Sign-off Sheet and Signatures of Environmental Professionals

This document entitled Phase I Environmental Site Assessment, 58-66 Canal Street, Lyons, New York, was prepared by Stantec Consulting Services Inc. (Stantec) for Wayne County and the Wayne County Land Bank. Any reliance on this document by any third party is strictly prohibited. Any use which a third party makes of this document is the responsibility of such third party. Such third party agrees that Stantec shall not be responsible for costs or damages of any kind, if any, suffered by it or any other third party as a result of decisions made or actions taken based on this document.

All information, conclusions, and recommendations provided by Stantec in this document regarding the Phase I ESA have been prepared under the supervision of and reviewed by the professionals whose signatures appear below.

Author: 

Jennifer Nair
Environmental Scientist

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

58-66 CANAL STREET, LYONS, NEW YORK PHASE I ENVIRONMENTAL SITE ASSESSMENT

Summary
June 1, 2021

1.0 SUMMARY

Stantec Consulting Services Inc. (Stantec) has completed a Phase I Environmental Site Assessment (ESA) for 58-66 Canal Street, Lyons, New York (the “Property”) on behalf of Wayne County and the Wayne County Land Bank (WCLB). The location of the Property is shown on **Figure 1**. The work was funded through a United States Environmental Protection Agency (EPA) Brownfields Assessment Coalition Grant awarded to the Wayne County in 2020 (Cooperative Agreement No. BF- 96240019-0). Eligibility of the Property for use of grant funds was approved by the EPA on March 2, 2021. Access to the Property was not permitted as this project is part of a tax foreclosure and the owners were not available. Therefore, Stantec conducted the Property visit from road rights-of-way. This did not limit exterior access to view the Property as the building footprint occupies the entire parcel. Wayne County and the WCLB are designated as the Users of this report.

Access to the interior of the Property was not permitted as this project is part of a tax foreclosure. In general, given the documented long-term use of the Property as a commercial building the potential for interior to contain large quantities of petroleum or hazardous substances other than regulated building materials is considered to be low. However, there is some potential for a heating oil AST to be present as well as small containers of cleaning products and other household hazardous materials.

The Property consists of approximately 0.09 acres of land identified by the Tax ID 71111-09-157668, which is developed with a three story approximately 3,100 square-foot mixed commercial and residential building constructed in 1900 (according to municipal building records); however, based on historical sanborn maps the building may have been built prior to 1900. The building occupies the entire footprint (0.1 acres) of the Property and as such there are no outdoor areas. During the visit the Property appeared to be unoccupied, but evidence of the former commercial/residential use was observed.

Surrounding lands include parking and commercial areas to the east, Canal Street to the north, and an L shaped parcel, 52-54 Canal Street, which wraps around the Property on the west and south. There is a building located on the 52-54 Canal Street property that is attached to the west side of the subject building on the Property. The land use category for the Property is Residential (Apartment House with 5 or more units).

Based on the available permit records and historical information sources, the Property has been developed with the current on-site structure since 1900. The documented first use of the Property was for retail shops by at least 1884, specifically as a Tinware Shop, a Furnishings Shop, a Drug Store, and a Hats & Caps Shop. The Sanborn records further indicate that the Property was used for commercial ventures (labeled as a store) until at least 1949. The Property is currently vacant but the most recent use of the Property was for apartments.

The following business environmental risks (BERs) relevant to redevelopment or reuse of the Property were identified during the Phase I ESA:

**58-66 CANAL STREET, LYONS, NEW YORK
PHASE I ENVIRONMENTAL SITE ASSESSMENT**

Summary
June 1, 2021

- Based on the age of the Property's building (circa 1900), lead-based paint and asbestos-containing material (ACM) may be present in the building. A formal hazardous materials survey was not completed as part of the Phase I ESA scope of work.

We have performed this Phase I ESA of the Property in conformance with the scope and limitations of ASTM International (ASTM) Practice E1527-13. Any exceptions to, or deletions from, this practice are described in the Data Gaps section of this report. This assessment has revealed the following evidence of recognized environmental conditions (RECs) in connection with the Property:

- **REC #1:** The presence of a service station from at least 1949 until the 1990s on the west adjacent property is a REC for the Property. According to historical maps three gasoline tanks were present in at least 1949 on this adjacent property.
- **REC #2:** The presence of a dry cleaner, on 46 Canal Street, located approximately 178 feet east of the Property from at least 1969 to 2008 is a REC for the Property.

Based on the identified RECs, it is recommended that a Phase II ESA be conducted prior to redevelopment to further evaluate the presence/absence and magnitude of potential impacts at the Property.

Based on the identified RECs and the potential demolition of the building it is recommended that an interior review for potential RECs (post possession) and a regulated building materials survey should be conducted.

The preceding summary is intended for informational purposes only. Reading of the full body of this report is recommended.

Introduction
June 3, 2021

2.0 INTRODUCTION

The objective of this Phase I ESA was to perform an All Appropriate Inquiry (AAI) into the past ownership and uses of the Property as stipulated by the EPA in 40 Code of Federal Regulations (CFR) Part 312 and consistent with good commercial or customary practices specified by the ASTM in “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process,” Designation E1527-13. AAI is the process for evaluating a property’s environmental conditions for the purpose of qualifying for landowner liability protections under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) following final rule of 40 CFR Part 312. The purpose of this Phase I ESA was to identify, to the extent feasible, adverse environmental conditions including RECs of the Property.

The ASTM E1527-13 standard indicates that the purpose of the Phase I ESA is to identify RECs, including historical recognized environmental conditions (HRECs), and controlled recognized environmental conditions (CRECs), that may exist at a property. The term “recognized environmental conditions” means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property:

1. due to any release to the environment;
2. under conditions indicative of a release to the environment; or
3. under conditions that pose a material threat of a future release to the environment.

ASTM E1527-13 defines a “HREC” as a REC that has occurred in connection with a property, but has been addressed to the satisfaction of the applicable regulatory authority and meets current unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a HREC, the environmental professional (EP) must determine whether the past release is a REC when the current Phase I ESA is conducted (e.g., if there has been a change in the regulations). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC.

ASTM E1527-13 defines a “CREC” as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), but with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls).

As defined by ASTM E1527-13, RECs can include hazardous substances or petroleum products present under conditions in compliance with laws if that presence represents a material threat of future release. The presence of hazardous substances or petroleum products is, however, not a REC if that presence is a *de minimis* condition. A “*de minimis* condition” is a condition that generally does not present a material threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

**58-66 CANAL STREET, LYONS, NEW YORK
PHASE I ENVIRONMENTAL SITE ASSESSMENT**

Introduction
June 3, 2021

ASTM E1527-13 also considers the potential for a business environmental risk (BER), defined as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the property, not necessarily limited to those environmental issues required to be investigated by the ASTM standard. Consideration of BERs may involve addressing one or more ASTM non-scope considerations.

This Phase I ESA report was prepared by Stantec under contract with Wayne County and the WCLB and is being performed on behalf of the Wayne County and the WCLB, each designated as the User of this report. The work was funded through a EPA Brownfields Assessment Coalition Grant awarded to the Wayne County in 2020 (Cooperative Agreement No. BF- BF-96240019-0). Eligibility of the Property for use of grant funds was approved by the EPA on March 12, 2020.

The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did not include an assessment for environmental regulatory compliance of any facility ever operated at the Property (past or present), or sampling and analyzing of environmental media. Stantec was not contracted to perform an independent evaluation of the purchase or lease price of the Property and its relationship to current fair market value. The conclusions presented in this Phase I ESA report are professional opinions based on data described herein. The opinions are subject to the limitations described in Section 2.3.

ASTM E1527-13 notes that the availability of record information varies from source to source. The User or EP is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. "Reasonably ascertainable" means:

1. information that is publicly available;
2. information that is obtainable from its source within reasonable time and cost constraints; and,
3. information that is practicably reviewable.

2.1 PROPERTY DESCRIPTION

The Property consists of approximately 0.09 acres of land identified by the Tax ID 71111-09-157668, which is developed with a three story approximately 3,100 square-foot mixed commercial and residential building constructed in 1900. The building occupies the entire footprint (0.1 acres) of the property and as such there are no outdoor areas such as grass or asphalt or concrete paved parking lot. During the visit the property was unoccupied, but evidence of the former commercial/residential use were present. The location of the Property is shown on **Figure 1** and surrounding properties and the Property's layout is shown on **Figure 2**. Photographs taken during the site visit are provided in **Appendix A**.

2.2 SPECIAL TERMS, CONDITIONS, AND ADDITIONAL ASSUMPTIONS

There were no special terms, conditions, or additional assumptions associated with this Phase I ESA.

Introduction
June 3, 2021

2.3 EXCEPTIONS AND LIMITING CONDITIONS

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided and given the schedule and budget constraints established by Wayne County and the WCLB. No other representations, warranties, or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has uncovered all potential and actual liabilities and conditions associated with the Property.

This report provides an evaluation of selected environmental conditions associated with the Property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. There are no assurances regarding the accuracy and completeness of this information received from others.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report and are based solely on the scope of work described in the report, the limited data available, and the results of the work. They are not a certification of the Property's environmental condition.

Stantec did not obtain historical records that document the full history of use and development of the Property in 5-year intervals, and this resulted in data gaps. Although this represents data gaps, these data gaps are not considered to impact the EPs ability to identify RECs unless stated as such. Based on the information obtained during the course of this ESA and general knowledge of development at and near the Property, the absence of this information did not affect the ability of the EP to identify RECs, HRECs, CRECs, or *de minimis* conditions.

This report has been prepared for the exclusive use Wayne County and the WCLB and any use of or reliance on this report by any third party is prohibited, except as may be consented to in writing by Stantec or as required by law. The provision of any such consent is at Stantec's sole and unfettered discretion and will only be authorized pursuant to the conditions of Stantec's standard form reliance letter. Stantec assumes no responsibility for losses, damages, liabilities, or claims, howsoever arising, from third party use of this report.

The conclusions are based on the conditions encountered at the Property by Stantec at the time the work was conducted.

As the purpose of this report is to identify conditions which may pose an environmental risk; the identification of non-environmental risks to structures or people on the Property is beyond the scope of this assessment.

The findings, observations, and conclusions expressed by Stantec in this report are not an opinion concerning the compliance of any past or present owner or operator of the Property which is the subject of this report with any Federal, state, provincial or local law or regulation.

This report presents professional opinions and findings of a scientific and technical nature. It does not and shall not be construed to offer a legal opinion or representations as to the requirements of, nor

**58-66 CANAL STREET, LYONS, NEW YORK
PHASE I ENVIRONMENTAL SITE ASSESSMENT**

Introduction
June 3, 2021

compliance with, environmental laws, rules, regulations or policies of Federal, state, provincial or local governmental agencies. It is recommended that issues raised by the report should be reviewed for Wayne County and the Wayne County Land Bank by their legal counsel.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the Property subsequently change.

2.4 PERSONNEL QUALIFICATIONS

This Phase I ESA was conducted by, or under the supervision of, an individual that meets the ASTM definition of an EP. The credentials of the EP and other key Stantec personnel involved in conducting this Phase I ESA are provided in **Appendix B**.

58-66 CANAL STREET, LYONS, NEW YORK
PHASE I ENVIRONMENTAL SITE ASSESSMENT

User-Provided Information
June 3, 2021

3.0 USER-PROVIDED INFORMATION

ASTM E1527-13 describes responsibilities of the User to complete certain tasks in connection with the performance of “All Appropriate Inquiries” into the Property. The ASTM standard requires that the EP request information from the User on the results of those tasks because that information can assist in the identification of RECs, CRECs, HRECs, or *de minimis* conditions in connection with the Property. Towards that end, Stantec requested that the User provide the following documents and information:

Description of Information	Provided (Yes / No)	Description and/or Key Findings
User Questionnaire and/or Interview	Yes	The User indicated no knowledge of environmental cleanup liens, activity or land use limitations, past use of chemicals, hazardous substances, or petroleum products on-site, spills, environmental cleanups, or other specialized knowledge or experience.
Environmental Liens or Activity Use Limitations (AULs)	No	See Section 4.4.1.
Previous Environmental Permits or Reports Provided by User	No	The User reportedly does not possess any of these documents.
Purpose of the Phase I ESA	Yes	The purpose of this report is to facilitate tax foreclosure of the Property and assist with Wayne County’s Brownfield Evaluation Process.

Stantec forwarded the ASTM recommended User Questionnaire to Ora Rothfuss, a Planner at the Wayne County Planning Department. The completed User Questionnaire returned to us by Mr. Rothfuss is included in **Appendix C**.

Records Review
June 3, 2021

4.0 RECORDS REVIEW

The objective of consulting historical sources of information is to develop the history of the Property and surrounding area and evaluate if past uses may have resulted in RECs. Physical setting records are evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from the present back to the first developed use of the Property. Stantec's research included the reasonably ascertainable and useful records described in this section.

4.1 PHYSICAL SETTING

A summary of the physical setting of the Property in the following subsections is based in part on a Physical Setting Report obtained from Environmental Data Resources (EDR) and included in **Appendix D**.

4.1.1 Property Topography and Surface Water Flow

The topography of the Property is generally flat. Review of the United States Geological Survey (USGS) topographic 7.5-minute topographic map, Lyons, New York Quadrangle included in the EDR Report shows that the elevation of the Property is approximately 410 feet above mean sea level and the topography in the vicinity of the Property slopes downward to the southeast towards the Erie Canal, which is located approximately 0.19 miles from the Property. Based on the topography and the fact that the subject building encompasses the entire Property, surface water on the Property likely flows overland into adjacent or nearby storm drains.

4.1.2 Regional and Property Geology

According to the U.S. Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Web Soil Survey (WSS), soils on the Property consist of "Cut and fill land" and Palmyra Gravelly Loam. The Surficial Geologic Map of New York (Cadwell and Muller, 1985) indicates that the Property contains lacustrine silt and clay up to 50 meters thick. The underlying bedrock of the Property and site vicinity is mapped as the Camilus and Syracuse Formations, part of the Akron Dolostone, Cobleskill Limestone, and Saline Group, which is characterized by shale with dolostone, gypsum and salt of thickness varying between 700-1000 ft (Fisher, Isachsen, and Rickard, 1970).

