2004 when approximately 5 gallons of gasoline leaked from the dispenser pump onto the asphalt. According to the spill report the pump was being repaired and that the cleanup was underway. No further information was provided, and the spill was closed.

Spill number 9808599 occurred on 10/10/1998 when a leak from a stuck pump on a tanker truck resulted in a gasoline spill of approximately 5 gallons on to the asphalt. According to the spill report the fire department cleaned up the spill. No further information was provided, and the spill was closed.

Spill number 0504669 occurred on 7/19/2005 as a result of equipment failure, specifically a suction line failure. According to the spill report the fire department cleaned up the spill. No further information was provided, and the spill was closed. The spill file references in place closure of a 10,000-gallon tank in 2010. This spill number is also associated with remedial work which included installation of an air sparge and soil vapor extraction system in 2013. Follow-up groundwater and soil sampling conducted through 2019. Results from this sampling was not included in the EDR report; however, it states that with submittal of the soil and groundwater management plan no further action is required at this time.

Spill number 1606621 occurred on 10/5/2016 as a result of a tank test failure of a 6000-gallon gasoline UST. The tank was removed in April 2017 as part of remedial work completed under spill number 0504669. No further information was provided, and the spill was closed.

Given the proximity of this facility this is a REC for the Property.

Jim's Service Station / 52 Canal	UST / SPILLS / EDR	190± ft/East	NO
St.	HIST AUTO		

According to the EDR report this property was listed as Jim's Service Station from 1989 to 1995 and Pasello Citgo Center between 1992 and 1999. Spill number 9905871 occurred when soil contaminated with gasoline was discovered during a tank removal. According to the spill report 46.81 tons of

**(** 

Records Review June 4, 2021

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
contaminated soil was sent off site for disposal and it was noted that no further action was needed. No further information was provided, and the spill was closed. Given this distance of this site from the Property and assumed cross gradient location it is not a REC.			
Albert J Roedts / Geneva Street & Clyde Road	EDR Hist Auto	150± ft/Southeast	NO
This Property was listed as a gasoline service station between 1969 and 1983. Given the assumed downgradient location of this facility it is not a REC.			

The remaining listings in the environmental database report provided in **Appendix D** do not constitute a REC for the Property.

# 4.3 LOCAL/REGIONAL ENVIRONMENTAL AND HEALTH DEPARTMENT RECORDS

Stantec checked the sources below to obtain information on the Property's use and/or indications of RECS in connection with the Property. Copies of the relevant available records are provided in **Appendix D**.

#### 4.3.1 Local Health Department

Agency Name Contact Information	Finding
Wayne County Health Department Sandy Sloane ssloane@co.wayne.ny.us April 12, 2021	A written request subject to the Freedom of Information Law (FOIL) was submitted to the Wayne County Health Department to review their files regarding the Site (see Appendix E). The information requested included records of waste disposal sites within one mile of the Site, records of the presence, installation, or removal of storage tanks, Department of Health records, special environmental permits and violation records, and current and historical utilities information/drawings/maps (sewer/septic, water, electric), building plans/drawings. As of the date of this report a response has not yet been received.

#### 4.3.2 Town of Lyons

Agency Name Contact Information	Finding
Town of Lyons	Several records concerning the Property were provided by the Town. Key findings are summarized as follows:
Richard Bogan, Code Enforcement Officer	In 2015, a notice of violation and order to comply, was
lyonstownceo@rochester.rr.com	made noting that there were broken windows in need of
April 6, 2021	

Records Review June 4, 2021

repair on the Property which was a violation of the Village of Lyons Municipal Code; Code of NYS 304.13.
In 2016, a notice of violation/order to remedy was made noting falling brick work at the rear of the building in violation of the NYS Property Maintenance Code, Section 304.1, Exterior Structure.

#### 4.3.3 New York State Department of Conservation (NYSDEC)

Agency Name Contact Information	Finding
NYSDEC Online FOIL Request	An electronic FOIL request was submitted through the
System	NYSDEC online server to review its files regarding the
https://www.dec.ny.gov/public/373.html	Property (see <b>Appendix E</b> ). The information requested
nttps://www.dec.ny.gov/pablic/3/3.ntml	included any records kept by Divisions of Air Resources,
	Environmental Permits, Environmental Remediation, Water,
	and Materials Management regarding the Property. No
	responsive records were identified for the Property.

#### 4.4 HISTORICAL RECORDS REVIEW

#### 4.4.1 Land Title Records/Deeds

The Wayne County Assessor's website identifies the current owner as Olga Iliadou, with the most recent deed appearing on page 92821 of deed book 915, and with the Property having been most recently sold on 7/1/2013. The property class is listed as 481 – Attached Row Building. The building is identified in these records as having been constructed in 1880 and having a gross floor area of 4,473 square feet. The lot is generally rectangular with dimensions listed as approximately 71 feet by 21 feet at its longest points.

#### 4.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs provided by EDR for the years 1938, 1954, 1963, 1973, 1981, 1985, 1995, 2006, 2009, 2013, and 2017 which are included in **Appendix F**. The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's key observations for the reviewed historical aerial photographs:

Year	Scale	Observations, Property and Adjoining Properties
1938	1"=500'	The poor resolution of the photograph limits the degree to which features at the Property or adjoining parcels can be discerned.
		<u>Property</u> : A commercial building occupied the entirety of the Property.

Records Review June 4, 2021

Year	Scale	Observations, Property and Adjoining Properties	
		Adjoining North: Canal St., followed by commercial property.	
		Adjoining East: Commercial building.	
		Adjoining South: Commercial building.	
		Adjoining West: Commercial building.	
1954	1"=500'	Property and adjoining properties: Features similar to the previous photo (1938)	
1963	1"=500'	The poor resolution of the photograph limits the degree to which features at the Property or adjoining parcels can be discerned.	
		<u>Property and adjoining properties</u> : Features similar to the previous photo (1954) except the south adjoining property appears to be under construction.	
1973	1"=500'	<u>Property and adjoining properties</u> : Features similar to the previous photo (1963) except that on the south adjoining property there are now several commercial buildings and an apparent gasoline filling station	
		A copy of a portion of the 1973 aerial photograph showing the Property (outlined in red) and the nearby gasoline station (outlined in yellow) is provided below.	

Records Review June 4, 2021

Year	Scale	Observations, Property and Adjoining Properties
1981	1"=1000'	The features of the Property and adjoining parcels cannot be discerned due to the poor resolution of the photograph.
1985	1"=500'	Property and adjacent properties: Features similar to the previous photo (1981).
1995	1"=500'	Property and adjacent properties: Features similar to the previous photo (1985).
2006	1"=500'	<u>Property and adjacent properties</u> : Features similar to the previous photo (1995).
2009	1"=500'	<u>Property and adjacent properties</u> : Features similar to the previous photo (2006).
2013	1"=500'	<u>Property and adjacent properties</u> : Features similar to the previous photo (2009).
2017	1"=500'	Property and adjacent properties: Features similar to the previous photo (2017).

#### 4.4.3 City Directories

Stantec reviewed "reverse" city directories provided by EDR for the years 1980-2017 at approximate 5-year intervals, which are included in **Appendix F**. The following table summarizes Stantec's observations of the reviewed city directory listings:

Subject/Adjoining Property	Year	Listed Occupants
Subject Property: 46 Canal Street	1980-2000	Amico Cleaners & Launderers
	2005-2017	Not Listed
Adjoining North (across Canal	1980	Victor Dematteis/Valcho Pekowf
Street): 37-39/43-47 Canal Street	1984	Della Ann Bannatyne – John Andrews Sr./Vics Grill
	1988	R Flock – XXXX/Chuck Full of Rox
	1992	Nima's II/Not Listed
	1995	Antonio's Nima's, P. Barker, Nima's II/Blue Moon Tavern
	2000	Antonios/Blue Moon Tavern
	2005	Antonios, Nimas of Lyons/Blue Moon Tavern
	2010	Nimas of Lyons/Not Listed
	2014	Studio Thirty Nine, Tony's Pizzeria & BB Inc. – Occupant Unknown/Not Listed
	2017	Alessandros Pizzeria, Studio 39, Tony's Pizzeria & BBQ Inc. – Tracy M. McDaniel's/ The Pour House
Adjoining East: 48-50 Canal Street	1980-2000	Not Listed
Avenue	2005	Downtown Laundry
	2010-2017	Not Listed

Records Review June 4, 2021

Subject/Adjoining Property	Year	Listed Occupants
Adjoining South (across an unnamed road and parking lot): 30 Geneva Street	1980 1984-1988 1992-2014 2017	Busy Bee Stores XXXX Red Apple Kwik Fill
Adjoining West: 42 Canal Street	1980-2017	Not Listed
Note: XXXX is present in the City Directory Records as shown above.		

#### 4.4.4 Historical Fire Insurance Maps

Stantec reviewed historical fire insurance maps provided by EDR for the years 1884, 1989, 1894, 1899, 1904, 1911, 1917, and 1949, which are included in **Appendix F**. The following table summarizes Stantec's observations of the reviewed historical fire insurance maps:

Year	Occupant of Property/Adjoining Sites; Indications of Hazardous Substance or Petroleum Usage
1884	A 3-story building labeled as a Dry Goods store is depcited on the Property facing Canal Street.
	Development of adjacent properties included a three-story grocery to the east, a two-story building labeled as a Dentist, clothing store, and Tailor to the west, vacant to the south with the Erie Canal 43 ft further south, and several small commercial buildings including a barber and a saloon to the north across Canal Street.
1889	The usage of the Property and adjacent properties was similar to the previous map (1884) except that the west adjacent building is now solely labeled a clothing store and the east adjacent building is labeled as a Baby Carriages seller as well as a grocery.
1894	The usage of the Property and the adjacent properties were similar to the previous map (1889).
1899	The usage of the Property and the adjacent properties were similar to the previous map (1894) except that the building on the Property is now labeled a Boots and Shoes store.
1904	The usage of the Property and the adjacent properties were similar to the previous map (1899) except that the building on the Property is now labeled as a stationery store and the building on the west adjacent property is labeled as a General Store and Cigar factory.
1911	The usage of the Property and the adjacent properties were similar to the previous map (1904) except that the Property is labeled as a Variety and the east adjacent property building is labeled as a Wallpaper, Oils and General store.
1917	The usage of the Property and the adjacent properties were similar to the previous map (1911) except that the east adjacent property building is labeled "To Be Post Office".

Records Review June 4, 2021

Year	Occupant of Property/Adjoining Sites; Indications of Hazardous Substance or Petroleum Usage
1949	The three-story building present on the Property is now labeled as a store.  The east adjacent and west adjacent buildings are also labeled as stores. North adjacent, across Canal Street, there are several stores and dwellings. South adjacent the Erie Canal is no longer shown and a gasoline filling station with three gasoline tanks are visible.
	A copy of a portion of the 1949 Sanborn map showing the Property (outlined in red) and the nearby Filling Station (outlined in yellow) is provided below.
	S S REST. 9A' Ag 51 33 33 33 33 33 33 33 33 33 33 33 33 33

#### 4.4.5 Historical Topographic Maps

Stantec reviewed historical topographic maps provided by EDR for the years 1899, 1902, 1943, 1952, 1953, 1976, 1978, and 2013 which are included in **Appendix F**. The Property and site vicinity are shown within an urban area of Sodus with no structures or indicators of environmental concern depicted at the scale of the maps (1:24,000).

#### 4.4.6 Summary of Historical Sources

Based on the available permit records and historical information sources, the Property has been developed with the current structure since 1880 and the documented first use of the Property was commercial specifically as a dry goods store in 1884. The historical and environmental records further

Records Review June 4, 2021

indicate that the Property was used for commercial ventures (labeled as a store) until at least 1949 and that the Property was a dry cleaners from 1969 to 2008. Dry-cleaning operations of this vintage typically used chlorinated solvents and it is unknown how the chemicals may have been handled and disposed. The reported long-term use of the property for dry cleaning is a REC.

A gasoline fueling station has been located south adjacent to the Property at 30 Geneva Street since at least 1949. Five spills were reported between 1998 and 2016. This adjacent gasoline fueling station is a REC for the Property.

Site Reconnaissance June 4, 2021

#### 5.0 SITE RECONNAISSANCE

A visit to the Property and its vicinity was conducted by Steve Campbell on March 25, 2021. Access to the Property was not permitted as this project is part of a tax foreclosure and the owners were not available. Therefore, Stantec conducted the Property visit from road rights-of-way. This did not limit exterior access to view the Property as the building footprint occupies the entire parcel. **Figure 2** provides information about the Property. Photographs collected during the Property visit are included in **Appendix A.** 

#### 5.1 SITE RECONNAISSANCE METHODOLOGY

The site reconnaissance focused on observation of current conditions and observable indications of past uses and conditions of the Property that may indicate the presence of RECs. The reconnaissance of the Property was conducted on foot from immediately adjacent public rights-of-way. Access to the interior of the building on the Property was not provided. Stantec was able to fully view the exterior of the building as the public right of way adjoins the building and there were no access restrictions.

Weather conditions during the site visit were clear and sunny. There were no weather-related Property access restrictions encountered during the site visit.

#### 5.2 GENERAL DESCRIPTION

Property and Area Description:	The Property consists of approximately 0.04 acres of mixed commercial/residential land (Wayne County tax parcel no. 71111-09-138667 located along the south side of Canal Street in a commercial area of the Town of Lyons, New York.
Property Operations.	The Property is currently vacant and has been used for mixed commercial/residential purposes throughout its known history.
Structures, Roads, Other Improvements:	The Property is developed with a three story approximate 4,473 square-foot, brick and mortar building constructed in 1880. The building footprint occupies the entire Property parcel and there are no outdoor or parking areas.
Property Size (acres):	0.04 acres.
Estimated % of Property Covered by Buildings and/or Pavement:	100%
Observed Current Property Use/Operations:	Property is currently vacant.
Observed Evidence of Past Property Use(s):	The Property is abandoned but is located in an area that has been historically commercial. The building had a commercial appearance at ground level with apparent residential (balconies, egress ladders) and/or office space on the upper floors

**(** 

Site Reconnaissance June 4, 2021

Sewage Disposal Method (and age):	The Property's building is connected to the Town of Lyons municipal sewer service.
Potable Water Source:	Town of Lyons Water Department.
Electric Utility:	Rochester Gas and Electric (also provider of natural gas to the Property's building).

#### 5.3 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

The following table summarizes Stantec's observations during the site visit.

Observations	Description/Location
Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14):	None observed.
Drums (≥ 5 gallons):	None observed.
Strong, Pungent, or Noxious Odors:	None observed.
Pools of Liquid:	None observed.
Unidentified Substance Containers:	None observed.
PCB-Containing Equipment:	Access to the interior of the Property's building was not provided.
Other Observed Evidence of Hazardous Substances or Petroleum Products:	None observed.

#### 5.4 INTERIOR OBSERVATIONS

Stantec made the following observations during the site visit of the building interiors at the Property and/or identified the following information during the interview or records review portions of the assessment:

Stantec was not permitted to access the interior of onsite structures. Therefore, Stantec was unable to make the observations during the Property reconnaissance of the building exterior.

#### 5.5 EXTERIOR OBSERVATIONS

Stantec made the following observations during the site visit of exterior areas of the Property and/or identified the following information during the interview or records review portions of the assessment:

Site Reconnaissance June 4, 2021

Observations	Description
On-site Pits, Ponds, or Lagoons:	None observed.
Stained Soil or Pavement:	None observed.
Stressed Vegetation:	None observed.
Waste Streams and Waste Collection Areas:	None observed.
Solid Waste Disposal:	No areas indicative of solid waste disposal were observed.
Potential Areas of Fill Placement:	No mounds, piles, or depressions suggesting the placement of fill material were observed.
Wastewater:	No exterior wastewater discharge was observed.
Stormwater:	Roof drains only.
Wells:	None observed.
Septic Systems:	No indications of a septic system were observed.
Other Exterior Observations:	None.

#### 5.6 UNDERGROUND STORAGE TANKS/STRUCTURES

Existing USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), which would indicate the presence of USTs, was discovered during the site reconnaissance.
Former USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), reports, or other evidence of the former presence of USTs was discovered during this Phase I ESA.
Other Underground Structures:	None observed.

#### 5.7 ABOVEGROUND STORAGE TANKS

Existing ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), which would indicate the presence of ASTs, was discovered during the site reconnaissance.
Former ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), reports, or other evidence of the former presence of ASTs was discovered during this Phase I ESA. No historical evidence of former ASTs. Potential exists for fuel oil tank inside the building.

#### 5.8 ADJOINING PROPERTIES

#### 5.8.1 Current Uses of Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about use and activities on adjacent properties:

Site Reconnaissance June 4, 2021

NORTH	Canal Street followed by commercial storefronts.
EAST	Former commercial/residential building currently vacant.
SOUTH	An unnamed street followed by a former gas station.
WEST	An adjoining vacant mixed/commercial building.

#### 5.8.2 Observed Evidence of Past Uses of Adjoining Properties

Observations of adjacent properties providing indications of past use and activities, if any, are described below.

NORTH	None observed.
EAST	None observed.
SOUTH	None observed.
WEST	None observed.

#### 5.8.3 Pits, Ponds or Lagoons on Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about the presence of pits, ponds and lagoons on adjacent properties:

NORTH	None observed.
EAST	None observed.
SOUTH	Former gas station.
WEST	None observed.

#### 5.9 OBSERVED PHYSICAL SETTING

Topography of the Property and Surrounding Area:	The Property and surrounding area are generally flat with a slight downward slope to the southeast towards the Erie Canal.
--	--

Interviews June 4, 2021

### 6.0 INTERVIEWS

No Property owner or occupant interviews were conducted for this Phase I ESA. Per ASTM standards, interviews were not sought out with neighbors of the Property given the absence of evidence of unauthorized use of the Property.

Evaluation June 4, 2021

#### 7.0 EVALUATION

This section provides a summary of our findings, opinions, and conclusions.

#### 7.1 FINDINGS AND OPINIONS

Information gathered from interviews, reviews of existing data, and a Property inspection was evaluated to determine if RECs are present in connection with the Property. Based on this information, Stantec made the following findings and developed the following opinions:

• Finding: There was a dry cleaner on the Property from at least 1969 to 2008.

<u>Opinion</u>: Dry cleaning operations of this vintage typically used chlorinated solvents and it is unknown how the chemicals may have been handled and disposed. The long-term use of the Property for dry cleaning, is a REC for the Property.

• <u>Finding</u>: There was a service station from at least 1949 with three gasoline tanks and five spills between 1998 and 2016, on the adjacent south property (30 Geneva Street). Reportedly, residual contamination at this site is managed under a soil and groundwater management plan; however, the extent and nature of the residual impacts is unknow.

<u>Opinion</u>: The long-term use of the adjacent south property as a gas station, and documented releases is considered a REC for the Property.

#### 7.2 DATA GAPS

The federal AAI final rule (40 CFR 312.10[a]) and ASTM E1527-13 identify a "data gap" as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the EP or the User. Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

Gap	Discussion
Deletions or Exceptions from Scope of Work Referenced in Section 2:	None
Weather-Related Restrictions to Site Reconnaissance:	None
Facility Access Restrictions to Site Reconnaissance:	Access to the Property was not permitted as this project is part of a tax foreclosure. In general, given the documented long-term use of the Property as a commercial building the potential for interior to contain large quantities of petroleum or hazardous substances other than regulated building materials is considered to be low. However, there is some potential for a heating oil AST to be

Evaluation June 4, 2021

Gap	Discussion
	present as well as small containers of cleaning products and other household hazardous materials
Other Site Reconnaissance Restrictions:	None
Data Gaps from Environmental Records Review:	None
Data Gaps from Historical Records Review:	Stantec did not obtain historical records that document the full history of the Property from its initial development to present in continuous 5-year intervals. Additionally, Stantec could not determine the first developed use of the Property (pre-1884). These gaps in the historical records are considered "data failures" and represent "data gaps" as these terms are defined by ASTM E 1527-13. Based on the information obtained during the course of this ESA and general knowledge of development at and near the Property, the absence of this information did not affect the ability of the Environmental Professionals to identify RECs, HRECs, CRECs, or <i>de minimis</i> conditions.
Data Gaps from Interviews:	The owners were not available as this project is part of a tax foreclosure.
Other Data Gaps:	None

#### 7.3 CONCLUSIONS

The following business environmental risks (BERs) relevant to redevelopment or reuse of the Property were identified during the Phase I ESA:

 Based on the age of the Property's building (circa 1880), lead-based paint and asbestos-containing material (ACM) may be present in the building. A formal hazardous materials survey was not completed as part of the Phase I ESA scope of work.

We have performed this Phase I ESA of the Property in conformance with the scope and limitations of ASTM International (ASTM) Practice E1527-13. Any exceptions to, or deletions from, this practice are described in the Data Gaps section of this report. This assessment has revealed the following evidence of recognized environmental conditions (RECs) in connection with the Property:

- **REC #1:** A former dry cleaner was listed at the Property from at least 1969 to 2008. Dry-cleaning operations of this vintage typically used chlorinated solvents and it is unknown how the chemicals may have been handled and disposed. The long-term use of the Property for dry cleaning is a REC.
- **REC #2:** A gasoline fueling station has been located south at 30 Geneva Street, adjacent to the Property, since at least 1949. This property no longer appears to be in operation. Five spills were reported between 1998 and 2016. This adjacent gasoline fueling station is a REC for the Property.

Evaluation June 4, 2021

Based on the identified RECs and the potential demolition of the building it is recommended that an interior review for potential RECs (post possession) and a regulated building materials survey, pursuant to applicable regulations and professional guidelines, should be conducted. It is also recommended that a Phase II ESA be conducted prior to redevelopment to further evaluate the presence/absence and magnitude of potential impacts including soil vapor intrusion at the Property.