4.1.3 Regional and Property Hydrogeology

The shallow water table is often a subdued expression of surface topography. Shallow groundwater generally flows from areas of groundwater recharge, such as hills and broad uplands, to areas of groundwater discharge, such as wetlands, rivers, and lakes. Based on the local surface topography, local shallow groundwater is expected to flow to the southeast towards the Erie Canal. Other man-made

**58-66 CANAL STREET, LYONS, NEW YORK
PHASE I ENVIRONMENTAL SITE ASSESSMENT**

Records Review
June 3, 2021

features such as wells, roads, filled areas, buried utility lines and sewers, and drainage ditches may alter the natural shallow groundwater flow direction.

4.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

Stantec obtained an environmental database report from EDR, a third-party environmental database search firm. As there are several properties undergoing Phase I Environmental Site Assessments on Canal Street that are within close proximity one EDR Report (for 42 Canal Street) was obtained to evaluate these sites. The 42 Canal Street site is located < 200 feet west of the Property. A complete copy of the environmental database report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in **Appendix D**.

Stantec evaluated the information listed within the environmental database report relative to potential impact to the Property, assessing the potential for impacts based in part on the physical setting. As part of this process, inferences have been made regarding the likely groundwater flow direction at or near the Property. As described in Section 4.1.3, the inferred shallow groundwater flow direction is likely to be to the south-southeast. Observations about the Property and surrounding sites made during the Property reconnaissance are provided in more detail in Section 5.

4.2.1 Listings for Property

The Property was not identified in the environmental database report.

4.2.2 Listings for Nearby Sites with Potential to Impact Property

Stantec assessed data presented in the environmental database report to evaluate the potential for conditions on adjacent and nearby sites to pose a REC, CREC, or HREC for the Property. The evaluation included an opinion of the potential for contamination by hazardous substances or petroleum products to migrate to the Property from a nearby site, including by vapor migration or encroachment (i.e., potential for a vapor encroachment condition [VEC]).

Based on this evaluation, the following facilities were identified as the most likely potential sources of impact to the Property. The basis for determining whether each of the following database listings creates a REC for the property is also provided.

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
Jim's Service Station / 52 Canal St.	UST / SPILLS / EDR HIST AUTO	Adjacent East	YES
According to the EDR report this property was listed as Jim's Service Station from 1989 to 1995 and Pasello Citgo Center between 1992 and 1999. Spill number 9905871 occurred when soil contaminated with gasoline was discovered during a tank removal. According to the spill report 46.81 tons of contaminated soil was sent off site for disposal and it was noted that no further action was needed. No			

**58-66 CANAL STREET, LYONS, NEW YORK
PHASE I ENVIRONMENTAL SITE ASSESSMENT**

Records Review
June 3, 2021

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
further information was provided or results from confirmatory soil sample were provided, and the spill was closed. According to New York State Department of Environmental Conservation (NYSDEC) bulk petroleum storage database there were four underground storages tanks (USTs) that were closed and removed in 1999. Given the proximity of this facility it is a REC.			
Amico Cleaners / 46 Canal St.	EDR Historical Cleaner	178± ft/East	YES
According to the EDR report this property contained a dry cleaner from 1969 to 2008. Dry cleaners typically use and store chlorinated solvents. Given the proximity of this facility it is a REC for the Property.			
Albert J Roedts / Geneva Street & Clyde Road	EDR Hist Auto	175± ft/South	NO
This Property was listed as a gasoline service station between 1969 and 1983. Given the assumed downgradient location of this Property it is not a REC.			
Kwik Fill Mo 345-345 30 Geneva Street	UST / LTANKS / RCRA NONGEN/NLR / FINDS / ECHO / NY Manifest	240± ft/Southwest	NO
The listings for this property are related to the historical use and storage of petroleum/hazardous products by Kwik Fill Mo345-345, a Gasoline Service Station, was listed as a small quantity generator (SQG) in 1991 and as a conditionally exempt small quantity generator in 2003 under the handler ID NYD986955227. The property is also reported as a RCRA Non-Gen (Resource Conservation and Recovery Act Non-Generator, a federal list of facilities that presently do not generate hazardous waste) in at least the years 1999, 2006, and 2007. The waste codes, D001 and D018, indicate that ignitable wastes and benzene were generated at the property. Spill number 0212797 occurred on 8/27/2003 when soil contaminated with kerosene was discovered as a result of a tank test failure. According to the spill report 4 drums of contaminated soil was sent off site for disposal and it was noted that no further action was needed. No further information was provided, and the spill was closed. Spill number 0402579 occurred on 6/9/2004 when approximately 5 gallons of gasoline leaked from the dispenser pump onto the asphalt. According to the spill report the pump was being repaired and that the cleanup was underway. No further information was provided, and the spill was closed. Spill number 9808599 occurred on 10/10/1998 when a leak from a stuck pump on a tanker truck resulted in a gasoline spill of approximately 5 gallons on to the asphalt. According to the spill report the fire department cleaned up the spill. No further information was provided, and the spill was closed. Spill number 0504669 occurred on 7/19/2005 as a result of equipment failure, specifically a suction line failure. when a leak from a stuck pump on a tanker truck resulted in a gasoline spill of approximately 5 gallons on to the asphalt. According to the spill report the fire department cleaned up the spill. No further information was provided, and the spill was closed. This spill number is also associated with

PHASE I ENVIRONMENTAL SITE ASSESSMENT**

Records Review
June 3, 2021

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
remedial work beginning in 2011 with tank closures and groundwater and soil sampling conducted through 2019.			
Spill number 1606621 occurred on 10/5/2016 as a result of a tank test failure of a 6000-gallon gasoline UST. The tank was removed in April 2017 as part of remedial work completed under spill number 0504669. No further information was provided, and the spill was closed.			
Given the proximity and assumed cross-gradient location of this facility this is a not a REC for the Property.			

The remaining listings in the environmental database report provided in **Appendix D** do not constitute a REC for the Property.

4.3 LOCAL/REGIONAL ENVIRONMENTAL AND HEALTH DEPARTMENT RECORDS

Stantec checked the sources below to obtain information on the Property's use and/or indications of RECs in connection with the Property. Copies of the relevant available records are provided in **Appendix E**.

4.3.1 Local Health Department

Agency Name Contact Information	Finding
Wayne County Health Department Sandy Sloane ssloane@co.wayne.ny.us April 12, 2021	A written request subject to the Freedom of Information Law (FOIL) was submitted to the Wayne County Health Department to review their files regarding the Site (see Appendix E). The information requested included records of waste disposal sites within one mile of the Site, records of the presence, installation, or removal of storage tanks, Department of Health records, special environmental permits and violation records, and current and historical utilities information/drawings/maps (sewer/septic, water, electric), building plans/drawings. As of the date of this report a response has not yet been received.

4.3.2 Town of Lyons

Agency Name Contact Information	Finding
Town of Lyons Richard Bogan, Code Enforcement Officer lyonstownceo@rochester.rr.com	Several records concerning the Property were provided by the Town. Key findings are summarized as follows:

**58-66 CANAL STREET, LYONS, NEW YORK
PHASE I ENVIRONMENTAL SITE ASSESSMENT**

Records Review
June 3, 2021

April 6, 2021	• In 2007, a building permit was issued permitting the installation of a new store front, specifically for 60-62 Canal Street. • In 2015, an order to vacate was issued for the Property from the Village & Town of Lyons Code Enforcement Office. The structure was in violation of Section 107 of the Property Maintenance Code and the Fire Code of NY and the structure was designated an unsafe structure. • In 2016, a notice of violation/order to remedy, was made noting that there were unsecured areas of the vacant buildings including open/unsecured windows which was a violation of the NYS Property Maintenance Code Section 301.3, Title General. • In 2016, an inspection was conducted at the Property which noted that the building was still vacant. • In 2016, a permit application was submitted which detailed that the proposed use of the Property was as a Rental.
---------------	--

4.3.3 New York State Department of Environmental Conservation (NYSDEC)

Agency Name Contact Information	Finding
NYSDEC Online FOIL Request System https://www.dec.ny.gov/public/373.html	An electronic FOIL request was submitted through the NYSDEC online server to review its files regarding the Property (see Appendix E). The information requested included any records kept by Divisions of Air Resources, Environmental Permits, Environmental Remediation, Water, and Materials Management regarding the Property. No responsive records were identified for the Property.

4.4 HISTORICAL RECORDS REVIEW

4.4.1 Land Title Records/Deeds

The Wayne County Assessor's website identifies the current owner as being WEM Property LLC, with the most recent deed appearing on page 94664 of deed book 912, and with the Property having been most recently sold on 12/30/2010. The property class is listed as 411 – Apartment. The building is identified in these records as having been constructed in 1900 and having a gross floor area of 11,073 square feet. The lot is generally square and dimensions are listed as 71.87 feet by 58.64 feet at its longest points.

4.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs provided by EDR for the years 1938, 1954, 1963, 1973, 1981, 1985, 1995, 2006, 2009, 2013, and 2017 which are included in **Appendix F**. The general type of

**58-66 CANAL STREET, LYONS, NEW YORK
PHASE I ENVIRONMENTAL SITE ASSESSMENT**

Records Review
June 3, 2021

activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's key observations for the reviewed historical aerial photographs:

Year	Scale	Observations, Property and Adjoining Properties
1938	1"=500'	The poor resolution of the photograph limits the degree to which features at the Property or adjoining parcels can be discerned. <u>Property</u>: A commercial building occupied the entirety of the Property. <u>Adjoining North</u>: Canal St., followed by a commercial building. <u>Adjoining East</u>: Commercial building. <u>Adjoining South</u>: Commercial building. <u>Adjoining West</u>: Geneva Street, followed by a commercial building.
1954	1"=500'	<u>Property and adjoining properties</u> : Features are similar to the previous photo (1938)
1963	1"=500'	The poor resolution of the photograph limits the degree to which features at the Property or adjoining parcels can be discerned. <u>Property and adjoining properties</u>: Features similar to the previous photo (1954) except that the west adjoining property is vacant.
1973	1"=500'	<u>Property and adjoining properties</u> : Features are similar to the previous photo (1963) except that a small building is now visible on the west adjoining property and is connected to the on-site building.
1981	1"=500'	The features of the Property and adjoining parcels cannot be discerned due to the poor resolution of the photograph.
1985	1"=500'	<u>Property and adjacent properties</u> : Features are similar to the previous photo (1981).
1995	1"=500'	<u>Property and adjacent properties</u> : Features are similar to the previous photo (1985).
2006	1"=500'	<u>Property and adjacent properties</u> : Features are similar to the previous photo (1995).
2009	1"=500'	<u>Property and adjacent properties</u> : Features are similar to the previous photo (2006).
2013	1"=500'	<u>Property and adjacent properties</u> : Features are similar to the previous photo (2009).
2017	1"=500'	<u>Property and adjacent properties</u> : Features are similar to the previous photo (2017).

4.4.3 City Directories

Stantec reviewed “reverse” city directories provided by EDR for the years 1980-2017 at approximate 5-year intervals, which are included in **Appendix F**. The following table summarizes Stantec’s observations of the reviewed city directory listings:

Subject/Adjoining Property	Year	Listed Occupants
Subject Property: 58-66 Canal Street	1980	Not Listed
	1984	Isabelle Schreib, XXXX, XXXX
	1988	Arthur Farnsworth, XXXX, D Bell, XXXX
	1992	K Williamson, Helen Lester
	1995	Elizabeth Burton
	2000	Occupant Unknown, Occupant Unknown, Carrie H Warren
	2005	Ohnja I Olomonsai, Joseph Savage, Occupant Unknown, Mary J Ellsworth, Richard Keukelaar, Kenneth Morales, Lena M Odell, Terrance Rooks
	2010	Patricia Bishop, Daniel Crandall, Joseph Savage, Occupant Unknown, Rita Besaw, P Derr, Ashley Keeling, Terrence Rooks
	2014	Daniel Crandall, Occupant Unknown, Occupant Unknown, Kami Everitt, Michael A Ferrell Jr., Keith Graham, Cheistina Hayes, Robert Jenkins, Joseph Lampley, Candy A Zanders
	2017	Leon Stanley, Keith Graham, Christina Hayes
Adjoining North (Across Canal Street): 49-51/57 Canal Street	1980-2017	Not Listed
Adjoining West and South: 52-54 Canal Street Avenue	1980-2017	Not Listed
Adjoining East: 78 Canal Street	1980-1984	Not Listed
	1988-1995	Stavros Konstantinou
	2000	Dadas Restaurant
	2005	Konstino Restaurant
	2010	Not Listed
	2014	Meg N Rosies
	2017	Not Listed
Note: “XXXX” is depicted in the city directory images for these addresses.		