Non-Scope Considerations June 4, 2021

### 8.0 NON-SCOPE CONSIDERATIONS

The scope of work completed was limited solely to those items in the ASTM E1527-13 standard. No ASTM E1527-13 non-scope services were performed as part of this Phase I ESA.

### Jennifer Nair

**Environmental Scientist** 

2 years of experience · New York, New York

Ms. Nair is an Environmental Scientist with degrees in Environmental Science and Earth Sciences. Her experience includes Brownfield Cleanup Program Site Investigation and Remediation.

#### **EDUCATION**

Master of Science in Earth Sciences, Syracuse University, Syracuse, New York, 2018

Bachelor of Science in Environmental Science, Emory University, Atlanta, Georgia, 2014

#### **CERTIFICATIONS & TRAINING**

OSHA 40-hr Hazardous Waste Operations and Emergency Response Training, Newark/Somerset, New Jersey, 2018

American Red Cross Adult First Aid/CPR/AED, New York, New York, 2019

8-Hour HAZWOPER Refresher Training, New York, New York, 2020

OSHA 10-Hour Construction Safety Training, New York, New York, 2019

OSHA 30-Hour Construction Safety and Health Training, New York, New York, 2019

### PROJECT EXPERIENCE

#### **GEOTECHNICAL INVESTIGATIONS**

MS 246K (NYCSCA) | Brooklyn, New York | Environmental Scientist

Ms. Nair assisted with geotechnical drilling oversight at this New York City School Construction Authority (NYCSCA) site. She helped record blow counts for Standard Penetration Test (SPT) N-values, classify soils by their geologic and anthropomorphic characteristics, screen soils for evidence of VOC contamination with a MiniRAE 3000 PID, record observations in boring logs, and collect grab samples for potential laboratory analysis.

#### **BROWNFIELDS**

Brownfield Cleanup Program, Astoria Steel | Astoria Owners LLC | Astoria, Queens, New York | Environmental Scientist

Ms. Nair performed various field and office tasks for this New York State Brownfield Cleanup Program (NYS BCP) site. Office tasks include editing figures, tables, and text within the site's Remedial Action Work Plan (RAWP). In the field, she has conducted groundwater sampling for standard and emerging contaminants (perfluorinated compounds [PFCs], 1,4-dioxane) via the United States Environmental Protection Agency (EPA) Low Stress (Low Flow) Purging and Sampling Procedure, monitoring water quality parameters with a Horiba U-52 flow cell. She has also performed air monitoring in accordance with the New York State Department of Health (NYSDOH) Generic Community Air Monitoring Plan (CAMP), utilizing TSI DustTrak aerosol monitors and MiniRAE 3000 photoionization detectors (PIDs) to evaluate PM-10 particulate levels and Volatile Organic Compound (VOC) concentrations, respectively.

### Canal Street Manufacturing Site | Rochester, New York | Environmental Scientist

Ms. Nair assisted with well development, groundwater sampling and water quality monitoring as part of the Remedial Investigation (RI) at this NYS BCP site. Water quality monitoring was accomplished using a LaMotte 2020we Portable Turbidity Meter and a MYRON 6P Water Quality Tester.

### **EMERGENCY RESPONSE**

ITC Fire Response | Deer Park, Texas | 2019 | Environmental Scientist

Ms. Nair assisted with air monitoring during the benzene recovery operation at the Deer Park Emergency Response in Deer Park, Texas.

### **ENVIRONMENTAL ASSESSMENT**

Confidential Client, Allegany and Madison NY | Environmental Scientist

Ms. Nair prepared site characterization reports to support the planning and development phase of a greenfield utility scale photovoltaic solar facility of approximately 20 megawatts (MW) on approximately 200 acres of private property. In order to identify permitting or regulatory issues, research was conducted to determine and characterize biological resources, aquatic resources including surface water hydrology and wetlands, land use, and cultural/historical resources. Ms. Nair prepared GIS figures to display the relevant research and data.

### Travis Avenue Road Raising | 2019 | Environmental Scientist

Ms. Nair prepared GIS figures with data sourced from the New York State Department of Environmental Conservation (NYSDEC) and the National Wetlands Inventory (NWI) for the Travis Avenue Road Raising Project, which the (New York City Economic Development Corporation) NYCEDC is proposing as part of a Citywide initiative to address resiliency and readiness for long-term sea level rise through strategic localized projects. The proposed improvements at the Travis Avenue project site involve the reconstruction of a 750-linear foot, frequently-flooded section of Travis Avenue, with all work occurring within the existing Travis Avenue right-of-way (R.O.W.).

#### **ENVIRONMENTAL SITE REMEDIATION**

### Melrose Site 62 | Bronx, New York | Environmental Scientist

Ms. Nair helped prepare the environmental investigation report and assisted with soil vapor sampling at this New York City Department of Parks and Recreation (NYCDPR) new park site. She assisted with the oversight of drilling operations to install soil vapor collection points, performed helium tracer tests to evaluate the collection point seals, and conducted soil vapor and ambient air sampling using SUMMA® canisters fitted with flow controllers and vacuum gauges.

# Bushwick Inlet Park - 50 Kent Avenue | Brooklyn, New York | Environmental Scientist

Ms. Nair assisted with preparation of the Excavation Work Plan for the redevelopment of this NYCDPR new park site – a former Manufactured Gas Plant (MGP) that had previously been remediated under an Interim Remedial Measures Work Plan.

# PHASE I & II ENVIRONMENTAL SITE ASSESSMENTS

### Quarry Ballfields | New York, NY | 2019 | Environmental Scientist/Field Staff

Ms. Nair assisted with an environmental subsurface investigation at this site, which is currently operated as a New York City park that contains a baseball field and a soccer field. The New York City Department of Parks and Recreation (NYCDPR) plans to rehabilitate the Quarry Ballfields park by replacing the grass soccer field with synthetic turf, adding new walkways, updating site amenities, and creating a new seating plaza in the southwestern portion of the site along East 181st Street.

### Gateway Estates II Phase 2 Park | New York, NY | 2019 | Environmental Scientist/Field Staff

Ms. Nair assisted with an environmental and geotechnical subsurface investigation, including the collection of soil, soil vapor, and groundwater samples, for a former landfill/illegal dumping ground in Brooklyn slated for redevelopment into a new public park by the New York City Department of Parks and Recreation (NYCDPR). The park development is part of a larger development of a new neighborhood called Gateway Estates.

#### **ENVIRONMENTAL MONITORING**

### Kinder Morgan Bulk Petroleum Terminal | 2019-Present | Environmental Scientist/Field Staff

Ms. Nair assisted with the ongoing remedial investigations at the Kinder Morgan Bulk Petroleum Terminal. She has participated in several different field events at the site. During groundwater monitoring events, she gauged and sampled monitoring wells and implemented of traffic control. During vacout events, she worked with the vac truck operator in order to remove product from monitoring wells at the site.

#### LANDFILL SERVICES

### Victor Insulators | Victor, New York | Environmental Scientist

Ms. Nair assisted with figure and report preparation as part of a long-term groundwater monitoring program for an existing industrial landfill.

### Katie Nelson

Environmental Scientist 9 years of experience · Rochester, New York

Katie is an Environmental Scientist with degrees in Geology and Environmental Science. Her experience includes Phase I and II Environmental Site Assessments, Asbestos Sampling, GIS Mapping, and Brownfield Cleanup Program Site Investigation and Remediation. Katie was selected as a Board Member for the Rochester Environmental Commission as an Environmental Reviewer for the City of Rochester.

#### **EDUCATION**

Master of Science, Environmental Science, Rochester Institute of Technology, Rochester, New York, 2011

Bachelor of Science, Geology, Hobart and William Smith, Geneva, New York, 2009

40-Hour OSHA HAZWOPER Standard, 29 CFR 1910.120, Rochester, New York, 2011

#### REGISTRATIONS

Asbestos Inspector, New York State Department of Labor

Mold Assessment Consultant, New York State Department of Labor

Lead Inspector/Risk Assessor, United States Environmental Protection Agency

### **MEMBERSHIPS**

Commissioner, Rochester Environmental Commission

Member, Women of Wastewater, New York Water Environment Association, Inc.

#### PROJECT EXPERIENCE

#### SITE MANAGEMENT & REMEDIATION

Former Alliance Metal Facility | Gates, New York

Served as the Field Team Leader for the remedial investigation at a state brownfield site. Ms. Nelson took sub slab soil vapor samples and indoor air samples, installed soil borings, bedrock wells and performed two rounds of groundwater sampling.

#### Asbestos Surveys | New York

Has performed several asbestos surveys within the state of New York including commercial buildings and at an academic institution.

### Buckeye Rochester North Terminal | Rochester, New York

Assisted with groundwater sampling as part of a spill remediation program.

### Waste Management, Mt Read Boulevard | Rochester, New York

Oversaw impacted soil excavation and received spill closure from the NYSDEC for a spill that was discovered while Waste Management was installing a new natural gas line at a fleet service facility.

### Genesee Street Supplemental Phase II Environmental Site Assessment | Rochester, New York

Performed field work for a supplemental Phase II Environmental Site Assessment which involved soil sampling, bedrock coring, and groundwater sampling.

### Phase I & II Environmental Site Assessment, Warrensburg Health Center | New York

Performed a Phase I Environmental Site Assessment and limited Phase II Environmental Site Assessment as part of the redevelopment of the Warrensburg Health Center.

### Due Diligence, Industrial Properties | Various Locations, New York

Assisted in reviewing and compiling Phase I Environmental Site Assessments or Desktop reviews for seventeen properties in Northern New York State.

### Phase I Environmental Site Assessments, Various Locations

Prepared Phase I ESA reports for various locations in New York, Pennsylvania and New Jersey.

#### Monroe Avenue Phase II Environmental Site Assessment

Performed a Phase II Environmental Site Assessment involving soil and groundwater sampling at this former woodworking facility.

### Buell Automatics, Inc. Brownfield Cleanup Program | Buell Automatics | New York, United States | USD 594K

Assisted with construction observation services during implementation of Interim Remedial Measures involving soil excavation and off-site disposal, in-situ groundwater treatment; underground injection program; soil and groundwater sampling; and the community air monitoring program.

# Phase I Environmental Site Assessment 67 and 89 Canal Street | Rochester, New York | 2018

Performed Phase I ESA on former manufacturing facility in anticipation of entry into the Brownfield Program.

### Brownfield Cleanup Program, Former Allegany Bitumens Asphalt Plant | Blades Holding Company Inc. | Belmont, New York, United States

Assisted with construction observation services during implementation of Interim Remedial Measures involving soil excavation and off-site disposal, in-situ groundwater treatment; soil and groundwater sampling; and the community air monitoring program.

#### Brownfield Cleanup Program, Ward Street Site | Germanow-Simon Corporation | Rochester, New York, United States

Performed groundwater sampling as port of on Enhanced Reductive Dechlorination program to treat residual groundwater impacts in-situ.

#### Victor Insulators | Victor, New York

Has performed and submitted reports for groundwater sampling at on active industrial landfills part of New York Permit 360 requirements for the past five years.

#### Phase I and II Environmental Site Assessment 40 Scattered Properties, Stadium Estates | Rochester, New York | 2016

Performed Phase I ESA for multiple residential properties located within the JOSANA neighborhood in Rochester NY. Assisted in installing test pits and soil borings as part of a Phase II ESA investigation.

#### Astoria Steel Site | Astoria, Queens, New York

Ms. Nelson served as the Field Team Leader for the Remedial Investigation of a former foundry site in the state Brownfield Cleanup Program and assisted in emergency cleanup measures on the site. Ms. Nelson oversaw the installations of soil borings, overburden monitoring wells, test pits, collected groundwater samples as part this investigation and conducted a hazardous building materials sampling program for PCBs.

### Voluntary Cleanup Program, Rochester Tech Park | Gates, New York | Environmental Scientist

Coordinated and conducted Site Management Plan activities for Building 4 at the Rochester Tech Park. Site Management Plan activities include, observing any subsurface activity and performing community air monitoring as needed, semi-annual groundwater sampling, semi-annual monitoring of existing Sub-Slab Depressurization System and submitting an annual periodic review report to the New York State Department of Environmental Conservation.

#### Charlotte Phase I & II Environmental Site Assessment

Performed a Phase I Environmental Site Assessment at a label manufacturing facility in the Charlotte area in Rochester, NY. A follow up Phase II involved soil and groundwater sampling.

#### Rochester Genesee Transportation Authority

Performed soil and groundwater sampling at a bus garage facility.

### Canandaigua Lake Front Property | Canandaigua, New York

Served as Field Team Leader for Remedial Investigation on the lake front property. Work included installation of soil boring, took surface soil samples, installed overburden wells and sampled groundwater as part of the remedial investigation of a state Brownfield Cleanup Program.

### Hazardous Material Assessments, Various Bridge Projects | New York

Has performed numerous hazardous material assessments, including asbestos and lead paint sampling for bridges located throughout upstate New York.

# ASSESSMENTS, PERMITTING, AND COMPLIANCE

### Town of Brighton - SEQR Consultant | Town of Brighton | Brighton, New York

Assisted the Town of Brighton in reviewing a Draft Scope and Draft Environmental Impact Statement (DEIS).

### National Grid | National Grid | Various Locations, New York

Performs desktop reviews for proposed work on utility lines throughout New York State and prepares applicable permits for work in wetlands or near protected streams.

#### **HEALTH, SAFETY & INDUSTRIAL HYGIENE**

#### Cargill Salt | Ithaca, New York

Performed field work and analysis for a noise dosimetry survey and oil mist air monitoring.

#### Indoor Air Quality/Mold | Various Locations

Performed field work and analysis for several indoor air quality/mold investigations.

#### Particulate Monitoring | Various Industrial Locations

Performed field work and analysis for particulate monitoring at various industrial locations.

#### Cargill Salt | Ithaca, New York

Performed field work and analysis for a noise dosimetry survey and oil mist air monitoring.

### **RESEARCH / LABORATORIES**

#### Woods Hole | Cape Cod, Massachusetts

Performed research on the process of nutrient enrichment in coastal waters and sediment.

#### **PUBLICATIONS**

Threat of predation alters the ability of benthic invertebrates to modify sediment biogeochemistry and benthic microalgal abundance. *Marine Ecology Progress Series*, *Vol. 494*: 29-39, 2013.

### Steven Campbell

Senior Environmental Project Manager 33 years of experience · Rochester, New York

Mr. Campbell has worked in the field of environmental health and safety since 1987. During his career, he has worked as an environmental scientist and a Project Manager in the governmental, consulting, and private sectors.

#### **EDUCATION**

Bachelor of Science, General Science, State University of New York at Brockport, Brockport, New York, 1987

#### **CERTIFICATIONS & TRAINING**

OSHA/Emergency Response Incident Command, Rochester, New York, 2019

US Department of Transportation Hazardous Materials, Rochester, New York, 2019

OSHA 40-Hour Hazardous Waste Site Operations and Emergency Response (HAZWOPER), Rochester, New York. 1989

#### PROJECT EXPERIENCE

#### **HEALTH, SAFETY & INDUSTRIAL HYGIENE**

City of Rochester, Air Testing for Street Maintenance\* | Rochester, New York | Project Manager

Mr. Campbell was responsible for air testing for the City of Rochester to evaluate Permissible Exposure Limits (PELs) for employees that heat asphalt.

### City of Rochester Solid Waste Training and Safety Facility\* | Rochester, New York | Contract manager

Mr. Campbell was responsible for an indoor air quality evaluation for the City of Rochester at the City Solid Waste Training and Safety Facility. The evaluation included air and mold sampling, which was sent to a laboratory for analysis. A report included sampling locations, methodologies, laboratory analysis and recommendations for corrective actions.

#### City of Rochester, Street Maintenance Operations Center, Mt. Read Blvd.\* | Rochester , New York | Project Manager

Mr. Campbell was responsible for indoor air monitoring services at the Street Maintenance Operations Center on Mt. Read Blvd. for the City of Rochester. The air monitoring was to evaluate indoor odor complaints from employees. Monitoring included carbon monoxide and petroleum compounds (diesel hydrocarbons) to determine if emissions from facility vehicles exceeded recommended OSHA concentrations (PELs, STELs, ceilings).

### City of Rochester, West Ave. Facility\* | Rochester, New York | Project Manager

Mr. Campbell was responsible for air monitoring for the City of Rochester at the temporary Water and Lighting Facility on West Avenue. A site walk-through and sampling to identify potential sources of indoor air contaminants was conducted. The sampling consisted of indoor air, floor dust, and a wall sample for mold. This sampling was completed in response to employee complaints about air quality at the facility, which was formerly used as a steel warehouse. The results of the sampling indicated indoor air particulate levels, dust and mold levels were within normal ranges and that air quality may have been affected by recent construction activity at the site. A year later more mold sampling was taken and abatement recommendations were prepared.

# Wegmans Meat Processing Center\* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager for an Indoor Air Quality evaluations and bacteria testing at a major meat processing site in Western New York since 2001. We evaluated the presence of organic growth (fungi, molds, mildew, etc.) and microscopic bacteria (listeria, salmonella and E-coli). The sampling plan recommended sampling locations, analysis types and sampling methods. Considerations for sampling were based on worker health and safety and protection of product quality. Both airborne and surficial samples are taken. Written reports with the findings are prepared and compared to previous data.

### Penn Can Mall\* | Cicero, New York | Project Manager

Mr. Campbell was the Project Manager for an indoor air quality investigation and mold survey for the Penn Can Mall in Cicero, NY. The indoor air quality evaluation was based on qualitative and quantitative data. The qualitative portion of the evaluation consisted of a site walk-through and visual inspection. The quantitative portion involved the use of air monitoring instruments and, in some instances, laboratory analysis. For the mold survey, two types of samples were collected (bio-aerosol air samples and direct contact samples). A report was prepared summarizing the results.

### Regional Traffic Operations Center\* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager for hazardous substance and remedial investigations, including abatement design, for the proposed facility located at the Greater Rochester International Airport. The \$10 million facility was constructed on lands previously used, in part, as an electroplating facility and an above Major Oil Storage Facility. Work tasks include a geophysical survey to determine the location of buried features; soil-vapor surveys; completion of over 60 soil borings, installation of groundwater monitoring wells, sampling, recommendations for design abatement; development of construction abatement drawings; coordination with NYDEC; and environmental construction monitoring.

# ENVIRONMENTAL SITE ASSESSMENTS PHASE I, II, III

### DPW Garage\* | Moroe County, New York | Project Manager

Mr. Campbell was the Project Manager for this remedial investigation and corrective measures project at a Town Department of Public Works (DPW) site. The DPW garage formerly housed three large underground storage tanks that were noted to be leaking upon their removal. Both soils and groundwater were impacted. A biosparging system was designed for the property and was reviewed and approved by the NYSDEC.

#### East Main St.\* | Rochester, New York | Project Engineer

Mr. Campbell was the Project Engineer involved in an expanded Phase I and Phase II Environmental Site Assessment for the armory building and property at 900 East Main Street. Sampling to determine presence of hazardous wastes/hazardous materials was performed. Field activities included a geophysical survey, subsurface soil investigation at 16 locations, surface soil sampling, and dye testing of drainage features to determine if subsurface contamination and/or buried tanks or other features were present. A preliminary plan for necessary remediation of contaminated areas with cost estimates was prepared.

# Emerson Street Landfill Utilities Investigation\* | Rochester, New York | New York | Rochester

Mr. Campbell was the Project Manager for investigation to determine migration of landfill contaminants along utility lines. The project included a detailed historical review of the landfill and material placement locations. He completed all confined space preparation and monitoring.

# Investigation and Cleanup Under Stipulation Agreement\* | Livingston County, New York | Project Manager

Mr. Campbell was the Project Manager for a Phase I ESA that was completed to facilitate the development of a former automobile service facility and gasoline station in Conesus, New York. Phase I findings indicated the presence of four underground storage tanks and an onsite drywell that received waste oil. A Phase II Investigation was completed to determine potential impacts on site soils and groundwater.

### N. Washington St.\* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager for Phase I and Phase II Environmental Site Assessments for the City of Rochester at 64 and 70 North Washington Street. Phase II ESA was needed to complete a geophysical survey to determine where the underground storage tanks were located; to complete soil borings to determine if contaminated soils and/or groundwater were present from the former UST system; to evaluate the integrity and discharge location of the floor sump located in the garage building of 64 N. Washington Street and if the soils associated with the sump have been impacted by activities associated with the former car/truck wash.

#### Rochester Housing Authority Term Agreement\* | Rochester, New York | Contract Manager

Mr. Campbell was the Contract Manager for the term contract ·He provided oversight of all phases of contract management on this term. Projects include asbestos identification, abatement design for asbestos, mold and lead, vapor intrusion and mitigation, structural evaluations, instrument surveys, multi-media environmental testing and environmental cleanup as necessary.

### Route 104, North Greece Road to Veteran's Memorial Bridge\* | Rochester, New york | Project Manager

Mr. Campbell was the Environmental Lead for the environmental services of the reconstruction of 9.5 kilometers of Route 104. Preliminary design included the preparation of a Design Report/ Environmental Assessment, field editing of digitized aerial mapping, asbestos, air quality and environmental assessments, analyzing TSM/TDM measures and preparations for a public hearing.

# Route 252, Route 383 to County Route 102, Henrietta, Brighton and Chili\* | Monroe County, New York | Environmental Project Manager

Mr. Campbell was the Environmental Project Manager for environmental engineering including NEPA and SEQR classifications, identification of wetlands, hazardous waste and asbestos, floodplain management, noise and air analyses, and preparation of a long EAF for the reconstruction of 5.5 miles of NYS Route 252 (Jefferson Road) from CR 102 (Edgewood Avenue) to NYS Route 383 (Scottsville Road) in the Towns of Brighton, Henrietta and Chili, in Monroe County.

# RRS/IFOCV PCB Clean Up, Building 106, Griffiss Air Force Base\* | New York | Project Engineer

Mr. Campbell was the Project Engineer and performed sampling for the removal and disposal of a concrete pad containing PCBs in Building 106.