4.4.4 Historical Fire Insurance Maps

Stantec reviewed historical fire insurance maps provided by EDR for the years 1884, 1889, 1894, 1899, 1904, 1911, 1917, and 1949, which are included in **Appendix F**. The following table summarizes Stantec’s observations of the reviewed historical fire insurance maps:

**58-66 CANAL STREET, LYONS, NEW YORK
PHASE I ENVIRONMENTAL SITE ASSESSMENT**

Records Review
June 3, 2021

Year	Occupant of Property/Adjoining Sites; Indications of Hazardous Substance or Petroleum Usage
1884	The Property's address is 44-50 Canal Street and is developed with a large three-story building divided into four separate spaces which include a Tinware Shop, a Furnishings Shop, a Drugs and a Hats & Caps Shop. The Erie Canal was historically located immediately south of the Property. Development of adjacent properties included a three-story Hardware Store to the east, a 4-story building labeled as a Grocer to the west across Geneva Street and a small two-story commercial building, labeled as Sausage to the north across Canal Street.
1889	The usage of the Property and adjacent properties was similar to the previous map (1884) except 44 Canal Street (previously a tin shop) is now labeled as a hardware shop and tin shop. The hardware shop continuous onto the adjacent parcel located west of the Property at 42 Canal Street (currently 52 Canal Street).
1894	The usage of the Property and the adjacent properties were similar to the previous map (1889).
1899	The usage of the Property and the adjacent properties were similar to the previous map (1894).
1904	The usage of the Property and the adjacent properties were similar to the previous map (1899) except that for the Property the address which was previously 46 Canal Street is now 56 Canal Street, labeled a Stationary store, and the address which was previously 48 Canal Street is now 58, labeled a Grocery.
1911	The usage of the Property and the adjacent properties were similar to the previous map (1904) except that the western most address composing the Property is joined with the west adjacent property, labeled Tin Shop and Paints & Oils and the easternmost address composing the Property is vacant. The east adjacent property is now labeled Storage.
1917	The usage of the Property and the adjacent properties were similar to the previous map (1911) adjacent property building is labeled "To Be Post Office".
1949	A building which is subdivided into three shops is depicted on the Property. A gasoline filling station and three gas tanks are depicted on 52 Canal Street located immediately west of the Property. The Erie Canal is no longer located adjacent to the southern portion of the Property. North adjacent, across Canal Street, there are several stores and dwellings. Additional gasoline filling stations with gasoline tanks are visible south of the Property across Clyde Street and southwest of the Property across the Clyde Street and Geneva Street intersection. A restaurant with two gasoline tanks and an auto sales and service building with two gasoline tanks are depicted southeast of the Property across Clyde Avenue. A copy of a portion of the 1949 aerial photograph showing the Property (outlined in red) and the nearby Gas Station (outlined in yellow) is provided below.

Records Review
June 3, 2021

Year	Occupant of Property/Adjoining Sites; Indications of Hazardous Substance or Petroleum Usage
	

4.4.5 Historical Topographic Maps

Stantec reviewed historical topographic maps provided by EDR for the years 1899, 1902, 1943, 1952, 1953, 1976, 1978, and 2013, which are included in **Appendix F**. The Property and site vicinity are shown within an urban area of Sodus with no structures or indicators of environmental concern depicted at the scale of the maps (1:24,000).

4.4.6 Summary of Historical Sources

Based on the available permit records and historical information sources, was the Property has been developed with the current structure since 1900 and the documented first use of the Property was in 1884 (the Property may have been developed before this time) and was commercial specifically as a Tinware Shop, a Furnishings Shop, a Drug Store, and a Hats & Caps Shop. The Sanborn records further indicate that the Property was used for commercial ventures (labeled as a store) between 1884 and 1949. The Property is currently vacant but the most recent use of the Property was for apartments.

The presence of a service station from at least 1949 until the 1990s on the west adjacent property is a REC for the Property. According to historical maps three gasoline tanks were present in at least 1949 on this adjacent property.

Site Reconnaissance
June 3, 2021

5.0 SITE RECONNAISSANCE

A visit to the Property and its vicinity was conducted by Steve Campbell on March 25, 2021. Access to the Property was not permitted as this project is part of a tax foreclosure and the owners were not available. Therefore, Stantec conducted the Property visit from road rights-of-way. This did not limit exterior access to view the Property as the building footprint occupies the entire parcel. Figure 2 provides information about the Property. Photographs collected during the Property visit are included in **Appendix A**.

5.1 SITE RECONNAISSANCE METHODOLOGY

The site reconnaissance focused on observation of current conditions and observable indications of past uses and conditions of the Property that may indicate the presence of RECs. The reconnaissance of the Property was conducted on foot from immediately adjacent public rights-of-way. Access to the interior of the building on the Property was not provided. Stantec was able to fully view the exterior of the building as the public right of way adjoins the building there were no access restrictions.

Weather conditions during the visit to the Property were overcast. There were no weather-related Property access restrictions encountered during the reconnaissance visit.

5.2 GENERAL DESCRIPTION

Property and Area Description:	The Property consists of approximately 0.09 acres of mixed commercial/residential land (Wayne County tax parcel no. 71111-09-157668) located on the southeast corner of the intersection of Canal Street and Geneva Street. The site vicinity is used for commercial purposes.
Property Operations.	The Property is currently vacant and has been used for mixed commercial/residential purposes throughout its known history.
Structures, Roads, Other Improvements:	The Property is developed with a three story 3,100 square-foot, brick and mortar building constructed in 1900. The building footprint occupies the entire Property parcel and there are no outdoor or parking areas.
Property Size (acres):	0.09 acres
Estimated % of Property Covered by Buildings and/or Pavement:	100%
Observed Current Property Use/Operations:	Property is currently vacant.
Observed Evidence of Past Property Use(s):	The Property is abandoned but is located in an area that has been historically commercial. The building had a commercial appearance at ground level with apparent residential (balconies, egress ladders) and/or office space on the upper floors.

**58-66 CANAL STREET, LYONS, NEW YORK
PHASE I ENVIRONMENTAL SITE ASSESSMENT**

Site Reconnaissance
June 3, 2021

Sewage Disposal Method (and age):	The Property's building is connected to the Town of Lyons municipal sewer service. (Wayne County Planning Office)
Potable Water Source:	Town of Lyons Water Department. (Wayne County Planning Office).
Electric Utility:	Rochester Gas and Electric (also provider of natural gas to the Property's building)

5.3 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

The following table summarizes Stantec's observations during the site visit.

Observations	Description/Location
Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14):	None observed
Drums (≥ 5 gallons):	None observed.
Strong, Pungent, or Noxious Odors:	None observed.
Pools of Liquid:	None observed.
Unidentified Substance Containers:	None observed.
PCB-Containing Equipment:	None observed.
Other Observed Evidence of Hazardous Substances or Petroleum Products:	None observed.

5.4 INTERIOR OBSERVATIONS

Stantec was not permitted to access the interior of onsite structures. Therefore, Stantec was unable to make the observations during the Property reconnaissance of the building exterior.

5.5 EXTERIOR OBSERVATIONS

Stantec made the following observations during the site visit of exterior areas of the Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
On-site Pits, Ponds, or Lagoons:	None observed.
Stained Soil or Pavement:	None observed.
Stressed Vegetation:	None observed.
Waste Streams and Waste Collection Areas:	None observed
Solid Waste Disposal:	No areas indicative of solid waste disposal were observed.

**58-66 CANAL STREET, LYONS, NEW YORK
PHASE I ENVIRONMENTAL SITE ASSESSMENT**

Site Reconnaissance
June 3, 2021

Observations	Description
Potential Areas of Fill Placement:	No mounds, piles, or depressions suggesting the placement of fill material were observed on the Property.
Wastewater:	No exterior wastewater discharge was observed.
Stormwater:	Roof drains only.
Wells:	None observed.
Septic Systems:	No indications of a septic system were observed.
Other Exterior Observations:	None.

5.6 UNDERGROUND STORAGE TANKS/STRUCTURES

Existing USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), which would indicate the presence of USTs, was discovered during the site reconnaissance.
Former USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), reports, or other evidence of the former presence of USTs was discovered during this Phase I ESA.
Other Underground Structures:	None observed.

5.7 ABOVEGROUND STORAGE TANKS

Existing ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), which would indicate the presence of ASTs, was discovered during the site reconnaissance.
Former ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), reports, or other evidence of the former presence of ASTs was discovered during this Phase I ESA.

5.8 ADJOINING PROPERTIES

5.8.1 Current Uses of Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about use and activities on adjacent properties:

NORTH	Canal Street followed by commercial storefronts.
EAST	Parking followed by a commercial building.
SOUTH	52-54 Canal Street unoccupied vacant land.
WEST	A vacant commercial building located at 52-54 Canal Street and attached to the Property. (Contract Design Associates)

**58-66 CANAL STREET, LYONS, NEW YORK
PHASE I ENVIRONMENTAL SITE ASSESSMENT**

Site Reconnaissance
June 3, 2021

5.8.2 Observed Evidence of Past Uses of Adjoining Properties

Observations of adjacent properties providing indications of past use and activities, if any, are described below.

NORTH	None observed.
EAST	None observed.
SOUTH	None observed.
WEST	None observed.

5.8.3 Pits, Ponds or Lagoons on Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about the presence of pits, ponds and lagoons on adjacent properties:

NORTH	None observed.
EAST	None observed.
SOUTH	None observed.
WEST	None observed.

5.9 OBSERVED PHYSICAL SETTING

Topography of the Property and Surrounding Area:	The Property and surrounding area are generally flat with a slight downward slope to the southeast towards the Erie Canal.
---	--

**58-66 CANAL STREET, LYONS, NEW YORK
PHASE I ENVIRONMENTAL SITE ASSESSMENT**

Interviews
June 3, 2021

6.0 INTERVIEWS

No Property owner or occupant interviews were conducted for this Phase I ESA. Per ASTM standards, interviews were not sought out with neighbors of the Property given the absence of evidence of unauthorized use of the Property.

Evaluation
June 3, 2021

7.0 EVALUATION

This section provides a summary of our findings, opinions, and conclusions.

7.1 FINDINGS AND OPINIONS

Information gathered from interviews, reviews of existing data, and a Property inspection was evaluated to determine if RECs are present in connection with the Property. Based on this information, Stantec made the following findings and developed the following opinions:

- **Finding:** There was a service station from at least 1949 and from 1989 to 1999, with three gasoline tanks present in at least 1949, on the west adjacent property.

Opinion: The long-term use of the as a gas station, in combination with the lack of records documenting the removal of the tanks and/or the performance of assessment or cleanup activities, is considered a REC for the Property.

- **Finding:** There was a dry cleaner at 46 Canal Street, 178 feet east of the Property from at least 1969 to 2008.

Opinion: Dry cleaning operations of this vintage typically used chlorinated solvents and It is unknown how the chemicals may have been handled and disposed. The long-term use of 46 Canal Street for dry cleaning, is a REC for the Property.

- **Finding:** There was a service station at the intersection of Geneva Street and Clyde Road, 175 feet southeast of the Property, between at least 1969 to 2008.

Opinion: The long-term use of the property at the intersection of Geneva Street and Clyde Road as a gas station, is not considered a REC for the Property as it is noted to be lower in elevation and groundwater is expected to flow away toward the Canal.

- **Finding:** There was a service station, on 30 Geneva Street, 240 feet southeast of the Property from at least 1949, with three gasoline tanks and 5 spills between 1998 and 2016.

Opinion: The long-term use of 30 Geneva Street as a gas station is not considered a REC for the Property as it is noted to be lower in elevation and groundwater is expected to flow away toward the Canal.

7.2 DATA GAPS

The federal AAI final rule (40 CFR 312.10[a]) and ASTM E1527-13 identify a “data gap” as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the EP or the User. Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

**58-66 CANAL STREET, LYONS, NEW YORK
PHASE I ENVIRONMENTAL SITE ASSESSMENT**

Evaluation
June 3, 2021

Gap	Discussion
Deletions or Exceptions from Scope of Work Referenced in Section 2:	None
Weather-Related Restrictions to Site Reconnaissance:	None
Facility Access Restrictions to Site Reconnaissance:	Access to the Property was not permitted as this project is part of a tax foreclosure. In general, given the documented long-term use of the Property as a commercial building the potential for interior to contain large quantities of petroleum or hazardous substances other than regulated building materials is considered to be low. However, there is some potential for a heating oil AST to be present as well as small containers of cleaning products and other household hazardous materials.
Other Site Reconnaissance Restrictions:	None
Data Gaps from Environmental Records Review:	None
Data Gaps from Historical Records Review:	The first developed use of the Property (pre-1884) could not be determined. Stantec did not obtain historical records that document the full history of the Property from its initial development to present in continuous 5-year intervals. These gaps in the historical records are considered "data failures" and represent "data gaps" as these terms are defined by ASTM E 1527-13. Based on the information obtained during the course of this ESA and general knowledge of development at and near the Property, the absence of this information did not affect the ability of the Environmental Professionals to identify RECs, HRECs, CRECs, or <i>de minimis</i> conditions.
Data Gaps from Interviews:	The owners were not available as this project is part of a tax foreclosure.
Other Data Gaps:	None

7.3 CONCLUSIONS

We have performed this Phase I ESA of the Property in conformance with the scope and limitations of ASTM Practice E1527-13. Any exceptions to, or deletions from, this practice are described in Section 2.3 of this report. This assessment has revealed the following evidence of RECs in connection with the Property:

- **REC #1:** The presence of a service station from at least 1949 and from 1989 to 1999, with three gasoline tanks present at least in 1949, on the adjacent west property, is a REC for the Property.
- **REC #2:** The presence of a dry Ccleaner, on 46 Canal Street, 178 feet east of the Property from at least 1969 to 2008 is a REC for the Property.

**58-66 CANAL STREET, LYONS, NEW YORK
PHASE I ENVIRONMENTAL SITE ASSESSMENT**

Evaluation
June 3, 2021

In addition to the RECs, the following BERs relevant to redevelopment or reuse of the Property was identified during the Phase I ESA:

- Based on the age of the Property's building (circa 1900), lead-based paint and asbestos-containing material (ACM) may be present in the building. A formal hazardous materials survey was not completed as part of the scope of work.

Based on the identified RECs and the potential demolition of the building it is recommended that an interior review for potential RECs (post possession) and a regulated building materials survey should be conducted. It is also recommended that a Phase II ESA be conducted prior to redevelopment to further evaluate the presence/absence and magnitude of potential impacts including soil vapor intrusion at the Property.

Non-Scope Considerations
June 3, 2021

8.0 NON-SCOPE CONSIDERATIONS

The scope of work completed was limited solely to those items in the ASTM E1527-13 standard. No ASTM E1527-13 non-scope services were performed as part of this Phase I ESA.

Ms. Nair is an Environmental Scientist with degrees in Environmental Science and Earth Sciences. Her experience includes Brownfield Cleanup Program Site Investigation and Remediation.