# RRS/IFOCV, Phase II EBS Building 302\* | Rome , New York | Project Engineer

Mr. Campbell was the Project Engineer involved in a Phase II Environmental Baseline Survey on Rome Research Site's Building #302 located at the former Griffiss Air Force Base. Project included sampling/testing of soils and suspect media. Remediation of asbestos and suspect hazardous waste was also conducted. There were 12 major areas of concern in this building. They included abandoned waste materials, abandoned drywell beneath building, underground cable vault, underground communications vault, storm water catch basin without a concrete bottom, stained soil, existing and former above ground petroleum storage tanks, incinerator cleanout, asbestos and radon. Dye testing, soil sampling for RCRA metals, and swipe samples for PCB analysis were used on this project. A final EBS report was submitted upon completion.

### NYSDEC Inactive Hazardous Waste Disposal Site Phase II Investigations\* | New York | Project Manager

Mr. Campbell was the Project Manager responsible for numerous Phase II investigations under standby contract. Typical responsibilities under this contract included designing and implementing groundwater monitoring programs, interpretation of geophysical data, monitoring site worker health and safety, air monitoring, collection of groundwater, soil, waste and leachate samples and surveying groundwater elevations, sample locations and monitoring wells.

## OGS Environmental Remediation 3 Year Term Contract, Statewide\* | New York | Project Manager

Mr. Campbell was the Project Manager for the projects under this term contract. Services include, but were not limited to: 1) Oversight of petroleum tank removals and installations; 2) Remediation system designs; 3) DEC required reporting to include tank closure reports, spill investigations, remediation option and work plans, O&M reports and SPCC plans; 4) Installation oversight and operations and maintenance of mechanical, biological, and chemical remediation systems. Interaction and correspondence is required with OGS, DEC, tank owner staff and private contractors. The main objective of these services was to provide the State with cost effective environmental clean up and professional design/oversight of construction projects related to petroleum bulk storage.

# Oil Removal at Finger Lakes DDSO, NYSOGS\* | Newark, New York | Project Manager

Mr. Campbell was the Project Manager for the removal of approximately 37,750 gallons of #6 fuel oil from two of four underground storage tanks (USTs) at the Finger Lakes Developmental Disabilities Service Office (DDSO) facility located Newark, New York. Following the oil removal, a subsurface investigation of existing soil and groundwater conditions in the area surrounding the USTs was performed. The subsurface investigation included 13 soil probe locations and installation of one temporary groundwater monitoring well. The tanks' contents were heated first to promote removal of the water/oil. An evaluation of the soil around the tanks after all removal was completed.

### River Road, 100 Acres\* | Tonawanda, New York | Project Manager

Mr. Campbell was the Project Manager for environmental engineering services for 100 acres on River Road in Tonawanda, NY. Phase I and II Environmental Site Assessments (ESA), wetland delineation, preparation of Long Environmental Assessment Form (EAF), wildlife impact assessment, and traffic impact assessment were all completed for the three parcels of wooded land. The owner needed to address potential environmentally significant issues for his proposed development of commercial businesses on the frontage along River Road within the Town of Tonawanda's Local Waterfront Revitalization Zone. The property is adjacent to a former oil terminal. The Phase I and II ESAs were prepared concurrently to expedite the process. Twenty soil borings were required to establish subsurface conditions and evaluate the geotechnical characteristics of site soils. Potential sources of off- and on-site subsurface contamination were evaluated. To complete the Long EAF. Lu Engineers reviewed all relevant site remediation studies, plans, and regulations; consulted with local and state officials to determine applicable regulations, permit requirements and approving agencies; prepared draft Long EAF for review by Town of Tonawanda; prepared Waterfront Assessment Form; prepared supporting studies including traffic analysis and wildlife impact assessment; participated in public review of Long EAF; responded to comments from general public and involved agencies; and revise Long EAF based on comments from Town, involved and interested agencies, and general public.

#### Trinidad Street\* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager responsible for a Phase I / Phase II Environmental Site Assessment (ESA) for the City of Rochester on 3-9 Trinidad Street consisting of a 1.7 acre parcel containing a 6,000 square foot building and paved parking lot. The site had been previously used by an asphalt paving company, a coal company, a lumber yard and more recently as a grocery store. The Phase I ESA uncovered the presence of construction debris, drums, tires and other hazardous materials. The Phase II portion of the project included a geophysical survey, subsurface soil borings, preliminary asbestos survey, preliminary hazardous and non-hazardous waste evaluation with air monitoring, and report preparation with cost estimates for cleanup.

### Watertown International Airport\* | Watertown, Jefferson County, New York | Project Manager

Mr. Campbell was the Project Manager responsible for both a Phase I and Phase II Environmental Site Assessment for Jefferson County at the Watertown International Airport. Geoprobe soil samples were taken in areas by former fuel tanks with documented petroleum spills, the former firefighting training area, the PCB-containing electrical transformers area, and the floor drain system of the vehicle maintenance area. Soils were screened in the field using a photoionization detector. Water samples were also collected from the facility's water supply well to determine if petroleum spills had impacted the groundwater. A report detailing all the findings, and included recommendations, was prepared.

# Sugar Creek Store\* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager responsible for a Phase I and Phase II Environmental Site Assessment at a Sugar Creek store in Rochester, NY. There were several areas on the property where known releases had occurred from petroleum storage tanks. These areas were investigated using a series of GeoProbe borings so that the subsurface conditions could be evaluated to determine the presence of petroleum hydrocarbons and to define the vertical and horizontal extent of impact of any identified material. A report documenting all field work, findings, cost estimates, and conclusions was provided.

### Brownfield Application Assessment\* | Leyden, New York | Project Manager

Mr. Campbell was the Project Manager for a Phase I Environmental Site Assessment for the Town of Leyden at a vacant former Mobil Service Station. He also assisted the Town with preparing a Brownfield application. The project included subsurface sampling, soil vapor testing, well installation, sampling and testing and the removal of a least two underground storage tanks. A geophysical investigation was also conducted to identify unknown abandoned tanks. A report was developed evaluating remedial alternatives and recommendations for the next phase of this Brownfield restoration project.

### Phase I Site Assessments | New York | Project Manager

Mr. Campbell has been a Project Manager and/or performed these Phase I Environmental Site Assessments on thousands of properties over his 30+ year career. Notable projects include: -Champion Products, Perry, New York -Future Bausch & Lomb Headquarters, Rochester, New York -Orchard Whitney Brownfield, Rochester, New York -Crosman Airguns, Bloomfield, New York -Fredrick Douglass Apartments, Rochester, New York -Watertown International Airport, Watertown, New York -RTOC Facility, GRIA -Frontier Field, Rochester, New York -I490 Gateway Project, Rochester, New York -Multiple Autozone Developments, Western New York

#### **SAFETY TRAINING**

#### Safety Training

Mr. Campbell has designed and instructed Environmental Regulatory and Health and Safety Courses since 1988. At EPA he was part of a RCRA team that traveled across the country training Regional and State enforcement inspectors. He provided industrial training courses for the industrial sector for the George Washington University. He has also instructed the following OSHA training: - 40 hour Hazardous waste operations and emergency response -24 hour Emergency Response Technician -8 hour HAZPOWER Refresher

#### **ENVIRONMENTAL SITE REMEDIATION**

## City of Rochester, Brownfield Assistance Program, Term Contract\* | Rochester, New York | Project Manager

Mr. Campbell was responsible for providing environmental investigation services through the City of Rochester's Brownfield Assistance Program (BAP). The BAP provides significant technical and financial assistance to private parties that need to investigate environmental conditions on Brownfield properties. This program is part of the City of Rochester's Brownfield Assessment grant from the United States Environmental Protection Agency (EPA). Therefore, all work performed meets the EPA standards.

### Oil Removal at Finger Lakes Developmental Disabilities Service Office (NYSOGS)\* | NYSOGS | Newark, New York | Project Manager

Mr. Campbell was the Project Manager for the removal of approximately 37,750 gallons of #6 fuel oil from two of four underground storage tanks (USTs) at the Finger Lakes Developmental Disabilities Service Office (DDSO) facility located Newark, New York. Following the oil removal, a subsurface investigation of existing soil and groundwater conditions in the area surrounding the USTs was performed. The subsurface investigation included 13 soil probe locations and installation of one temporary groundwater monitoring well. The tanks' contents were heated first to promote removal of the water/oil. An evaluation of the soil around the tanks after all removal was completed.

# DePaul Properties Environmental Term\* | New York | Contract Manager

Mr. Campbell was the Contract Manager for this term contract which included multiple building (i.e. residential, industrial, and commercial buildings) demolitions. Projects included petroleum tank and contaminated soil removal, asbestos surveys, abatement design, air/project monitoring, PCB caulk surveys, mold, radon and lead paint assessments. Steve has managed over 80 projects (all of which are funded by OCR/HCR) under this term agreement over the last three years. All of these projects involve state funding and as a result, strict compliance with documentation, formatting and budget reports.

### Former Dry Cleaning Facility, Phase I and Phase II\* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager for a Phase I Environmental Site Assessment for an entire city block planned for development by a local builder. Review of City of Rochester Business Directories indicated that a portion of the site was used as a dry cleaner for over 60 years. The installation of monitoring wells was recommended and instituted to determine whether the site groundwater was compromised. For Phase II, developed and implemented large scale hazardous waste site investigation. Soil borings and monitoring wells revealed perchloroethylene and stoddard solvents. Information gathered was used in preparing construction budgets on the site of Bausch & Lomb world headquarters.

# Culvert & Wall Repair or Replacement\* | Various Counties in NYSDOT Region 6, New York | Environmental Project Manager

Mr. Campbell was responsible for soil borings, soil sampling, and report preparation were provided. The purpose of this project was to rehabilitate 14 highway drainage culverts and will provide right-of-way (ROW) mapping for one additional site within Alleghany, Chemung, Steuben, Schuyler, Tioga and Yates Counties.

# Former Frink America property, NYSDEC Environmental Restoration Project Plan\* | Clayton, New York | Project Manager

Mr. Campbell wrote the winning Brownfield Assessment and Cleanup Grant applications totaling \$400,000 for the former Frink America snowplow manufacturing site in Clayton, New York. He also prepared a NYSDEC Environmental Restoration Program (ERP) grant application to secure approximately \$700,000 in additional cleanup funding. When funding was secured, he was also responsible for managing all facets of the project including; workplan development, the identification of the vertical and horizontal extent of contamination, surface soil sampling, soil borings and groundwater monitoring well installations, removal of underground storage tanks, building demolition specifications and contractor selection/oversight, PCB sampling, an RI/FS report, development and implementation of a Work Plan to address known impacted soils and submission of all reports and reimbursement requests. One of the unique aspects of this project was that Mr. Campbell provided applicable OSHA health and safety training to municipal workers who were used to remove and haul contaminated soils at the site. This saved the client over \$500,000 in contractor cleanup costs. The newly developed property now houses a resort hotel, public boat docks, a riverwalk, and a restaurant while creating new park areas and enhanced deep water port space along the St. Lawrence River.