EDUCATION

Master of Science in Earth Sciences, Syracuse University, Syracuse, New York, 2018

Bachelor of Science in Environmental Science, Emory University, Atlanta, Georgia, 2014

CERTIFICATIONS & TRAINING

OSHA 40-hr Hazardous Waste Operations and Emergency Response Training, Newark/Somerset, New Jersey, 2018

American Red Cross Adult First Aid/CPR/AED, New York, New York, 2019

8-Hour HAZWOPER Refresher Training, New York, New York, 2020

OSHA 10-Hour Construction Safety Training, New York, New York, 2019

OSHA 30-Hour Construction Safety and Health Training, New York, New York, 2019

PROJECT EXPERIENCE

GEOTECHNICAL INVESTIGATIONS

MS 246K (NYCSCA) | Brooklyn, New York | Environmental Scientist

Ms. Nair assisted with geotechnical drilling oversight at this New York City School Construction Authority (NYCSCA) site. She helped record blow counts for Standard Penetration Test (SPT) N-values, classify soils by their geologic and anthropomorphic characteristics, screen soils for evidence of VOC contamination with a MiniRAE 3000 PID, record observations in boring logs, and collect grab samples for potential laboratory analysis.

BROWNFIELDS

Brownfield Cleanup Program, Astoria Steel | Astoria Owners LLC | Astoria, Queens, New York | Environmental Scientist

Ms. Nair performed various field and office tasks for this New York State Brownfield Cleanup Program (NYS BCP) site. Office tasks include editing figures, tables, and text within the site's Remedial Action Work Plan (RAWP). In the field, she has conducted groundwater sampling for standard and emerging contaminants (perfluorinated compounds [PFCs], 1,4-dioxane) via the United States Environmental Protection Agency (EPA) Low Stress (Low Flow) Purging and Sampling Procedure, monitoring water quality parameters with a Horiba U-52 flow cell. She has also performed air monitoring in accordance with the New York State Department of Health (NYSDOH) Generic Community Air Monitoring Plan (CAMP), utilizing TSI DustTrak aerosol monitors and MiniRAE 3000 photoionization detectors (PIDs) to evaluate PM-10 particulate levels and Volatile Organic Compound (VOC) concentrations, respectively.

Canal Street Manufacturing Site | Rochester, New York | Environmental Scientist

Ms. Nair assisted with well development, groundwater sampling and water quality monitoring as part of the Remedial Investigation (RI) at this NYS BCP site. Water quality monitoring was accomplished using a LaMotte 2020we Portable Turbidity Meter and a MYRON 6P Water Quality Tester.

EMERGENCY RESPONSE

ITC Fire Response | Deer Park, Texas | 2019 | Environmental Scientist

Ms. Nair assisted with air monitoring during the benzene recovery operation at the Deer Park Emergency Response in Deer Park, Texas.

ENVIRONMENTAL ASSESSMENT

Confidential Client, Allegany and Madison NY | Environmental Scientist

Ms. Nair prepared site characterization reports to support the planning and development phase of a greenfield utility scale photovoltaic solar facility of approximately 20 megawatts (MW) on approximately 200 acres of private property. In order to identify permitting or regulatory issues, research was conducted to determine and characterize biological resources, aquatic resources including surface water hydrology and wetlands, land use, and cultural/historical resources. Ms. Nair prepared GIS figures to display the relevant research and data.

Travis Avenue Road Raising | 2019 | Environmental Scientist

Ms. Nair prepared GIS figures with data sourced from the New York State Department of Environmental Conservation (NYSDEC) and the National Wetlands Inventory (NWI) for the Travis Avenue Road Raising Project, which the (New York City Economic Development Corporation) NYCEDC is proposing as part of a Citywide initiative to address resiliency and readiness for long-term sea level rise through strategic localized projects. The proposed improvements at the Travis Avenue project site involve the reconstruction of a 750-linear foot, frequently-flooded section of Travis Avenue, with all work occurring within the existing Travis Avenue right-of-way (R.O.W.).

ENVIRONMENTAL SITE REMEDIATION

Melrose Site 62 | Bronx, New York | Environmental Scientist

Ms. Nair helped prepare the environmental investigation report and assisted with soil vapor sampling at this New York City Department of Parks and Recreation (NYCDPR) new park site. She assisted with the oversight of drilling operations to install soil vapor collection points, performed helium tracer tests to evaluate the collection point seals, and conducted soil vapor and ambient air sampling using SUMMA® canisters fitted with flow controllers and vacuum gauges.

Bushwick Inlet Park - 50 Kent Avenue | Brooklyn, New York | Environmental Scientist

Ms. Nair assisted with preparation of the Excavation Work Plan for the redevelopment of this NYCDPR new park site – a former Manufactured Gas Plant (MGP) that had previously been remediated under an Interim Remedial Measures Work Plan.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENTS

Quarry Ballfields | New York, NY | 2019 | Environmental Scientist/Field Staff

Ms. Nair assisted with an environmental subsurface investigation at this site, which is currently operated as a New York City park that contains a baseball field and a soccer field. The New York City Department of Parks and Recreation (NYCDPR) plans to rehabilitate the Quarry Ballfields park by replacing the grass soccer field with synthetic turf, adding new walkways, updating site amenities, and creating a new seating plaza in the southwestern portion of the site along East 181st Street.

Gateway Estates II Phase 2 Park | New York, NY | 2019 | Environmental Scientist/Field Staff

Ms. Nair assisted with an environmental and geotechnical subsurface investigation, including the collection of soil, soil vapor, and groundwater samples, for a former landfill/illegal dumping ground in Brooklyn slated for redevelopment into a new public park by the New York City Department of Parks and Recreation (NYCDPR). The park development is part of a larger development of a new neighborhood called Gateway Estates.

ENVIRONMENTAL MONITORING

Kinder Morgan Bulk Petroleum Terminal | 2019-Present | Environmental Scientist/Field Staff

Ms. Nair assisted with the ongoing remedial investigations at the Kinder Morgan Bulk Petroleum Terminal. She has participated in several different field events at the site. During groundwater monitoring events, she gauged and sampled monitoring wells and implemented of traffic control. During vacout events, she worked with the vac truck operator in order to remove product from monitoring wells at the site.

LANDFILL SERVICES

Victor Insulators | Victor, New York | Environmental Scientist

Ms. Nair assisted with figure and report preparation as part of a long-term groundwater monitoring program for an existing industrial landfill.

Katie Nelson

Environmental Scientist

9 years of experience · Rochester, New York

Katie is an Environmental Scientist with degrees in Geology and Environmental Science. Her experience includes Phase I and II Environmental Site Assessments, Asbestos Sampling, GIS Mapping, and Brownfield Cleanup Program Site Investigation and Remediation. Katie was selected as a Board Member for the Rochester Environmental Commission as an Environmental Reviewer for the City of Rochester.

EDUCATION

Master of Science, Environmental Science, Rochester Institute of Technology, Rochester, New York, 2011

Bachelor of Science, Geology, Hobart and William Smith, Geneva, New York, 2009

40-Hour OSHA HAZWOPER Standard, 29 CFR 1910.120, Rochester, New York, 2011

REGISTRATIONS

Asbestos Inspector, New York State Department of Labor

Mold Assessment Consultant, New York State Department of Labor

Lead Inspector/Risk Assessor, United States Environmental Protection Agency

MEMBERSHIPS

Commissioner, Rochester Environmental Commission

Member, Women of Wastewater, New York Water Environment Association, Inc.

PROJECT EXPERIENCE

SITE MANAGEMENT & REMEDIATION

Former Alliance Metal Facility | Gates, New York

Served as the Field Team Leader for the remedial investigation at a state brownfield site. Ms. Nelson took sub slab soil vapor samples and indoor air samples, installed soil borings, bedrock wells and performed two rounds of groundwater sampling.

Asbestos Surveys | New York

Has performed several asbestos surveys within the state of New York including commercial buildings and at an academic institution.

Buckeye Rochester North Terminal | Rochester, New York

Assisted with groundwater sampling as part of a spill remediation program.

Waste Management, Mt Read Boulevard | Rochester, New York

Oversaw impacted soil excavation and received spill closure from the NYSDEC for a spill that was discovered while Waste Management was installing a new natural gas line at a fleet service facility.

Genesee Street Supplemental Phase II Environmental Site Assessment | Rochester, New York

Performed field work for a supplemental Phase II Environmental Site Assessment which involved soil sampling, bedrock coring, and groundwater sampling.

Phase I & II Environmental Site Assessment, Warrensburg Health Center | New York

Performed a Phase I Environmental Site Assessment and limited Phase II Environmental Site Assessment as part of the redevelopment of the Warrensburg Health Center.

Due Diligence, Industrial Properties | Various Locations, New York

Assisted in reviewing and compiling Phase I Environmental Site Assessments or Desktop reviews for seventeen properties in Northern New York State.

Phase I Environmental Site Assessments, Various Locations

Prepared Phase I ESA reports for various locations in New York, Pennsylvania and New Jersey.

Monroe Avenue Phase II Environmental Site Assessment

Performed a Phase II Environmental Site Assessment involving soil and groundwater sampling at this former woodworking facility.

Buell Automatics, Inc. Brownfield Cleanup Program | Buell Automatics | New York, United States | USD 594K

Assisted with construction observation services during implementation of Interim Remedial Measures involving soil excavation and off-site disposal, in-situ groundwater treatment; underground injection program; soil and groundwater sampling; and the community air monitoring program.

Phase I Environmental Site Assessment 67 and 89 Canal Street | Rochester, New York | 2018

Performed Phase I ESA on former manufacturing facility in anticipation of entry into the Brownfield Program.

Brownfield Cleanup Program, Former Allegany Bitumens Asphalt Plant | Blades Holding Company Inc. | Belmont, New York, United States

Assisted with construction observation services during implementation of Interim Remedial Measures involving soil excavation and off-site disposal, in-situ groundwater treatment; soil and groundwater sampling; and the community air monitoring program.

Brownfield Cleanup Program, Ward Street Site | Germanow-Simon Corporation | Rochester, New York, United States

Performed groundwater sampling as part of an Enhanced Reductive Dechlorination program to treat residual groundwater impacts in-situ.

Victor Insulators | Victor, New York

Has performed and submitted reports for groundwater sampling at an active industrial landfill part of New York Permit 360 requirements for the past five years.

Phase I and II Environmental Site Assessment 40 Scattered Properties, Stadium Estates | Rochester, New York | 2016

Performed Phase I ESA for multiple residential properties located within the JOSANA neighborhood in Rochester NY. Assisted in installing test pits and soil borings as part of a Phase II ESA investigation.

Astoria Steel Site | Astoria, Queens, New York

Ms. Nelson served as the Field Team Leader for the Remedial Investigation of a former foundry site in the state Brownfield Cleanup Program and assisted in emergency cleanup measures on the site. Ms. Nelson oversaw the installations of soil borings, overburden monitoring wells, test pits, collected groundwater samples as part of this investigation and conducted a hazardous building materials sampling program for PCBs.

Voluntary Cleanup Program, Rochester Tech Park | Gates, New York | Environmental Scientist

Coordinated and conducted Site Management Plan activities for Building 4 at the Rochester Tech Park. Site Management Plan activities include, observing any subsurface activity and performing community air monitoring as needed, semi-annual groundwater sampling, semi-annual monitoring of existing Sub-Slab Depressurization System and submitting an annual periodic review report to the New York State Department of Environmental Conservation.

Charlotte Phase I & II Environmental Site Assessment

Performed a Phase I Environmental Site Assessment at a label manufacturing facility in the Charlotte area in Rochester, NY. A follow up Phase II involved soil and groundwater sampling.

Rochester Genesee Transportation Authority

Performed soil and groundwater sampling at a bus garage facility.

Canandaigua Lake Front Property | Canandaigua, New York

Served as Field Team Leader for Remedial Investigation on the lake front property. Work included installation of soil boring, took surface soil samples, installed overburden wells and sampled groundwater as part of the remedial investigation of a state Brownfield Cleanup Program.

Hazardous Material Assessments, Various Bridge Projects | New York

Has performed numerous hazardous material assessments, including asbestos and lead paint sampling for bridges located throughout upstate New York.

ASSESSMENTS, PERMITTING, AND COMPLIANCE

Town of Brighton - SEQR Consultant | Town of Brighton | Brighton, New York

Assisted the Town of Brighton in reviewing a Draft Scope and Draft Environmental Impact Statement (DEIS).

National Grid | National Grid | Various Locations, New York

Performs desktop reviews for proposed work on utility lines throughout New York State and prepares applicable permits for work in wetlands or near protected streams.

HEALTH, SAFETY & INDUSTRIAL HYGIENE

Cargill Salt | Ithaca, New York

Performed field work and analysis for a noise dosimetry survey and oil mist air monitoring.

Indoor Air Quality/Mold | Various Locations

Performed field work and analysis for several indoor air quality/mold investigations.

Particulate Monitoring | Various Industrial Locations

Performed field work and analysis for particulate monitoring at various industrial locations.

Cargill Salt | Ithaca, New York

Performed field work and analysis for a noise dosimetry survey and oil mist air monitoring.

RESEARCH / LABORATORIES

Woods Hole | Cape Cod, Massachusetts

Performed research on the process of nutrient enrichment in coastal waters and sediment.

PUBLICATIONS

Threat of predation alters the ability of benthic invertebrates to modify sediment biogeochemistry and benthic microalgal abundance. *Marine Ecology Progress Series, Vol. 494: 29-39, 2013.*

Steven Campbell

Senior Environmental Project Manager
33 years of experience · Rochester, New York

Mr. Campbell has worked in the field of environmental health and safety since 1987. During his career, he has worked as an environmental scientist and a Project Manager in the governmental, consulting, and private sectors.

EDUCATION

Bachelor of Science, General Science, State University of New York at Brockport, Brockport, New York, 1987

CERTIFICATIONS & TRAINING

OSHA/Emergency Response Incident Command, Rochester, New York, 2019

US Department of Transportation Hazardous Materials, Rochester, New York, 2019

OSHA 40-Hour Hazardous Waste Site Operations and Emergency Response (HAZWOPER), Rochester, New York, 1989

PROJECT EXPERIENCE

HEALTH, SAFETY & INDUSTRIAL HYGIENE

City of Rochester, Air Testing for Street Maintenance* | Rochester, New York | Project Manager

Mr. Campbell was responsible for air testing for the City of Rochester to evaluate Permissible Exposure Limits (PELs) for employees that heat asphalt.