### Former Wilcox Press ERP Investigation and Cleanup\* | Dansville, New York | Contract Manager

Mr. Campbell was the Contract Manager for the remediation that included a geophysical survey, groundwater sampling, surface soil sampling. He provided oversight of asbestos sampling, and a full hazardous materials assessment.

# Grimes Glen Site Closure Plan\* | Village of Naples, Ontario County, New York | Project Manager

Mr. Campbell was the Project Manager for the closure of this site. He worked with Ontario County and the New York State Department of Environmental Conservation (NYSDEC) to develop a landfill closure report to remove soil and solid waste from a former disposal area. The scope of work included the removal of more than 7,000 tons of contaminated soil due to years of illegal dumping at the Site. Mr. Campbell provided oversight of work zone air monitoring, excavation oversight and health and safety oversight for the duration of the project.

### Karenlee Drive\* | Henrietta, New York | Project Manager

Mr. Campbell was the Project Manager responsible for completing and implementing a Work Plan for the former waste water treatment plant at 100 Karenlee Drive in the Town of Henrietta in accordance with the New York State Department of Environmental Conservation (NYSDEC) Voluntary Cleanup Program. Oversight of installation of monitoring wells, the collection of subsurface soil samples during the well installation, the collection of water samples from the installed wells and the collection of surface soil samples was provided. Coordination between NYSDEC and Town of Henrietta was also provided. The information from this project was utilized to determine the extent and concentration of suspected site contamination and its impact on proposed site improvements.

#### Longway's Diner\* | Pamelia, New York | Project Manager

Mr. Campbell was the Project Manager for a Phase II Environmental Site Assessment in Pamelia, NY (near Watertown). He provided oversight of the borings completed by subcontractor, coordinated lab analysis, interpreted analytical results, and prepared a report on the findings. Due to the findings of the Phase II ESA, a Remediation Work Plan to address the petroleum contamination that was discovered on the site was written.

## Manufacturing Facility\* | Ontario County, New York | Project Manager

Mr. Campbell was the Project Manager for multi-phase site characterization (RI/FS) to determine the extent of soil and groundwater TCE contamination. The project was completed under an Administrative Consent Order negotiated between the client and the NYSDEC. Mr. Campbell developed a site specific Health & Safety and Remedial Investigation Work Plan approved by NYSDEC, reviewed TCE storage locations, performed soil gas surveys, and completed test borings, groundwater monitoring well installation/monitoring and residential well sampling. Mr. Campbell was also responsible for generating hydraulic conductivity and flow data from groundwater monitoring wells. Information from this project was used to identify a remedial alternative (soil vapor extraction) for the site.

# RRS/IFOCV Clean Up of Drum and Electrical Equipment Target Area, Stockbridge Facility\* | Rome, New York | Project Engineer

Mr. Campbell was the Project Engineer for the investigation, characterization, securing and clean up of a drum and electrical equipment target area. A total of ten drums at two locations and electrical equipment were sampled for sludge materials and/or liquid wastes containing TCLs or PCB hazardous wastes.

### RRS/IFOCV, Phase II EBS at Building 101\* | Rome, New York | Project Engineer

Mr. Campbell was the Project Engineer involved in a Phase II Environmental Baseline Survey on Building 101 located at the former Griffiss Air Force Base in Rome, NY. Project included sampling and testing of soils, water and other media. Items that were part of the scope included hazardous waste, soil vapor, asbestos, wastewater and air quality. There were 13 areas of concern with this building including former tank testing room, heating trench, USTs, floor drain, underground vault, stored hazardous materials, roof drains and oilstained concrete. Limited remediation was also conducted and a final Environmental Baseline Survey report was submitted.

### Nichol Inn, ERP Brownfield Investigation\* | Steuben County, New York | Project Manager

Mr. Campbell worked with Steuben County at the Nichol Inn property located in the Town of Pulteney, NY to provide a Remedial Investigation/ Alternatives Analysis Report. This report will be relied upon as a basis for making appropriate decisions for site remediation and future development. The Scope of Work also includes an Environmental Assessment and Interim Remedial Measures Work Plan, geophysical survey, asbestos survey, asbestos removal, building demolition and tank removal, a remedial Investigation Implementation, and instrument survey. This project is being completed under the NYSDEC Environmental Restoration Program.

# Orchard-Whitney Brownfield Investigation\* | Rochester, New York | Project Manager

Mr. Campbell wrote the Workplan and was the Contract Manager for environmental services for the Orchard Whitney Brownfield site for the City of Rochester under the NYSDEC Environmental Restoration Program. The work has included extensive hazardous materials inspections, sampling and testing programs, tank removal Remedial Investigation/Interim Remedial Measures, Geophysical Investigation, petroleum-contaminated soil and groundwater remediation. The project also includes a large-scale remedial program and preparation of bid documents for demolition of a seven story industrial building on the site.

# Phase II ESA/Remediation, 71 and 80 N. Main Street\* | Fairport, New York | Project Manager

Mr. Campbell was the Project Manager for Phase II Environmental Site Assessments and remediation services at 71 and 80 North Main Street in Fairport, which was a former petroleum storage facility. The geophysical investigation determined that underground storage tanks or other significant underground metallic features such as piping, hydraulic lifts and reservoirs were present at the site. A proton precession magnetometer was used to take measurements of the earth's magnetic field throughout the suspect areas of the site. Ten locations of subsurface soil sampling were conducted concurrently with the geophysical survey. Soils were screened for the presence of volatile and semi-volatile organic contaminants. A Remediation Work Plan was prepared (including a detailed design of a bio-venting system), installation of the system was completed, and oversight of the operation and maintenance of soil venting system was provided. Once soil concentrations reached acceptable levels, the system was decommissioned.

## Remedial Investigation/Feasibility Study Project\* | Ontario County, New York | Project Manager

Mr. Campbell was the Project Manager for an inactive hazardous waste disposal site investigation and clean-up project conducted under the direction of the NYSDEC BCP. During the work plan preparation stage he was instrumental in negotiation of an Administrative Consent Order with the NYSDEC. Innovative real time investigation techniques saved the client thousands of dollars in laboratory analytical fees. His knowledge of NYSDEC Superfund and RCRA programs enabled the client to propose delisting of a portion of the site and reclassification of another to a lower priority on the state IHWDS list. The remediation program utilized direct oxygen injection to enhance the biodegradation of volatile organic compounds in site soils and groundwater. Mr. Campbell was responsible for ensuring that the system was designed, installed and operated in accordance with NYSDEC requirements and vendor specifications. He was also responsible for overseeing the O&M program for the remediation system and providing periodic updates to NYSDEC.

# Remediation at State Police Barracks, NYS OGS\* | Warsaw, New York | Project Manager

Mr. Campbell was the Project Manager responsible for remediation work and providing recommendations for the property on the NYS Police Troop 2 Barracks on Buffalo Road in Warsaw, NY. Tasks included a utility stakeout, test excavations, excavation and staging of impacted soils, and oversight of removal and disposal of excavated soils. Impacted soils in those areas remain in place to avoid damage to the existing structure, and remedial alternatives were evaluated.

### Sewall's Island, ERP Brownfield Investigation\* | Watertown, New York | Project Manager

Mr. Campbell was the Project Manager in charge of providing the City of Watertown with a Remedial Investigation/ Alternatives Analysis Report (RI/AAR) a site on Sewall's Island in the City of Watertown, New York. The site consists of 11 parcels representing a total of 15.18 acres. The scope of work on this project includes completion of a NYSDEC approved Environmental Assessment and as necessary an Interim Remedial Measures (IRM) Work Plan, a geophysical survey, identification of asbestos containing materials in on-site debris, Remedial Investigation Implementation, completion of an instrument survey, a Remedial Investigation/ Alternatives Analysis Report and conducting public meetings to inform the public of findings and recommendations pursuant to requirements of the ERP program.

# Transit Bus/DPW Storage & Maintenance Facility\* | Watertown, New York | Project Manager

Mr. Campbell was the Project Manager for the inspection and structural testing services for the construction of three buildings at the City of Watertown Transit Bus/DPW Storage and Maintenance facility. The Transit Bus Garage and DPW Storage and Maintenance Facility Project involved the construction of an 8,000-square foot building north of Newell Street and an 18,000-square foot building south of Newell Street in the City of Watertown. Mr. Campbell provided oversight of the building of trenches (for installing new utility lines) and advised them on the removal of the MGP contaminated soils.

#### US Rt. 11 Tompkins St. to Binghamton City Line\* | Broome County, New York | Environmental Project Manager

Mr. Campbell was the Environmental Project Manager for environmental services on roadway, tunnel and pump house on Route 11, Tompkins Street to Binghamton City Line, Broome County, NY. He developed Hazardous Assessment Phase 1 and Phase 2 with Hazardous Waste/Contaminated Screening Assessment Report incorporating analytical results. And asbestos assessment reports with Summary of Concerns for Design Report.

#### Former Ogilive Site, Brownfield Investigation/Clean-up\*

Mr. Campbell was the winning grant writer and Project Manager in charge of providing the City of Watertown with a Remedial Investigation/ Alternatives Analysis Report (RI/AAR) for this site in the City of Watertown, New York. The project included completion of a NYSDEC approved Environmental Assessment followed by site cleanup. The scope of work included a geophysical survey, underground storage tank removals, identification of asbestos containing materials in on-site debris, remedial Investigation implementation, a Remedial Investigation/ Alternatives Analysis Report, impacted soil and hazardous waste removal, groundwater treatment and conducting public meetings to inform the public of findings and recommendations pursuant to requirements of the ERP program.

### West Broad Street Tank Removal\* | Rochester, New York | Project Engineer

Mr. Campbell was the Project Engineer involved in the coordination and oversight of the removal of three underground gasoline storage tanks (USTs) from property on West Broad Street in the City of Rochester, NY. He provided oversight of all field activities including excavation, tank removal and purging/ cleaning, backfilling and site restoration. Two gasoline dispenser pumps and associated underground piping we also removed. Soil sampling was conducted in accordance with applicable NYSDEC protocols.

### XLI Corp, Brownfield Redevelopmen\* | Rochester, New York | Project Manager

Mr. Campbell was Project Manager for a Brownfield redevelopment project for property located within the boundaries of the Emerson Street landfill listed on the NYS List of Inactive Hazardous Waste Disposal Sites. The project included: engineering design with site layout, storm water collection and conveyance along with storm water retention/detention facility; surveying services including base mapping; review of site specific environmental investigations; health and safety plan; and developing a plan for the removal and relocation of landfill materials present. He worked closely with the City of Rochester and the client to provide site development alternatives that satisfy the requirements of the City of Rochester's Brownfield Pilot Program.

#### STORMWATER MANAGEMENT

City of Rochester, Storm Water Management, Solid Waste Management Facility, Colfax St.\* | Rochester, New York | Project Manager

Mr. Campbell was responsible for a Storm Water Management Report for the Solid Waste Management Facility on Colfax Street for the City of Rochester. The report assessed the existing drainage conditions and offered detailed recommendations (with cost estimates) for the management, collection, treatment and discharge of the generated storm water while at the same time addressing the operational needs of the facility and providing an acceptable level of protection to the surrounding environment.

### Durand Beach Watershed\* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager of the preparation of a watershed map in GIS format and a report describing Durand Beach watershed and potential sources of water contamination for the City of Rochester. This project was completed on a quick turnaround basis because the City needed the information in four days to complete a temporary permit application. The map included locations of potential contamination, anticipated future development, existing wastewater discharges, landfills, adjacent land use, major contours, highways, existing land uses within 10,000 feet, and existing wastewater discharges within 10,000 feet of proposed beach. The City also requested that we provide follow-up water sampling and analysis to assist in a beach permit application to try and open Durand Beach to swimmers.

### GRIA, Storm Water Pollution Prevention Plan\* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager for development of a Storm Water Pollution Prevention Plan (SWPPP) for the Greater Rochester International Airport that satisfied both NYSDEC and US EPA requirements and provided a practical working document that established storm water best management practices. Preparation and assessment phases included review of existing practices, inspection of storm water outfalls, sources of contamination, and a review of existing pollution prevention activities associated with the airport. The final SWPPP included a description of necessary training as well as spill response, best management practices, good housekeeping practices, and recommendations for following the plan.

#### **ENVIRONMENTAL HEALTH & SAFETY**

RRS/IFOCV Building 1, Defense Finance and Accounting Service, Griffiss Air Force Base\* | Rome, New York | Project Engineer

Mr. Campbell performed an Indoor Air Quality Investigation including site inspection and laboratory analysis at this site in Rome, NY.

#### Empire Coating\* | Albion, New York | Project Manager

Mr. Campbell was the Project Manager for on-going environmental health and safety compliance assistance for a manufacturing facility. General compliance assistance includes performing inspections, audits of waste management, preparing permits, writing regulatory plans, indoor air sampling and in-house health and safety training.

### MKS\* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager for environmental compliance and health and safety projects.. These included audits of waste treatment facilities, permitting, water and wastewater, hazardous waste, air quality, preparation of regulatory plans, training for in-house personnel, completion of corporate annual audit and day-to-day regulatory compliance assistance.

### Glass Fab, Wastewater Compliance for Lead and Zinc\* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager responsible for providing professional engineering services to assist Glass Fab Inc. in bringing their wastewater discharge back into compliance. There were 30 day CAP and 90 day compliance deadlines. A corrective action plan was developed for high levels of lead and zinc in their wastewater discharge. Abatement actions were developed and highlighted in a letter report to Monroe County DES and he assisted in corrective measures until compliance was achieved.

#### Gleason Works\* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager responsible for on-going environmental projects at this manufacturing facility. Mr. Campbell developed and Integrated Contingency Plan which included a SPCC plan. He also prepared an Emergency Spill Response Plan in accordance with EPA and NYSDEC spill response regulations at this manufacturing facility. For the past several years, Mr. Campbell has also completed Form A and Form R of the existing SARA Title III regulations for Gleason Works. He has also assisted in identifying items at the facility that may be subject to changes in the lead threshold reporting.

### Office of Mental Health Facilities, DASNY\* | Western New York | Project Manager

Mr. Campbell was the Project Manager who provided ongoing health and safety compliance services for Office of Mental Health (OMH) facilities in Western New York. The Scope of Services included completion of written compliance plans for environmental health and safety programs; updating and obtaining environmental permits; assisting with the development of a statewide Environmental Management System (EMS) program; assisting in the development of facility specific compliance checklists to facilitate the EMS program; assisting with waste disposal; consultation on facility specific environmental programs such as fuel tank management, hazardous waste solid waste and universal waste, air emissions, and water discharges; consultation on facility specific health and safety programs such as hazard communication, personal protective equipment use, lockout/ tagout, respiratory protection, confined space entry and others; asbestos, lead based paint, and mold investigation and consulting services. Documents and programs were provided that are consistent at all OMH locations. Also, Mr. Campbell provided training services to support environmental health and safety programs.

#### RRS/IFOCV, B-3\* | Rome, New York | Project Engineer

Mr. Campbell was the Project Engineer involved in this indoor air evaluation project. Research, sampling for volatile organics and testing to determine source of odor complaints and whether chemical contamination was present at Building 3 at the Rome Research Site for the U.S. Air Force was provided. Was able to define the odor problem was a combination of several sources.

# ASBESTOS, LEAD BASED PAINT, AND HAZARDOUS MATERIAL MANAGEMENT

Department of Veterans Affairs Medical Center\* | Canandaigua, New York | Project Engineer

Mr. Campbell was responsible for renovations in Building 1 that required an asbestos survey, collection of samples and an abatement design. Phased removal design was a priority to allow for relocation of personnel in three offices. Abatement design included plan and specification development, as well as, cost estimates during 30%, 60% and 100% design submission stages.

### Monroe Community College\* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager for the hazardous and asbestos assessment project for renovations of seven buildings under the Master Plan for Monroe Community College in Rochester, NY. Mr. Campbell was responsible for an emergency mold inspection and sampling upon discovery of mold in the Student Center.

### NYSDOT Asbestos Term Contract Regions 3, 4, 5, & 6\* | New York | Quality Control Manager

Mr. Campbell is the Quality Control Manager for the NYSDOT Asbestos Term Contract (D030924, D031070)), including report reviews, proposal preparation, budgeting, invoicing, contract administration and client relations.

### Pittsford Library Renovations\* | Pittsford, New York | Project Manager

Mr. Campbell was the Project Manager for the Pittsford Library renovations. This project entailed a Phase I Environmental Site Assessment, asbestos demolition survey, asbestos abatement design services, and a geotechnical investigation. These services were performed on three buildings in the Town of Pittsford for the major expansion of the library. The asbestos abatement design services included development of asbestos design specifications and drawings; development of three specific NYSDOL variances; construction administration services with bidding documents, pre-construction and progress meetings, and review and approval of contractor's submittal package; construction inspection services of air and project monitoring; and final Project Monitoring Report.

# Wayne County Environmental Term Agreement\* | Wayne County, New York | Contract Manager

Mr. Campbell was the Contract Manager for this term contract for the survey and inspection of County-owned buildings (i.e. Department of Motor Vehicles, Wayne County Office Building). Surveys included hazardous materials, ACM, PCBs, lead based paint, mercury-containing light bulbs and oils. The contract was also used to evaluate buildings for the presence of mold.

### **EMERGENCY PLANNING / RESPONSE**

# Department of Veterans Affairs, SPCC Plan\* | Rome and Syracuse, New York | Project Engineer

Mr. Campbell was the Project Engineer for the development of Spill Prevention Control and Countermeasure (SPCC) plan for the Department of Veterans Affairs Medical Center petroleum storage facilities at the Rome Outpatient Clinic in Rome, NY. The scope of work included the review of the existing storage records and registration information and development of a punch list highlighting issues that needed to be addressed to bring the facility into compliance with 40 CFR 112 as revised in July 2002. A list of items required for attachment to the plan was developed. In addition, we surveyed the Syracuse VA Medical Center and provided a written conclusion that determined that a SPCC plan was not required for that site. Separate reports were provided for each of the two sites.

#### SOIL VAPOR INTRUSION ASSESSMENT

### Emerson Street Landfill Soil Vapor Intrusion Project\* | Rochester, New York | Principal-in-Charge

Mr. Campbell was the Principal-in-Charge of the project to assist homeowners and businesses with the evaluation of soil vapors in buildings surrounding the landfill. The work was completed for the City of Rochester and included vapor testing in numerous buildings within the landfill footprint, supervising analytical sub-consultants and report preparation. He provided technical expertise at public meetings.

#### **ENVIRONMENTAL IMPACT ASSESSMENTS**

McKinley Avenue Bridge Rehabilitation NYSDOT Region 9\* | Endicott, New York | Project Engineer

Mr. Campbell was the Project Engineer for environmental services for this bridge rehabilitation project. NEPA checklist was completed and SEQR classification was determined. Screenings and preliminary investigations were performed to determine potential impacts of design alternatives. General ecology, endangered species, and ground water impacts were studied. Assessments were made to determine if noise, air quality or energy analysis were necessary. Asbestos and hazardous wastes reviews and sampling was performed. EPP, ADP, and PS&E were submitted.

#### **MOLD AUDITS**

### New Townhouse Complex, SUNY Geneseo\* | Geneseo, New York | Project Manager

Mr. Campbell was the Project Manager for an indoor air quality evaluation and mold survey for the new townhouse apartment complex at SUNY Geneseo for this DASNY project. The buildings were inspected for moisture and mold by collecting direct contact and air samples. The samples were analyzed for types of mold and general quantification.

# Appendix C USER PROVIDED RECORDS

Project No.: 213414026 C.2

### PHASE I ESA USER'S QUESTIONNAIRE

In order to qualify for protection from land owner liability under CERCLA as an *innocent landowner, bona fide prospective purchaser,* or *contiguous property owner*, ASTM standard practice E1527-13 and the federal AAI rule (40 CFR 312) require that the User of the Phase I ESA report provide certain information (if available) to the Environmental Professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the Environmental Professional may be identified as a "data gap" in the Phase I ESA report.

Please answer the following questions as completely as possible. Attach additional pages as needed. Return the completed questionnaire to Stantec along with the executed Authorization for Services form.

#### **EDR RECOVERED GOVERNMENT ARCHIVES**

#### Exclusive Recovered Govt. Archives

#### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

### Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

#### State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the SWF/LF list, as provided by EDR, and dated 09/30/2020 has revealed that there are 3 SWF/LF sites within approximately 0.5 miles of the target property.

#### State and tribal leaking storage tank lists

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 11/09/2020 has revealed that there are 5 LTANKS sites within approximately 0.5 miles of the target property.

CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 CBS AST site within approximately 0.25 miles of the target property.

#### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 6 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

#### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
NYSEG - LYONS COAL G	GENEVA ST	SSW 1/8 - 1/4 (0.138 mi.)	B24	67

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was

TW 08/08/1999: JM ON SITE. TANKS HAD BEEN REMOVED AND EXCAVATIONS BACKFILLED. THERE IS APPROXIMATELY 30 YARDS OF SOIL ON THE SOUTHSIDE OF THE BUILDING UNDER PLASTIC. AWAITING CLOSURE REPORT. 07/17/2002: NYSDEC RECEIVES TANK CLOSURE AND SITE ASSESSMENT REPORT INCLUDING CONFIRMATORY ANALYTICAL SAMPLING RESULTS. 08/28/2002: NYSDEC RECEIVES DISPOSAL DOCUMENTATION FOR 46.81 TONS OF CONTAMINATED SOIL SENT TO SENECA MEADOWS. NO FURTHER ACTION NEEDED AT THIS TIME BY SPILLS.

08/05/2010: PAPER FILE REMOVED PER FILE RETENTION POLICY."

Remarks: "During a tank removal, caller encountered contaminated soil.