City of Rochester Solid Waste Training and Safety Facility* | Rochester, New York | Contract manager

Mr. Campbell was responsible for an indoor air quality evaluation for the City of Rochester at the City Solid Waste Training and Safety Facility. The evaluation included air and mold sampling, which was sent to a laboratory for analysis. A report included sampling locations, methodologies, laboratory analysis and recommendations for corrective actions.

City of Rochester, Street Maintenance Operations Center, Mt. Read Blvd.* | Rochester, New York | Project Manager

Mr. Campbell was responsible for indoor air monitoring services at the Street Maintenance Operations Center on Mt. Read Blvd. for the City of Rochester. The air monitoring was to evaluate indoor odor complaints from employees. Monitoring included carbon monoxide and petroleum compounds (diesel hydrocarbons) to determine if emissions from facility vehicles exceeded recommended OSHA concentrations (PELs, STELs, ceilings).

City of Rochester, West Ave. Facility* | Rochester, New York | Project Manager

Mr. Campbell was responsible for air monitoring for the City of Rochester at the temporary Water and Lighting Facility on West Avenue. A site walk-through and sampling to identify potential sources of indoor air contaminants was conducted. The sampling consisted of indoor air, floor dust, and a wall sample for mold. This sampling was completed in response to employee complaints about air quality at the facility, which was formerly used as a steel warehouse. The results of the sampling indicated indoor air particulate levels, dust and mold levels were within normal ranges and that air quality may have been affected by recent construction activity at the site. A year later more mold sampling was taken and abatement recommendations were prepared.

Wegmans Meat Processing Center* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager for an Indoor Air Quality evaluations and bacteria testing at a major meat processing site in Western New York since 2001. We evaluated the presence of organic growth (fungi, molds, mildew, etc.) and microscopic bacteria (listeria, salmonella and E-coli). The sampling plan recommended sampling locations, analysis types and sampling methods. Considerations for sampling were based on worker health and safety and protection of product quality. Both airborne and surficial samples are taken. Written reports with the findings are prepared and compared to previous data.

Penn Can Mall* | Cicero, New York | Project Manager

Mr. Campbell was the Project Manager for an indoor air quality investigation and mold survey for the Penn Can Mall in Cicero, NY. The indoor air quality evaluation was based on qualitative and quantitative data. The qualitative portion of the evaluation consisted of a site walk-through and visual inspection. The quantitative portion involved the use of air monitoring instruments and, in some instances, laboratory analysis. For the mold survey, two types of samples were collected (bio-aerosol air samples and direct contact samples). A report was prepared summarizing the results.

Regional Traffic Operations Center* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager for hazardous substance and remedial investigations, including abatement design, for the proposed facility located at the Greater Rochester International Airport. The \$10 million facility was constructed on lands previously used, in part, as an electroplating facility and an above Major Oil Storage Facility. Work tasks include a geophysical survey to determine the location of buried features; soil-vapor surveys; completion of over 60 soil borings, installation of groundwater monitoring wells, sampling, recommendations for design abatement; development of construction abatement drawings; coordination with NYDEC; and environmental construction monitoring.

ENVIRONMENTAL SITE ASSESSMENTS PHASE I, II, III

DPW Garage* | Moroe County, New York | Project Manager

Mr. Campbell was the Project Manager for this remedial investigation and corrective measures project at a Town Department of Public Works (DPW) site. The DPW garage formerly housed three large underground storage tanks that were noted to be leaking upon their removal. Both soils and groundwater were impacted. A bio-sparging system was designed for the property and was reviewed and approved by the NYSDEC.

East Main St.* | Rochester, New York | Project Engineer

Mr. Campbell was the Project Engineer involved in an expanded Phase I and Phase II Environmental Site Assessment for the armory building and property at 900 East Main Street. Sampling to determine presence of hazardous wastes/hazardous materials was performed. Field activities included a geophysical survey, subsurface soil investigation at 16 locations, surface soil sampling, and dye testing of drainage features to determine if subsurface contamination and/or buried tanks or other features were present. A preliminary plan for necessary remediation of contaminated areas with cost estimates was prepared.

Emerson Street Landfill Utilities Investigation* | Rochester, New York | New York | Rochester

Mr. Campbell was the Project Manager for investigation to determine migration of landfill contaminants along utility lines. The project included a detailed historical review of the landfill and material placement locations. He completed all confined space preparation and monitoring.

Investigation and Cleanup Under Stipulation Agreement* | Livingston County, New York | Project Manager

Mr. Campbell was the Project Manager for a Phase I ESA that was completed to facilitate the development of a former automobile service facility and gasoline station in Conesus, New York. Phase I findings indicated the presence of four underground storage tanks and an on-site drywell that received waste oil. A Phase II Investigation was completed to determine potential impacts on site soils and groundwater.

N. Washington St.* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager for Phase I and Phase II Environmental Site Assessments for the City of Rochester at 64 and 70 North Washington Street. Phase II ESA was needed to complete a geophysical survey to determine where the underground storage tanks were located; to complete soil borings to determine if contaminated soils and/or groundwater were present from the former UST system; to evaluate the integrity and discharge location of the floor sump located in the garage building of 64 N. Washington Street and if the soils associated with the sump have been impacted by activities associated with the former car/truck wash.

Rochester Housing Authority Term Agreement* | Rochester, New York | Contract Manager

Mr. Campbell was the Contract Manager for the term contract. He provided oversight of all phases of contract management on this term. Projects include asbestos identification, abatement design for asbestos, mold and lead, vapor intrusion and mitigation, structural evaluations, instrument surveys, multi-media environmental testing and environmental cleanup as necessary.

Route 104, North Greece Road to Veteran's Memorial Bridge* | Rochester, New York | Project Manager

Mr. Campbell was the Environmental Lead for the environmental services of the reconstruction of 9.5 kilometers of Route 104. Preliminary design included the preparation of a Design Report/ Environmental Assessment, field editing of digitized aerial mapping, asbestos, air quality and environmental assessments, analyzing TSM/TDM measures and preparations for a public hearing.

Route 252, Route 383 to County Route 102, Henrietta, Brighton and Chili* | Monroe County, New York | Environmental Project Manager

Mr. Campbell was the Environmental Project Manager for environmental engineering including NEPA and SEQR classifications, identification of wetlands, hazardous waste and asbestos, floodplain management, noise and air analyses, and preparation of a long EAF for the reconstruction of 5.5 miles of NYS Route 252 (Jefferson Road) from CR 102 (Edgewood Avenue) to NYS Route 383 (Scottsville Road) in the Towns of Brighton, Henrietta and Chili, in Monroe County.

RRS/IFOCV PCB Clean Up, Building 106, Griffiss Air Force Base* | New York | Project Engineer

Mr. Campbell was the Project Engineer and performed sampling for the removal and disposal of a concrete pad containing PCBs in Building 106.

RRS/IFOCV, Phase II EBS Building 302* | Rome, New York | Project Engineer

Mr. Campbell was the Project Engineer involved in a Phase II Environmental Baseline Survey on Rome Research Site's Building #302 located at the former Griffiss Air Force Base. Project included sampling/testing of soils and suspect media. Remediation of asbestos and suspect hazardous waste was also conducted. There were 12 major areas of concern in this building. They included abandoned waste materials, abandoned drywell beneath building, underground cable vault, underground communications vault, storm water catch basin without a concrete bottom, stained soil, existing and former above ground petroleum storage tanks, incinerator cleanout, asbestos and radon. Dye testing, soil sampling for RCRA metals, and swipe samples for PCB analysis were used on this project. A final EBS report was submitted upon completion.

NYSDEC Inactive Hazardous Waste Disposal Site Phase II Investigations* | New York | Project Manager

Mr. Campbell was the Project Manager responsible for numerous Phase II investigations under standby contract. Typical responsibilities under this contract included designing and implementing groundwater monitoring programs, interpretation of geophysical data, monitoring site worker health and safety, air monitoring, collection of groundwater, soil, waste and leachate samples and surveying groundwater elevations, sample locations and monitoring wells.

OGS Environmental Remediation 3 Year Term Contract, Statewide* | New York | Project Manager

Mr. Campbell was the Project Manager for the projects under this term contract. Services include, but were not limited to: 1) Oversight of petroleum tank removals and installations; 2) Remediation system designs; 3) DEC required reporting to include tank closure reports, spill investigations, remediation option and work plans, O&M reports and SPCC plans; 4) Installation oversight and operations and maintenance of mechanical, biological, and chemical remediation systems. Interaction and correspondence is required with OGS, DEC, tank owner staff and private contractors. The main objective of these services was to provide the State with cost effective environmental clean up and professional design/oversight of construction projects related to petroleum bulk storage.

Oil Removal at Finger Lakes DDSO, NYSOGS* | Newark, New York | Project Manager

Mr. Campbell was the Project Manager for the removal of approximately 37,750 gallons of #6 fuel oil from two of four underground storage tanks (USTs) at the Finger Lakes Developmental Disabilities Service Office (DDSO) facility located Newark, New York. Following the oil removal, a subsurface investigation of existing soil and groundwater conditions in the area surrounding the USTs was performed. The subsurface investigation included 13 soil probe locations and installation of one temporary groundwater monitoring well. The tanks' contents were heated first to promote removal of the water/oil. An evaluation of the soil around the tanks after all removal was completed.

River Road, 100 Acres* | Tonawanda, New York | Project Manager

Mr. Campbell was the Project Manager for environmental engineering services for 100 acres on River Road in Tonawanda, NY. Phase I and II Environmental Site Assessments (ESA), wetland delineation, preparation of Long Environmental Assessment Form (EAF), wildlife impact assessment, and traffic impact assessment were all completed for the three parcels of wooded land. The owner needed to address potential environmentally significant issues for his proposed development of commercial businesses on the frontage along River Road within the Town of Tonawanda's Local Waterfront Revitalization Zone. The property is adjacent to a former oil terminal. The Phase I and II ESAs were prepared concurrently to expedite the process. Twenty soil borings were required to establish subsurface conditions and evaluate the geotechnical characteristics of site soils. Potential sources of off- and on-site subsurface contamination were evaluated. To complete the Long EAF, Lu Engineers reviewed all relevant site remediation studies, plans, and regulations; consulted with local and state officials to determine applicable regulations, permit requirements and approving agencies; prepared draft Long EAF for review by Town of Tonawanda; prepared Waterfront Assessment Form; prepared supporting studies including traffic analysis and wildlife impact assessment; participated in public review of Long EAF; responded to comments from general public and involved agencies; and revise Long EAF based on comments from Town, involved and interested agencies, and general public.

Trinidad Street* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager responsible for a Phase I / Phase II Environmental Site Assessment (ESA) for the City of Rochester on 3-9 Trinidad Street consisting of a 1.7 acre parcel containing a 6,000 square foot building and paved parking lot. The site had been previously used by an asphalt paving company, a coal company, a lumber yard and more recently as a grocery store. The Phase I ESA uncovered the presence of construction debris, drums, tires and other hazardous materials. The Phase II portion of the project included a geophysical survey, subsurface soil borings, preliminary asbestos survey, preliminary hazardous and non-hazardous waste evaluation with air monitoring, and report preparation with cost estimates for cleanup.

Watertown International Airport* | Watertown, Jefferson County, New York | Project Manager

Mr. Campbell was the Project Manager responsible for both a Phase I and Phase II Environmental Site Assessment for Jefferson County at the Watertown International Airport. Geoprobe soil samples were taken in areas by former fuel tanks with documented petroleum spills, the former firefighting training area, the PCB-containing electrical transformers area, and the floor drain system of the vehicle maintenance area. Soils were screened in the field using a photoionization detector. Water samples were also collected from the facility's water supply well to determine if petroleum spills had impacted the groundwater. A report detailing all the findings, and included recommendations, was prepared.

Sugar Creek Store* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager responsible for a Phase I and Phase II Environmental Site Assessment at a Sugar Creek store in Rochester, NY. There were several areas on the property where known releases had occurred from petroleum storage tanks. These areas were investigated using a series of GeoProbe borings so that the subsurface conditions could be evaluated to determine the presence of petroleum hydrocarbons and to define the vertical and horizontal extent of impact of any identified material. A report documenting all field work, findings, cost estimates, and conclusions was provided.

Brownfield Application Assessment* | Leyden, New York | Project Manager

Mr. Campbell was the Project Manager for a Phase I Environmental Site Assessment for the Town of Leyden at a vacant former Mobil Service Station. He also assisted the Town with preparing a Brownfield application. The project included subsurface sampling, soil vapor testing, well installation, sampling and testing and the removal of a least two underground storage tanks. A geophysical investigation was also conducted to identify unknown abandoned tanks. A report was developed evaluating remedial alternatives and recommendations for the next phase of this Brownfield restoration project.

Phase I Site Assessments | New York | Project Manager

Mr. Campbell has been a Project Manager and/or performed these Phase I Environmental Site Assessments on thousands of properties over his 30+ year career. Notable projects include: -Champion Products, Perry, New York -Future Bausch & Lomb Headquarters, Rochester, New York -Orchard Whitney Brownfield, Rochester, New York -Crosmen Airguns, Bloomfield, New York -Fredrick Douglass Apartments, Rochester, New York, -Watertown International Airport, Watertown, New York -RTOC Facility, GRIA -Frontier Field, Rochester, New York -I490 Gateway Project, Rochester, New York -Multiple Autozone Developments, Western New York

SAFETY TRAINING

Safety Training

Mr. Campbell has designed and instructed Environmental Regulatory and Health and Safety Courses since 1988. At EPA he was part of a RCRA team that traveled across the country training Regional and State enforcement inspectors. He provided industrial training courses for the industrial sector for the George Washington University. He has also instructed the following OSHA training: - 40 hour Hazardous waste operations and emergency response - 24 hour Emergency Response Technician - 8 hour HAZPOWER Refresher

ENVIRONMENTAL SITE REMEDIATION

City of Rochester, Brownfield Assistance Program, Term Contract* | Rochester, New York | Project Manager

Mr. Campbell was responsible for providing environmental investigation services through the City of Rochester's Brownfield Assistance Program (BAP). The BAP provides significant technical and financial assistance to private parties that need to investigate environmental conditions on Brownfield properties. This program is part of the City of Rochester's Brownfield Assessment grant from the United States Environmental Protection Agency (EPA). Therefore, all work performed meets the EPA standards.

Oil Removal at Finger Lakes Developmental Disabilities Service Office (NYSOGS)* | NYSOGS | Newark, New York | Project Manager

Mr. Campbell was the Project Manager for the removal of approximately 37,750 gallons of #6 fuel oil from two of four underground storage tanks (USTs) at the Finger Lakes Developmental Disabilities Service Office (DDSO) facility located Newark, New York. Following the oil removal, a subsurface investigation of existing soil and groundwater conditions in the area surrounding the USTs was performed. The subsurface investigation included 13 soil probe locations and installation of one temporary groundwater monitoring well. The tanks' contents were heated first to promote removal of the water/oil. An evaluation of the soil around the tanks after all removal was completed.

DePaul Properties Environmental Term* | New York | Contract Manager

Mr. Campbell was the Contract Manager for this term contract which included multiple building (i.e. residential, industrial, and commercial buildings) demolitions. Projects included petroleum tank and contaminated soil removal, asbestos surveys, abatement design, air/project monitoring, PCB caulk surveys, mold, radon and lead paint assessments. Steve has managed over 80 projects (all of which are funded by OCR/HCR) under this term agreement over the last three years. All of these projects involve state funding and as a result, strict compliance with documentation, formatting and budget reports.

Former Dry Cleaning Facility, Phase I and Phase II* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager for a Phase I Environmental Site Assessment for an entire city block planned for development by a local builder. Review of City of Rochester Business Directories indicated that a portion of the site was used as a dry cleaner for over 60 years. The installation of monitoring wells was recommended and instituted to determine whether the site groundwater was compromised. For Phase II, developed and implemented large scale hazardous waste site investigation. Soil borings and monitoring wells revealed perchloroethylene and stoddard solvents. Information gathered was used in preparing construction budgets on the site of Bausch & Lomb world headquarters.

Culvert & Wall Repair or Replacement* | Various Counties in NYSDOT Region 6, New York | Environmental Project Manager

Mr. Campbell was responsible for soil borings, soil sampling, and report preparation were provided. The purpose of this project was to rehabilitate 14 highway drainage culverts and will provide right-of-way (ROW) mapping for one additional site within Alleghany, Chemung, Steuben, Schuyler, Tioga and Yates Counties.

Former Frink America property, NYSDEC Environmental Restoration Project Plan* | Clayton, New York | Project Manager

Mr. Campbell wrote the winning Brownfield Assessment and Cleanup Grant applications totaling \$400,000 for the former Frink America snowplow manufacturing site in Clayton, New York. He also prepared a NYSDEC Environmental Restoration Program (ERP) grant application to secure approximately \$700,000 in additional cleanup funding. When funding was secured, he was also responsible for managing all facets of the project including; workplan development, the identification of the vertical and horizontal extent of contamination, surface soil sampling, soil borings and groundwater monitoring well installations, removal of underground storage tanks, building demolition specifications and contractor selection/oversight, PCB sampling, an RI/FS report, development and implementation of a Work Plan to address known impacted soils and submission of all reports and reimbursement requests. One of the unique aspects of this project was that Mr. Campbell provided applicable OSHA health and safety training to municipal workers who were used to remove and haul contaminated soils at the site. This saved the client over \$500,000 in contractor cleanup costs. The newly developed property now houses a resort hotel, public boat docks, a riverwalk, and a restaurant while creating new park areas and enhanced deep water port space along the St. Lawrence River.

Former Wilcox Press ERP Investigation and Cleanup* | Dansville, New York | Contract Manager

Mr. Campbell was the Contract Manager for the remediation that included a geophysical survey, groundwater sampling, surface soil sampling. He provided oversight of asbestos sampling, and a full hazardous materials assessment.

Grimes Glen Site Closure Plan* | Village of Naples, Ontario County, New York | Project Manager

Mr. Campbell was the Project Manager for the closure of this site. He worked with Ontario County and the New York State Department of Environmental Conservation (NYSDEC) to develop a landfill closure report to remove soil and solid waste from a former disposal area. The scope of work included the removal of more than 7,000 tons of contaminated soil due to years of illegal dumping at the Site. Mr. Campbell provided oversight of work zone air monitoring, excavation oversight and health and safety oversight for the duration of the project.

Karenlee Drive* | Henrietta, New York | Project Manager

Mr. Campbell was the Project Manager responsible for completing and implementing a Work Plan for the former waste water treatment plant at 100 Karenlee Drive in the Town of Henrietta in accordance with the New York State Department of Environmental Conservation (NYSDEC) Voluntary Cleanup Program. Oversight of installation of monitoring wells, the collection of subsurface soil samples during the well installation, the collection of water samples from the installed wells and the collection of surface soil samples was provided. Coordination between NYSDEC and Town of Henrietta was also provided. The information from this project was utilized to determine the extent and concentration of suspected site contamination and its impact on proposed site improvements.

Longway's Diner* | Pamela, New York | Project Manager

Mr. Campbell was the Project Manager for a Phase II Environmental Site Assessment in Pamela, NY (near Watertown). He provided oversight of the borings completed by subcontractor, coordinated lab analysis, interpreted analytical results, and prepared a report on the findings. Due to the findings of the Phase II ESA, a Remediation Work Plan to address the petroleum contamination that was discovered on the site was written.

Manufacturing Facility* | Ontario County, New York | Project Manager

Mr. Campbell was the Project Manager for multi-phase site characterization (RI/FS) to determine the extent of soil and groundwater TCE contamination. The project was completed under an Administrative Consent Order negotiated between the client and the NYSDEC. Mr. Campbell developed a site specific Health & Safety and Remedial Investigation Work Plan approved by NYSDEC, reviewed TCE storage locations, performed soil gas surveys, and completed test borings, groundwater monitoring well installation/monitoring and residential well sampling. Mr. Campbell was also responsible for generating hydraulic conductivity and flow data from groundwater monitoring wells. Information from this project was used to identify a remedial alternative (soil vapor extraction) for the site.

RRS/IFOCV Clean Up of Drum and Electrical Equipment Target Area, Stockbridge Facility* | Rome, New York | Project Engineer

Mr. Campbell was the Project Engineer for the investigation, characterization, securing and clean up of a drum and electrical equipment target area. A total of ten drums at two locations and electrical equipment were sampled for sludge materials and/or liquid wastes containing TCLs or PCB hazardous wastes.

RRS/IFOCV, Phase II EBS at Building 101* | Rome, New York | Project Engineer

Mr. Campbell was the Project Engineer involved in a Phase II Environmental Baseline Survey on Building 101 located at the former Griffiss Air Force Base in Rome, NY. Project included sampling and testing of soils, water and other media. Items that were part of the scope included hazardous waste, soil vapor, asbestos, wastewater and air quality. There were 13 areas of concern with this building including former tank testing room, heating trench, USTs, floor drain, underground vault, stored hazardous materials, roof drains and oil-stained concrete. Limited remediation was also conducted and a final Environmental Baseline Survey report was submitted.

Nichol Inn, ERP Brownfield Investigation* | Steuben County, New York | Project Manager

Mr. Campbell worked with Steuben County at the Nichol Inn property located in the Town of Pulteney, NY to provide a Remedial Investigation/ Alternatives Analysis Report. This report will be relied upon as a basis for making appropriate decisions for site remediation and future development. The Scope of Work also includes an Environmental Assessment and Interim Remedial Measures Work Plan, geophysical survey, asbestos survey, asbestos removal, building demolition and tank removal, a remedial Investigation Implementation, and instrument survey. This project is being completed under the NYSDEC Environmental Restoration Program.

Orchard-Whitney Brownfield Investigation* | Rochester, New York | Project Manager

Mr. Campbell wrote the Workplan and was the Contract Manager for environmental services for the Orchard Whitney Brownfield site for the City of Rochester under the NYSDEC Environmental Restoration Program. The work has included extensive hazardous materials inspections, sampling and testing programs, tank removal Remedial Investigation/Interim Remedial Measures, Geophysical Investigation, petroleum-contaminated soil and groundwater remediation. The project also includes a large-scale remedial program and preparation of bid documents for demolition of a seven story industrial building on the site.

Phase II ESA/Remediation, 71 and 80 N. Main Street* | Fairport, New York | Project Manager

Mr. Campbell was the Project Manager for Phase II Environmental Site Assessments and remediation services at 71 and 80 North Main Street in Fairport, which was a former petroleum storage facility. The geophysical investigation determined that underground storage tanks or other significant underground metallic features such as piping, hydraulic lifts and reservoirs were present at the site. A proton precession magnetometer was used to take measurements of the earth's magnetic field throughout the suspect areas of the site. Ten locations of subsurface soil sampling were conducted concurrently with the geophysical survey. Soils were screened for the presence of volatile and semi-volatile organic contaminants. A Remediation Work Plan was prepared (including a detailed design of a bio-venting system), installation of the system was completed, and oversight of the operation and maintenance of soil venting system was provided. Once soil concentrations reached acceptable levels, the system was decommissioned.

Remedial Investigation/Feasibility Study Project* | Ontario County, New York | Project Manager

Mr. Campbell was the Project Manager for an inactive hazardous waste disposal site investigation and clean-up project conducted under the direction of the NYSDEC BCP. During the work plan preparation stage he was instrumental in negotiation of an Administrative Consent Order with the NYSDEC. Innovative real time investigation techniques saved the client thousands of dollars in laboratory analytical fees. His knowledge of NYSDEC Superfund and RCRA programs enabled the client to propose delisting of a portion of the site and reclassification of another to a lower priority on the state IHWDS list. The remediation program utilized direct oxygen injection to enhance the biodegradation of volatile organic compounds in site soils and groundwater. Mr. Campbell was responsible for ensuring that the system was designed, installed and operated in accordance with NYSDEC requirements and vendor specifications. He was also responsible for overseeing the O&M program for the remediation system and providing periodic updates to NYSDEC.

Remediation at State Police Barracks, NYS OGS* | Warsaw, New York | Project Manager

Mr. Campbell was the Project Manager responsible for remediation work and providing recommendations for the property on the NYS Police Troop 2 Barracks on Buffalo Road in Warsaw, NY. Tasks included a utility stakeout, test excavations, excavation and staging of impacted soils, and oversight of removal and disposal of excavated soils. Impacted soils in those areas remain in place to avoid damage to the existing structure, and remedial alternatives were evaluated.

Sewall's Island, ERP Brownfield Investigation* | Watertown, New York | Project Manager

Mr. Campbell was the Project Manager in charge of providing the City of Watertown with a Remedial Investigation/ Alternatives Analysis Report (RI/AAR) a site on Sewall's Island in the City of Watertown, New York. The site consists of 11 parcels representing a total of 15.18 acres. The scope of work on this project includes completion of a NYSDEC approved Environmental Assessment and as necessary an Interim Remedial Measures (IRM) Work Plan, a geophysical survey, identification of asbestos containing materials in on-site debris, Remedial Investigation Implementation, completion of an instrument survey, a Remedial Investigation/ Alternatives Analysis Report and conducting public meetings to inform the public of findings and recommendations pursuant to requirements of the ERP program.

Transit Bus/DPW Storage & Maintenance Facility* | Watertown, New York | Project Manager

Mr. Campbell was the Project Manager for the inspection and structural testing services for the construction of three buildings at the City of Watertown Transit Bus/DPW Storage and Maintenance facility. The Transit Bus Garage and DPW Storage and Maintenance Facility Project involved the construction of an 8,000-square foot building north of Newell Street and an 18,000-square foot building south of Newell Street in the City of Watertown. Mr. Campbell provided oversight of the building of trenches (for installing new utility lines) and advised them on the removal of the MGP contaminated soils.

US Rt. 11 Tompkins St. to Binghamton City Line* | Broome County, New York | Environmental Project Manager

Mr. Campbell was the Environmental Project Manager for environmental services on roadway, tunnel and pump house on Route 11, Tompkins Street to Binghamton City Line, Broome County, NY. He developed Hazardous Assessment Phase 1 and Phase 2 with Hazardous Waste/Contaminated Screening Assessment Report incorporating analytical results. And asbestos assessment reports with Summary of Concerns for Design Report.

Former Ogilvie Site, Brownfield Investigation/Clean-up*

Mr. Campbell was the winning grant writer and Project Manager in charge of providing the City of Watertown with a Remedial Investigation/ Alternatives Analysis Report (RI/AAR) for this site in the City of Watertown, New York. The project included completion of a NYSDEC approved Environmental Assessment followed by site cleanup. The scope of work included a geophysical survey, underground storage tank removals, identification of asbestos containing materials in on-site debris, remedial Investigation implementation, a Remedial Investigation/ Alternatives Analysis Report, impacted soil and hazardous waste removal, groundwater treatment and conducting public meetings to inform the public of findings and recommendations pursuant to requirements of the ERP program.

West Broad Street Tank Removal* | Rochester, New York | Project Engineer

Mr. Campbell was the Project Engineer involved in the coordination and oversight of the removal of three underground gasoline storage tanks (USTs) from property on West Broad Street in the City of Rochester, NY. He provided oversight of all field activities including excavation, tank removal and purging/ cleaning, backfilling and site restoration. Two gasoline dispenser pumps and associated underground piping we also removed. Soil sampling was conducted in accordance with applicable NYSDEC protocols.

XLI Corp, Brownfield Redevelopment* | Rochester, New York | Project Manager

Mr. Campbell was Project Manager for a Brownfield redevelopment project for property located within the boundaries of the Emerson Street landfill listed on the NYS List of Inactive Hazardous Waste Disposal Sites. The project included: engineering design with site layout, storm water collection and conveyance along with storm water retention/detention facility; surveying services including base mapping; review of site specific environmental investigations; health and safety plan; and developing a plan for the removal and relocation of landfill materials present. He worked closely with the City of Rochester and the client to provide site development alternatives that satisfy the requirements of the City of Rochester's Brownfield Pilot Program.