Contamination is believed to have come from the associated tank

piping. "

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This

**EDR ID Number** 

information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/30/2020 Source: EPA
Date Data Arrived at EDR: 01/14/2021 Telephone: N/A

Telephone 206-553-8665

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date Data Arrived at EDR: 01/14/2021 Telephone: N/A

Number of Days to Update: 26 Next Scheduled EDR Contact: 04/12/2021
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/30/2020 Date Data Arrived at EDR: 01/14/2021 Date Made Active in Reports: 02/09/2021

Last EDR Contact: 03/04/2021

Next Scheduled EDR Contact: 04/12/2021 Data Release Frequency: Quarterly

## Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019 Date Data Arrived at EDR: 04/05/2019 Date Made Active in Reports: 05/14/2019

Next Scheduled EDR Contact: 04/12/2021 Data Release Frequency: Varies

## SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/30/2020 Date Data Arrived at EDR: 01/14/2021 Date Made Active in Reports: 02/18/2021

Number of Days to Update: 35

Source: EPA Telephone: 800-424-9346 Last EDR Contact: 03/04/2021

Next Scheduled EDR Contact: 04/26/2021 Data Release Frequency: Quarterly

#### Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/30/2020 Date Data Arrived at EDR: 01/14/2021 Date Made Active in Reports: 02/18/2021

#### Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020

## Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020

Number of Days to Update: 5

Source: Environmental Protection Agency

Telephone: (212) 637-3660 Last EDR Contact: 12/17/2020

Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020

Number of Days to Update: 5

Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation
and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database
includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste
as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate
less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020

Number of Days to Update: 5

Source: Environmental Protection Agency

Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

## Federal institutional controls / engineering controls registries

#### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 02/09/2021 Date Data Arrived at EDR: 02/11/2021 Date Made Active in Reports: 03/22/2021

Number of Days to Update: 39

Source: Department of the Navy Telephone: 843-820-7326 Last EDR Contact: 02/08/2021

Next Scheduled EDR Contact: 05/24/2021 Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/18/2020

Number of Days to Update: 13

Source: Environmental Protection Agency

Telephone: 703-603-0695 Last EDR Contact: 02/23/2021

Next Scheduled EDR Contact: 06/06/2021 Data Release Frequency: Varies

## US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/18/2020

Number of Days to Update: 13

Source: Environmental Protection Agency

Telephone: 703-603-0695 Last EDR Contact: 02/23/2021

Next Scheduled EDR Contact: 06/06/2021

Data Release Frequency: Varies

#### Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous

substances.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/15/2020 Date Made Active in Reports: 12/22/2020

Number of Days to Update: 7

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180 Last EDR Contact: 12/15/2020

Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

## State- and tribal - equivalent CERCLIS

SHWS: Inactive Hazardous Waste Disposal Sites in New York State

Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the

cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 11/09/2020 Date Data Arrived at EDR: 11/11/2020 Date Made Active in Reports: 01/27/2021

Number of Days to Update: 77

Source: Department of Environmental Conservation

Telephone: 518-402-9622 Last EDR Contact: 02/10/2021

Next Scheduled EDR Contact: 05/24/2021 Data Release Frequency: Annually

## State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Facility Register

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 09/30/2020 Date Data Arrived at EDR: 10/30/2020 Date Made Active in Reports: 12/31/2020

Number of Days to Update: 62

Source: Department of Environmental Conservation

Telephone: 518-402-8678 Last EDR Contact: 12/30/2020

Next Scheduled EDR Contact: 04/12/2021 Data Release Frequency: Quarterly

#### State and tribal leaking storage tank lists

INDIAN LUST R10: Leaking Underground Storage Tanks on Indian Land LUSTs on Indian land in Alaska, Idaho, Oregon and Washington.

Date of Government Version: 11/12/2020 Date Data Arrived at EDR: 12/16/2020 Date Made Active in Reports: 03/12/2021

Number of Days to Update: 86

Source: EPA Region 10 Telephone: 206-553-2857 Last EDR Contact: 12/16/2020

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

## State and tribal Brownfields sites

BROWNFIELDS: Brownfields Site List

A Brownfield is any real property where redevelopment or re-use may be complicated by the presence or potential presence of a hazardous waste, petroleum, pollutant, or contaminant.

Date of Government Version: 11/09/2020 Date Data Arrived at EDR: 11/11/2020 Date Made Active in Reports: 01/27/2021

Number of Days to Update: 77

Source: Department of Environmental Conservation

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

#### ADDITIONAL ENVIRONMENTAL RECORDS

## Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

## HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007

Number of Days to Update: 40

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

#### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

#### **USGS TOPOGRAPHIC MAP**

Target Property Map: 5937719 LYONS, NY

Version Date: 2013

West Map: 5938563 NEWARK, NY

Version Date: 2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

#### **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

#### **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

#### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

#### **FEMA FLOOD ZONE**

**NATIONAL WETLAND INVENTORY** 

NWI Quad at Target Property Data Coverage

LYONS YES - refer to the Overview Map and Detail Map

#### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### Site-Specific Hydrogeological Data\*:

Search Radius: 1.25 miles Status: Not found

#### **AQUIFLOW**®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

#### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

#### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

#### **GEOLOGIC AGE IDENTIFICATION**

Era: Paleozoic Category: Stratifed Sequence

System: Silurian

Series: Upper Silurian (Cayugan)

Code: S3 (decoded above as Era, System & Series)

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

#### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: CHENANGO

Soil Surface Texture: gravelly - loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to

excessively drained sands and gravels.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: LOW

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

Soil Layer Information							
Boundary			Classification				
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	8 inches	gravelly - loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 6.00 Min: 0.60	Max: 6.00 Min: 4.50
2	8 inches	30 inches	gravelly - silt loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 6.00 Min: 0.60	Max: 6.00 Min: 4.50
3	30 inches	72 inches	very gravelly - loamy coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILIS, Gravels, Clean Gravels, Well-graded gravel.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 5.10

#### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: channery - silt loam

silt loam

Surficial Soil Types: channery - silt loam

silt loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: very channery - silt loam

stratified silt loam

very gravelly - sand

# LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

#### HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

#### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

#### **GEOLOGIC INFORMATION**

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

#### LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

**Subject:** Freedom of Information Law Request:: W080752-040221

**Body:** 

RE: PUBLIC RECORDS REQUEST of 4/2/2021, Reference # W080752-040221

Date: 04/15/2021

Dear Jennifer Nair.

I write in response to your Freedom of Information Law (FOIL) request seeking:

Divisions of Air Resources, Environmental Permits, Environmental Remediation, Water, and Materials Management (including any records/permits pertaining to air quality, petroleum/chemical bulk storage, spills, solid waste, and/or hazardous waste) for 4 parcels in Lyons, New York (Wayne county):

- 1) Tax ID: 71111-09-136667 (42 Canal Street)
- 2) Tax ID: 71111-09-138667 (46 Canal Street)
- 3) Tax ID: 71111-09-141667 (50 Canal Street)
- 4) Tax ID: 71111-09-157668 (58-66 Canal Street)

Please be advised that a diligent search of the files maintained by DEC produced no responsive records.

If you believe you have been unlawfully denied access to responsive records, you have the right to appeal. Any such appeal must be submitted in writing and within thirty (30) days of the date of this email. Appeals must be directed to:

**FOIL Appeals Officer** Office of General Counsel New York State Department of Environmental Conservation 625 Broadway, 14th Floor Albany, NY 12233-1500

Your FOIL request is now closed. If I can be of further assistance, please contact me at 585 226-5363 and reference FOIL #W080752-040221, or simply reply to this email. Thank you.

Sincerely,

Region 8 FOIL Coordinator

On 4/2/2021 12:56:05 PM, New York DEC Support wrote:

Dear Jennifer:

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 4/2/2021 and given the reference number FOIL #W080752-040221 for tracking purposes. You may expect the Department's response to your request no later than 4/30/2021.

Record Requested: Divisions of Air Resources, Environmental Permits, Environmental Remediation, Water, and Materials Management (including any records/permits pertaining to air quality, petroleum/chemical bulk storage, spills, solid waste, and/or hazardous waste) for 4 parcels in Lyons, New York (Wayne county):

- 1) Tax ID: 71111-09-136667 (42 Canal Street)
- 2) Tax ID: 71111-09-138667 (46 Canal Street)
- 3) Tax ID: 71111-09-141667 (50 Canal Street)
- 4) Tax ID: 71111-09-157668 (58-66 Canal Street)

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

Please note that due to the COVID-19 outbreak, DEC may be experiencing staffing shortages and some records custodians may be working remotely. This may result in a delayed response time to your FOIL request. We appreciate your understanding and cooperation.

Wayne County Brownfield Process - Phase 1 Environmental Site Assessments - FOIL

Request

Hello Mr Bogan,

As part of Wayne County's Brownfield Evaluation Process Stantec is preparing Phase 1 Environmental Sites Assessments for various sites across the county. As part of this process, we are required to check with local municipalities to determine if you have environmental related information which could help with the process.

This is specifically a FOIL request for building permits, fire department records including violations, spill or tank listings, and assessor information for 4 parcels in Lyons, NY (Wayne County):

1) Tax ID 71111-09-136667 (42 Canal Street)

2) Tax ID 71111-09-138667 (46 Canal Street)

3) Tax ID 71111-09-141667 (50 Canal Street)

4) Tax ID 71111-09-157668 (58-66 Canal Street)

If you have any questions, please contact Steve Campbell. Steven.Campbell@stantec.com

Thank You, Jennifer Nair

# Fown of Lyons Building Department

43 Phelps St Lyons, NY 14489 (315)946-6252

# Notice of Violation/Order to Remedy

05/04/16

To: Olga Iliadou 4 Oasis Ln

Rochester, NY

14624

Property Location: 46 Canal St

Tax Map#: 71111-09-138667

Violation#: 2016-0181

Violation Date: 05/03/16

Offense: Exterior walls

# An apparent violation of the Zoning/Building Laws exists on the above property. I observed:

Failing brickwork at the rear of the building, the basement hatchway has a failing / structurally unsound header, hole in door, and is in a generally poor state of repair that can admit rain, surface water, and vermin.

# This is in violation of the law/ordinance specified below and detailed at the end of this notice:

Authority:

NYS Property Maintenance Code

Section:

304.6

Title:

**Exterior Structure** 

Page:

YOU ARE THEREFORE DIRECTED AND ORDERED to comply with the law and to remedy the condition above on or before 06/03/16.

FULL compliance with this order to remedy is required by the date of this order. If the person or entity served with this order to remedy fails to comply in full with this order to remedy, that person or entity will be subject to a fine of not more than \$1,000 per day of violation, or imprisonment not exceeding one year, or both.

Failure to correct the violation noted in this notice / order may result in legal action against you or your establishment as directed by law.

Tom Sawtelle, Code Enforcement Officer

#### Violation Detail:

All exterior walls shall be free from holes, breaks, and loose or rotting materials; and maintained weatherproof and properly surface coated where required to prevent deterioration.

Boarded

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Stantec were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

#### **Limited Permission To Make Copies**

Stantec (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## **EXECUTIVE SUMMARY**

# **DESCRIPTION**

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

#### **RECORD SOURCES**

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

### **RESEARCH SUMMARY**