STORMWATER MANAGEMENT

City of Rochester, Storm Water Management, Solid Waste Management Facility, Colfax St.* | Rochester, New York | Project Manager

Mr. Campbell was responsible for a Storm Water Management Report for the Solid Waste Management Facility on Colfax Street for the City of Rochester. The report assessed the existing drainage conditions and offered detailed recommendations (with cost estimates) for the management, collection, treatment and discharge of the generated storm water while at the same time addressing the operational needs of the facility and providing an acceptable level of protection to the surrounding environment.

Durand Beach Watershed* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager of the preparation of a watershed map in GIS format and a report describing Durand Beach watershed and potential sources of water contamination for the City of Rochester. This project was completed on a quick turnaround basis because the City needed the information in four days to complete a temporary permit application. The map included locations of potential contamination, anticipated future development, existing wastewater discharges, landfills, adjacent land use, major contours, highways, existing land uses within 10,000 feet, and existing wastewater discharges within 10,000 feet of proposed beach. The City also requested that we provide follow-up water sampling and analysis to assist in a beach permit application to try and open Durand Beach to swimmers.

GRIA, Storm Water Pollution Prevention Plan* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager for development of a Storm Water Pollution Prevention Plan (SWPPP) for the Greater Rochester International Airport that satisfied both NYSDEC and US EPA requirements and provided a practical working document that established storm water best management practices. Preparation and assessment phases included review of existing practices, inspection of storm water outfalls, sources of contamination, and a review of existing pollution prevention activities associated with the airport. The final SWPPP included a description of necessary training as well as spill response, best management practices, good housekeeping practices, and recommendations for following the plan.

ENVIRONMENTAL HEALTH & SAFETY

RRS/IFOCV Building 1, Defense Finance and Accounting Service, Griffiss Air Force Base* | Rome, New York | Project Engineer

Mr. Campbell performed an Indoor Air Quality Investigation including site inspection and laboratory analysis at this site in Rome, NY.

Empire Coating* | Albion, New York | Project Manager

Mr. Campbell was the Project Manager for on-going environmental health and safety compliance assistance for a manufacturing facility. General compliance assistance includes performing inspections, audits of waste management, preparing permits, writing regulatory plans, indoor air sampling and in-house health and safety training.

MKS* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager for environmental compliance and health and safety projects.. These included audits of waste treatment facilities, permitting, water and wastewater, hazardous waste, air quality, preparation of regulatory plans, training for in-house personnel, completion of corporate annual audit and day-to-day regulatory compliance assistance.

Glass Fab, Wastewater Compliance for Lead and Zinc* | Rochester , New York | Project Manager

Mr. Campbell was the Project Manager responsible for providing professional engineering services to assist Glass Fab Inc. in bringing their wastewater discharge back into compliance. There were 30 day CAP and 90 day compliance deadlines. A corrective action plan was developed for high levels of lead and zinc in their wastewater discharge. Abatement actions were developed and highlighted in a letter report to Monroe County DES and he assisted in corrective measures until compliance was achieved.

Gleason Works* | Rochester, New York | Project Manager

Mr. Campbell was the Project Manager responsible for on-going environmental projects at this manufacturing facility. Mr. Campbell developed and Integrated Contingency Plan which included a SPCC plan. He also prepared an Emergency Spill Response Plan in accordance with EPA and NYSDEC spill response regulations at this manufacturing facility. For the past several years, Mr. Campbell has also completed Form A and Form R of the existing SARA Title III regulations for Gleason Works. He has also assisted in identifying items at the facility that may be subject to changes in the lead threshold reporting.

Office of Mental Health Facilities, DASNY* | Western New York | Project Manager

Mr. Campbell was the Project Manager who provided on-going health and safety compliance services for Office of Mental Health (OMH) facilities in Western New York. The Scope of Services included completion of written compliance plans for environmental health and safety programs; updating and obtaining environmental permits; assisting with the development of a statewide Environmental Management System (EMS) program; assisting in the development of facility specific compliance checklists to facilitate the EMS program; assisting with waste disposal; consultation on facility specific environmental programs such as fuel tank management, hazardous waste solid waste and universal waste, air emissions, and water discharges; consultation on facility specific health and safety programs such as hazard communication, personal protective equipment use, lockout/ tagout, respiratory protection, confined space entry and others; asbestos, lead based paint, and mold investigation and consulting services. Documents and programs were provided that are consistent at all OMH locations. Also, Mr. Campbell provided training services to support environmental health and safety programs.

RRS/IFOCV, B-3* | Rome, New York | Project Engineer

Mr. Campbell was the Project Engineer involved in this indoor air evaluation project. Research, sampling for volatile organics and testing to determine source of odor complaints and whether chemical contamination was present at Building 3 at the Rome Research Site for the U.S. Air Force was provided. Was able to define the odor problem was a combination of several sources.

ASBESTOS, LEAD BASED PAINT, AND HAZARDOUS MATERIAL MANAGEMENT

Department of Veterans Affairs Medical Center* | Canandaigua, New York | Project Engineer

Mr. Campbell was responsible for renovations in Building 1 that required an asbestos survey, collection of samples and an abatement design. Phased removal design was a priority to allow for relocation of personnel in three offices. Abatement design included plan and specification development, as well as, cost estimates during 30%, 60% and 100% design submission stages.

**Monroe Community College* | Rochester, New York |
Project Manager**

Mr. Campbell was the Project Manager for the hazardous and asbestos assessment project for renovations of seven buildings under the Master Plan for Monroe Community College in Rochester, NY. Mr. Campbell was responsible for an emergency mold inspection and sampling upon discovery of mold in the Student Center.

**NYSDOT Asbestos Term Contract Regions 3, 4, 5, & 6* |
New York | Quality Control Manager**

Mr. Campbell is the Quality Control Manager for the NYSDOT Asbestos Term Contract (D030924, D031070)), including report reviews, proposal preparation, budgeting, invoicing, contract administration and client relations.

**Pittsford Library Renovations* | Pittsford, New York |
Project Manager**

Mr. Campbell was the Project Manager for the Pittsford Library renovations. This project entailed a Phase I Environmental Site Assessment, asbestos demolition survey, asbestos abatement design services, and a geotechnical investigation. These services were performed on three buildings in the Town of Pittsford for the major expansion of the library. The asbestos abatement design services included development of asbestos design specifications and drawings; development of three specific NYSDOL variances; construction administration services with bidding documents, pre-construction and progress meetings, and review and approval of contractor's submittal package; construction inspection services of air and project monitoring; and final Project Monitoring Report.

**Wayne County Environmental Term Agreement* | Wayne
County, New York | Contract Manager**

Mr. Campbell was the Contract Manager for this term contract for the survey and inspection of County-owned buildings (i.e. Department of Motor Vehicles, Wayne County Office Building). Surveys included hazardous materials, ACM, PCBs, lead based paint, mercury-containing light bulbs and oils. The contract was also used to evaluate buildings for the presence of mold.

EMERGENCY PLANNING / RESPONSE

**Department of Veterans Affairs, SPCC Plan* | Rome and
Syracuse, New York | Project Engineer**

Mr. Campbell was the Project Engineer for the development of Spill Prevention Control and Countermeasure (SPCC) plan for the Department of Veterans Affairs Medical Center petroleum storage facilities at the Rome Outpatient Clinic in Rome, NY. The scope of work included the review of the existing storage records and registration information and development of a punch list highlighting issues that needed to be addressed to bring the facility into compliance with 40 CFR 112 as revised in July 2002. A list of items required for attachment to the plan was developed. In addition, we surveyed the Syracuse VA Medical Center and provided a written conclusion that determined that a SPCC plan was not required for that site. Separate reports were provided for each of the two sites.

SOIL VAPOR INTRUSION ASSESSMENT

**Emerson Street Landfill Soil Vapor Intrusion Project* |
Rochester, New York | Principal-in-Charge**

Mr. Campbell was the Principal-in-Charge of the project to assist homeowners and businesses with the evaluation of soil vapors in buildings surrounding the landfill. The work was completed for the City of Rochester and included vapor testing in numerous buildings within the landfill footprint, supervising analytical sub-consultants and report preparation. He provided technical expertise at public meetings.

ENVIRONMENTAL IMPACT ASSESSMENTS

**McKinley Avenue Bridge Rehabilitation NYSDOT Region
9* | Endicott, New York | Project Engineer**

Mr. Campbell was the Project Engineer for environmental services for this bridge rehabilitation project. NEPA checklist was completed and SEQR classification was determined. Screenings and preliminary investigations were performed to determine potential impacts of design alternatives. General ecology, endangered species, and ground water impacts were studied. Assessments were made to determine if noise, air quality or energy analysis were necessary. Asbestos and hazardous wastes reviews and sampling was performed. EPP, ADP, and PS&E were submitted.

MOLD AUDITS

**New Townhouse Complex, SUNY Geneseo* | Geneseo,
New York | Project Manager**

Mr. Campbell was the Project Manager for an indoor air quality evaluation and mold survey for the new townhouse apartment complex at SUNY Geneseo for this DASNY project. The buildings were inspected for moisture and mold by collecting direct contact and air samples. The samples were analyzed for types of mold and general quantification.

Appendix C USER PROVIDED RECORDS

PHASE I ESA USER'S QUESTIONNAIRE

In order to qualify for protection from land owner liability under CERCLA as an *innocent landowner*, *bona fide prospective purchaser*, or *contiguous property owner*, ASTM standard practice E1527-13 and the federal AAI rule (40 CFR 312) require that the User of the Phase I ESA report provide certain information (if available) to the Environmental Professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the Environmental Professional may be identified as a "data gap" in the Phase I ESA report.

Please answer the following questions as completely as possible. Attach additional pages as needed. Return the completed questionnaire to Stantec along with the executed Authorization for Services form.

1. Property Information

Property Name: Site #4

Property Address: 58-66 Canal Street

City: Lyons State: NY Zip: 14489

Property Owner Name:

Property Owner Phone #:

2. Key Site Manager

This should be an individual with good knowledge of the uses and physical characteristics of the property, and the processes or activities currently conducted at the property. Often this will be the property manager, chief physical plant supervisor, or head maintenance person.

Name:

Company/Organization/Title:

Phone #

E-Mail Address:

3. Contact For Site Access (if different from Key Site Manager)

Name:

Company/Organization/Title:

Phone #

E-Mail Address:

4. Environmental Cleanup Liens. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

Yes (describe or
attach details of the
lien)

X

No

5. Activity and Land Use Limitations. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded as applicable to the property as a result of environmental contamination, investigation, cleanup, or related matters?

Yes (describe or
attach details of the
limitations)

X

No

6. Specialized Knowledge or Experience. As the User of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property, such that you would have specialized knowledge about chemicals and processes used by this type of business?

Yes (describe or attach
details of your
specialized knowledge
or experience)

X

No

7. Relationship of Purchase Price to Fair Market Value of Property. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, do you have any reason to believe that the reduced purchase price may be related to contamination known or believed to be present at the property?

Yes, I have reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.

No, I have no reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.

X

Not applicable. User is not involved in a purchase or sale of the property.

8. Commonly Known or Reasonably Ascertainable Information. Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases of hazardous substances or petroleum products? For example:

Do you know the past uses of the property?

Yes (describe)

X

No

Do you know of chemicals, hazardous substances or petroleum products that are present or once were present at the property?

Yes (describe)

X

No

Do you know of spills or other releases of chemicals, hazardous substances or petroleum products that have taken place at the property?

Yes (describe) _____
☒ No

Do you know of any environmental cleanups that have taken place at the property?

Yes (describe) _____
☒ No

9. The Degree of Obviousness of Contamination. E1527-05 and the federal AAI rule (40 CFR 312.31) require that the Phase I ESA consider the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation. Based on your knowledge and experience related to the property, are there any *obvious* indicators that point to the presence or likely presence of contamination at the property?

Yes (describe) _____
☒ No

10. Availability of Previous Environmental Reports. Are you aware of previous environmental site assessment reports, other environmental reports, documents, correspondence, etc. concerning the property and its environmental condition?

Yes (please identify and provide copies, if available) _____
☒ No

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 11/09/2020 has revealed that there are 5 LTANKS sites within approximately 0.5 miles of the target property.

CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 CBS AST site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
NYSEG - LYONS COAL G	GENEVA ST	SSW 1/8 - 1/4 (0.138 mi.)	B24	67

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was TW 08/08/1999: JM ON SITE. TANKS HAD BEEN REMOVED AND EXCAVATIONS BACKFILLED. THERE IS APPROXIMATELY 30 YARDS OF SOIL ON THE SOUTHSIDE OF THE BUILDING UNDER PLASTIC. AWAITING CLOSURE REPORT. 07/17/2002: NYSDEC RECEIVES TANK CLOSURE AND SITE ASSESSMENT REPORT INCLUDING CONFIRMATORY ANALYTICAL SAMPLING RESULTS. 08/28/2002: NYSDEC RECEIVES DISPOSAL DOCUMENTATION FOR 46.81 TONS OF CONTAMINATED SOIL SENT TO SENECA MEADOWS. NO FURTHER ACTION NEEDED AT THIS TIME BY SPILLS. 08/05/2010: PAPER FILE REMOVED PER FILE RETENTION POLICY."

Remarks: "During a tank removal, caller encountered contaminated soil. Contamination is believed to have come from the associated tank piping. "

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was
JM 06/18/2002: JM ON SITE WITH JAKE EMMIEL. STAINED SOIL BELOW
OVERFILL CONTAINMENT SUMP (ABOVEGROUND) FOR THE WASTE OIL TANK. TOWN
TO EXCAVATE SOIL. 06/18/2002: JM ON SITE. SOIL EXCAVATED FROM AROUND
FILLPORT. 3 FT X 3 FT AREA REMOVED. CLEANUP COMPLETE. NO FURTHER
ACTION NECESSARY AT THIS TIME. 08/05/10: PAPER FILE REMOVED PER FILE
RETENTION POLICY. "

Remarks: "IT IS UNKNOWN WHEN THIS SPILL OCCURRED. HOWEVER, DURING A PBS
INSPECTION, STAINED SOIL WAS OBSERVED AROUND THE FILLPORT TO AN
UNDERGROUND TANK HOLDING WASTE OIL THAT FEEDS A FURNACE. PETROLEUM
PRODUCT WAS OBSERVED AROUND THE SEAL/GASKET UNDER A CATCH BASIN AND
ON THE PIPE DOWN TO THE GROUND AREA. "

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was
TW 07/08/93: ARMSTRONG ESTIMATES THAT THEY ARE APPROX 2 FT FROM
BOTTOM OF TANK. HE WILL STAGE CONTAM SOIL THAT HAS BEEN REMOVED THUS
FAR ON PLASTIC & COVER IT W/PLASTIC. THE TANK WAS BEING ABANDONED IN
PLACE. 07/08/93: THE TANK PASSED A TIGHTNESS TEST ON 12/91. MZ SPOKE
TO BILL LEITCH OF CLARK, PATTERSON & MOSSIER ARCH'S. INFORM ED HIM
THAT LYONS BUS GARAGE MUST DETERMINE HORIZONTAL & VERTICAL EXTENT OF
CONTAMINATION, DETERMINE DEPTH TO GROUNDWATER & IF GROUNDWATER WAS
IMPACTED. MZ ALSO SPOKE W/KEITH SHALLY (LYONS CENTRAL SCHOOL BUS
GARAGE) & INFORMED HIM OF ABOVE. MZ MENTIONED THAT LYONS BUS GARAGE
MUST NOTIFY DEPT OF FINDINGS. 08/04/94: WALSH ON SITE; SPOKE TO
DOROTHY HARTER. SOIL PILE REMAINS ON SITE & EXCAVATION IS PARTIALLY
OPEN, ALTHOUGH IT HAS BEEN PARTIALLY BACKFILLED DUE TO THE SIDE
COLLAPSING. WALSH TO FOLLOW-UP WITH LEITCH. 06/17/03 NO FURTHER
ACTION NEEDED. 08/09/10: PAPER FILE REMOVED PER FILE RETENTION
POLICY. "
Remarks: "WHILE DIGGING ALONG SIDE A 3,000 GAL UNDERGROUND GASOLINE TANK,
ODORS WERE ENCOUNTERED. BOB ARMSTRONG STATED THAT CONTAMINATED SOIL
WAS FOUND APPROX 5-6 FT BELOW THE SURFACE. CONTACT PERSON:DAVE ALENA"

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This

information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: N/A
Date Made Active in Reports: 02/09/2021	Last EDR Contact: 03/04/2021
Number of Days to Update: 26	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: N/A
Date Made Active in Reports: 02/09/2021	Last EDR Contact: 03/04/2021

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/30/2020	Source: EPA
Date Data Arrived at EDR: 01/14/2021	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (212) 637-3660

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

NYC LEAD 2: Recent Lead Paint Violations

Pursuant to New York City's Housing Maintenance Code, the Department of Housing Preservation and Development (HPD) issues violations against conditions in rental dwelling units that have been verified to violate the New York City Housing Maintenance Code (HMC) or the New York State Multiple Dwelling Law (MDL). Violations are issued when an inspection verifies that a violation of the HMC or MDL exists. It is closed when the violation is corrected, as observed/verified by HPD or as certified by the landlord.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

West Map:	5938563 NEWARK, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
3608910002B	FEMA Q3 Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
3612260002B	FEMA Q3 Flood data

3612260003B	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
LYONS	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Silurian
Series: Upper Silurian (Cayugan)
Code: S3 *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: CHENANGO

Soil Surface Texture: gravelly - loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: LOW

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinator soil types may appear within the general area of target property.

Soil Surface Textures: channery - silt loam
silt loam

Surficial Soil Types: channery - silt loam
silt loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: very channery - silt loam
stratified
silt loam
very gravelly - sand

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Subject: Freedom of Information Law Request :: W080752-040221

Body:

RE: PUBLIC RECORDS REQUEST of 4/2/2021, Reference # W080752-040221

Date: 04/15/2021

Dear Jennifer Nair,

I write in response to your Freedom of Information Law (FOIL) request seeking:

Divisions of Air Resources, Environmental Permits, Environmental Remediation, Water, and Materials Management (including any records/permits pertaining to air quality, petroleum/chemical bulk storage, spills, solid waste, and/or hazardous waste) for 4 parcels in Lyons, New York (Wayne county):

- 1) Tax ID: 71111-09-136667 (42 Canal Street)
- 2) Tax ID: 71111-09-138667 (46 Canal Street)
- 3) Tax ID: 71111-09-141667 (50 Canal Street)
- 4) Tax ID: 71111-09-157668 (58-66 Canal Street)

Please be advised that a diligent search of the files maintained by DEC produced no responsive records.

If you believe you have been unlawfully denied access to responsive records, you have the right to appeal. Any such appeal must be submitted in writing and within thirty (30) days of the date of this email. Appeals must be directed to:

FOIL Appeals Officer
Office of General Counsel
New York State Department of Environmental Conservation
625 Broadway, 14th Floor
Albany, NY 12233-1500

Your FOIL request is now closed. If I can be of further assistance, please contact me at 585 226-5363 and reference FOIL #W080752-040221, or simply reply to this email. Thank you.

Sincerely,

Region 8 FOIL Coordinator

✉ On 4/2/2021 12:56:05 PM, New York DEC Support wrote:

Dear Jennifer:

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 4/2/2021 and given the reference number FOIL #W080752-040221 for tracking purposes. You may expect the Department's response to your request no later than **4/30/2021**.

Record Requested: **Divisions of Air Resources, Environmental Permits, Environmental Remediation, Water, and Materials Management (including any records/permits pertaining to air quality, petroleum/chemical bulk storage, spills, solid waste, and/or hazardous waste) for 4 parcels in Lyons, New York (Wayne county):**

- 1) Tax ID: 71111-09-136667 (42 Canal Street)
- 2) Tax ID: 71111-09-138667 (46 Canal Street)
- 3) Tax ID: 71111-09-141667 (50 Canal Street)
- 4) Tax ID: 71111-09-157668 (58-66 Canal Street)

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

Please note that due to the COVID-19 outbreak, DEC may be experiencing staffing shortages and some records custodians may be working remotely. This may result in a delayed response time to your FOIL request. We appreciate your understanding and cooperation.

Re: Violations/ 58-64 Canal St.

Attn: Robert Darcangelis

Dear Mr. Darcangelis,

I am writing this letter as we seem to constantly miss each other's phone calls and I need to discuss the constant, and all of the sudden violations we have been receiving for the above mentioned property. On 7/15/13 a notice was sent regarding the trash/weeds/broken windows at the property. Our maintenance Jim Delany contacted you about these items. He advised you the weeds weren't on our property & apparently you said ok. The garbage was cleaned up, and the windows were measured, but had to be ordered. They were installed on 8/8/13. (I have provided a copy of our invoice for them) My husband in the meantime paid the \$304.13 fine. I would like to know when we are receiving that money back as we cooperated with the orders given. Next, we receive a notice for the dumpster on the property. It sits on a small 10x12 blacktop slap that is owned by the historical society. And although the dumpster has been there for as long as we have been managing the property, now someone has an issue with it. I can only assume it's because we wouldn't trim their weeds that they now have complained. I have no problem moving it, if I had somewhere to put it. Because of the size of the property we are required to have a dumpster. However, because it is a zero lot line, I have no place to put it. Puts me in a catch 22 don't you think? I'd like your suggestions, please, before you fine us for it. I can't put it inside, obviously, so where do you suggest I put it? I think we have done our best to maintain the property however, we are only the property managers, and can only do so much, so we'd love to work with you, not against you. Please contact me with any suggestions or otherwise that you think I may need to avoid further violations & fines on this property. Thank you in advance for your time.

Sincerely,

Kelly Tamburrino

Notice of Violation/Order to Remedy

01/27/16

To: WEM Property LLC
PO Box 828
Webster, NY 14580

Property Location: 58-66 Canal St

Tax Map#: 71111-09-157668

Violation# : 2016-0012

Violation Date: 01/27/16

Offense: Vacant Structures and Land

An apparent violation of the Zoning/Building Laws exists on the above property. I observed:
Open / unsecured window(s) on fire escape; other unsecured areas of the vacant building

This is in violation of the law/ordinance specified below and detailed at the end of this notice:

Authority : NYS Property Maintenance Code
Section : 301.3
Title : General
Page :

YOU ARE THEREFORE DIRECTED AND ORDERED to comply with the law and to remedy the condition above on or before 02/02/16.

FULL compliance with this order to remedy is required by the date of this order. If the person or entity served with this order to remedy fails to comply in full with this order to remedy, that person or entity will be subject to a fine of not more than \$1,000 per day of violation, or imprisonment not exceeding one year, or both.

Date

Tom Sawtelle, Code Enforcement Officer

Violation Detail :

All vacant structures and premises thereof or vacant land shall be maintained in a clean, safe, secure and sanitary condition as provided herein so as not to cause a blighting problem or adversely affect the public health or safety.

Town of Lyons Building Department

**43 Phelps St
Lyons, NY 14489
(315)946-6252**

Tax Map#: 71111-09-157668 **Location:** 58-66 Canal St
Owner(s): WEM Property LLC **Other Permit:** # 2016-0019
Inspection Type: Multifamily Fire Inspection **Date:** 05/11/16 **Inspection #:** 19
Officer Name: Tom Sawtelle **Next Inspection Due:** 07/11/16
Notes: Building is currently vacant

An inspection was conducted at the above location. The following violations were found and must be corrected prior to the next inspection due date.

- ☒ **Obstructed / Condition** - Trees at rear of building may obstruct FD access to rear windows, especially use of ground ladders
- ☒ **Address / Building Identification** - All apartment numbers must be clearly marked on the street and apartment entrances.
- ☒ **Weeds** - Tall weeds and combustible vegetation (vines) at rear of building need removal.
- ☒ **Household Smoke Alarms** - HARDWIRED smoke alarms must be provided / maintained in each bedroom and outside of bedrooms, per code.
- ☒ **Carbon Monoxide Alarms** - CO alarms must be provided and maintained in each apartment, and in the storefront.
- ☒ **Adequate number / Correct type(s)** - Fire extinguishers with current tags must be installed and maintained in each apartment and in the storefront, as well as utility spaces.
- ☒ **Blocked / Obstructed** - There are wires / cables obstructing the fire escape
- ☒ **Platforms / ladders / catwalks** - The fire escape has damaged steps and other components, and needs rehabilitation
- ☒ **Means of Escape / Rescue Window** - All bedroom windows must be easily operable and must be able to stay open on their own.
- ☒ **Fire-resistive construction** - Stairways must be maintained fire resistive; all windows, transoms, and damaged plaster / drywall must be repaired or replaced with appropriate fire resistive materials
- ☒ **Exit signs provided / illuminated** - illuminated EXIT signs must be installed throughout the building, indicating the locations of all exits.
- ☒ **Inadequate Coverage** - Emergency lighting must be installed throughout the building to serve the means of egress in the event of power failure.

Tax Map#: 71111-09-157668

Location: 58-66 Canal St

Owner(s): WEM Property LLC

Other Permit: # 2016-0019

Inspection Type: Multifamily Fire Inspection

Date: 05/11/16 Inspection #: 19

Officer Name: Tom Sawtelle

Next Inspection Due: 07/11/16

Notes: Building is currently vacant

An inspection was conducted at the above location. The following violations were found and must be corrected prior to the next inspection due date.

- ☒ Open / Frayed / Defective / Unapproved Wiring - All electrical wiring must be securely fastened in place, and a 3rd-party independent electrical inspection shall be performed and all identified deficiencies must be corrected (entire building, NOT just the service)
- ☒ Open junction boxes/outlets/switches - All open / uncovered electrical components must be covered in an approved manner (see above)
- ☒ Panel not marked / illumination provided - All electrical panels must be marked / identified, and must be provided with lighting in close proximity
- ☒ Disconnecting switches labeled - All disconnects and circuit breakers / fuses shall be labeled
- ☒ Holes / cracks / penetrations - All damaged walls, ceilings and floors shall be repaired so as to be fully intact
- ☒ Need fire door - Each apartment shall be equipped with a properly rated (i.e. 45-minute) fire door
- ☒ Doors / shutters kept closed / self-closing - All fire doors shall be equipped with self-closing hardware
- ☒ Tiles missing / loose materials - All damaged ceiling tiles shall be replaced
- ☒ Holes / cracks / penetrations - All damaged ceilings shall be repaired
- ☒ Interior Wall / Door / Floor condition / Floor loads - All doors shall be repaired or replaced (see also fire door requirements above); floors must be repaired
- ☒ Plumbing / Piping (water-steam-air) - All plumbing must be repaired as necessary to supply all required fixtures.
- ☒ Exterior Wall / Door / Window/ Roof / Gutters - The roof is leaking; numerous broken windows need repair; rear 1st floor wall needs repair due to rotted wood; framing in attic needs repair (split beam, missing headers); exterior brickwork above #58 and on west-front corner needs repair
- ☒ Rubbish / Garbage / Combustible waste / Sanitation - Rubbish throughout the building in the form of junk in the basements and household furnishings left in vacant apartment(s)
- ☒ Fuel gas meters / piping / tanks - All gas meters must be labeled as to the units they control; all gas piping must be pressure tested.

Tax Map#: 71111-09-157668

Location: 58-66 Canal St

Owner(s): WEM Property LLC

Other Permit: # 2016-0019

Inspection Type: Multifamily Fire Inspection

Date: 05/11/16 Inspection #: 19

Officer Name: Tom Sawtelle

Next Inspection Due: 07/11/16

Notes: Building is currently vacant

An inspection was conducted at the above location. The following violations were found and must be corrected prior to the next inspection due date.

- ☒ Heating equipment / portable / permanent / chimney - Brick chimney on east side of building is badly deteriorated, with a hole through it and the top section removed; this chimney has a furnace and water heater connected to it.
- ☒ Water heater / Boiler certification / safety controls - All water heaters must be in good working order, with all safety devices installed and functional (including pressure relief valves and discharge pipes)
- ☒ Other Interior Hazard - large amounts of mold, especially in the 1st floor apartment(s)

New York State requires periodic fire inspections. Failure to comply may cause you to lose your Occupancy Certificate.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
